Can you tell us what documents

23

24

A.

Q.

Yes.

Q. Can you review Deposition

²⁴ Exhibit 7 and tell us if that is your report?

Page 26 Page 28 1 A. It looks like it, yes. ¹ you cite to in your report. Is that right? A. In the body of the report, MS. O'DELL: You're happy to 2 ³ that's correct. There were more things that 3 offload whatever you have? MR. ZELLERS: Exactly. I'm ⁴ I cited in the appendices. 5 going to insist that you all take a Are the appendices a part of copy of Dr. Crowley's report. 6 your report? BY MR. ZELLERS: A. Yes. 8 Q. A part of your report is your O. The references, what we have curriculum vitae or CV. Let's mark that as marked as Exhibit 9, is that a complete listing of all the citations in your report, ¹⁰ Deposition Exhibit 8. including appendices? 11 (Exhibit No. 8 marked) 12 ¹² BY MR. ZELLERS: Α. No. 13 Q. And if you will just identify 13 MS. O'DELL: Object to form. for us what Deposition Exhibit 8 is? 14 Yeah. No. There were reports from the literature, internet links within 15 It's my CV. A. 16 Is Deposition Exhibit 8 your the appendices that do not appear in O. current and up-to-date curriculum vitae? Section 7 of my report. 18 A. Yes. 18 BY MR. ZELLERS: 19 O. In order, then, for counsel in (Exhibit No. 9 marked) BY MR. ZELLERS: ²⁰ this case to understand what is cited in your ²¹ report, we need to look at the body of the Deposition Exhibit 9 is a ²² report and take a look at the list of ²² four-page document. It is from your report, ²³ which is Exhibit 7. Deposition 9 are ²³ references. Is that correct? ²⁴ Pages 66 through 69 of your report, and the You need to look at the entire Page 27 Page 29 ¹ caption at the top is "References." ¹ report, the body of the report and the Can you look at Deposition ² appendices. ³ Exhibit 9 and tell us what that is? Did you prepare the reference Q. This appears to be the reference 4 list? ⁵ section from my report. A. I did. 6 What -- strike that. (Exhibit No. 10 marked) 7 How do you use the term ⁷ BY MR. ZELLERS: Q. Deposition Exhibit 10 also comes "reference"? What do you mean by "reference" 9 when you put that -from your report, Pages 15, 16, and 17. I'm 10 looking at the section of Deposition 10 These are items that I cited ¹¹ Exhibit 10 that begins "Sources Considered." ¹¹ within the report. MS. O'DELL: Do you need me to 12 Can you take a look at 13 give something back? 13 Exhibit 10 and tell us what that refers to? MR. ZELLERS: No. But this will 14 This is a list of sources that I 15 be 10 as well as what I'm handing to considered during the generation of my ¹⁶ report. 16 you. 17 17 MS. O'DELL: Okay. Q. What is the difference between MR. ZELLERS: The witness just 18 ¹⁸ the references and the sources that you 19 has 9 right now, which is the first considered? 20 20 document. Well, references are things that A. 21 ²¹ I cited, and sources considered are things MS. O'DELL: Okay. 22 BY MR. ZELLERS: ²² that I looked at. 23 Q. References to you, in which Q. Is the listing of sources you're referring to, are the materials that ²⁴ considered, Deposition Exhibit 10, a complete Page 30

listing of the materials and sources that you
 considered in preparing your report and in
 developing your opinions in this case?

A. I believe so. I tried to capture them all. I may have missed a few.

- ⁶ Q. How would you define the area of ⁷ expertise in which you're offering opinions ⁸ in this case?
- A. Chemistry, molecular
 pharmaceutics, formulation science,
 pharmacology, toxicology.
- Q. You consider yourself to be an expert in each of those subject areas?
- A. I consider myself to be an expert in chemistry and pharmaceutical science, as well as formulation matters.
- Q. Anything else?
- ¹⁸ A. I think that's a pretty good ¹⁹ descriptor.
- Q. Deposition Exhibit 7 is your report in this case. Does that report contain all of the opinions that you intend to offer as a witness in this matter?
 - ⁴ A. Yes.

2

is the safety profile, and what's known about
 it.

Page 32

Page 33

- ³ Q. Are the opinions which you're
- ⁴ rendering in this case limited to the
- ⁵ fragrance components of the talcum powder
- ⁶ products manufactured by Johnson & Johnson
- ⁷ Consumer Products, Inc.?
 - MS. O'DELL: Object to form.
- ⁹ A. I'm not sure I understand your question.
- 11 BY MR. ZELLERS:
- Q. The opinions that you are rendering in this case, are they limited to the fragrance components of the talcum powder products manufactured by Johnson & Johnson
- ¹⁶ Consumer Products, Inc.?
 - A. Yes.

17

Q. And -- I'll strike that.

Can we agree that when I refer to either products or talc products or baby

²¹ powder or Shower to Shower, that I'm

²² referring to the baby powder product

- ²³ manufactured by Johnson & Johnson Consumer
- ²⁴ Products, Inc., and the Shower to Shower

Page 31

- ¹ Q. Is the report accurate?
 - A. I believe it is.
- ³ Q. Is it complete?
- ⁴ A. I believe so.
- Q. Appendix A, which is a baby
 powder fragrance chemical review, what was
 the purpose of you preparing that appendix?
- A. I was asked to review the
 physical and chemical properties of each of
 these fragrance chemicals, and I created that
 list to capture the results of the evidence
 that I found.
- Q. How did you decide what information to include in Appendix A?
- A. Well, I was asked a couple of questions, as described in my report, and that seemed to be a logical framework in which to collate the information.

And, frankly, it's consistent
with how a formulation scientist would
consider inactive ingredients when creating a
new composition. So you consider what are
the properties of these materials, both from
a chemical and biological perspective, what

 $^{\rm 1}\,$ product formerly manufactured by Johnson &

² Johnson Consumer Products, Inc.?

MS. O'DELL: Object to form.

4 A. I can agree to that

⁵ understanding.

BY MR. ZELLERS:

- Q. You do not have an opinion -- or
 not expressing any opinions in this case as
 to whether or not talc products are
- ¹⁰ contaminated with asbestos. Is that right?
- A. I was not asked to consider that.
- that.

 Q. Do you think you have produced
- in this matter all of your file relating to
 the expert work that you have done? And by
- 16 "produced," I mean in your report and as
- supplemented by the exhibits that we've
- marked here today.
 - A. I believe so.
- Q. Did anyone assist you in preparing your report?
- ²² A. Yes.

19

Q. Who assisted you in preparing your report?

Page 11 of 96 Page 34 Page 36 1 My wife. A. No. A. 2 Q. Your wife's name is? Q. Are you aware of any documents Carrie, C-A-R-R-I-E, Asher, 3 ³ relating to your review in this matter that A. ⁴ have not been identified either as sources ⁴ A-S-H-E-R, Crowley. considered or in your reference list? What did Ms. Asher Crowley do to ⁶ assist you in preparing your report in this A. I don't think so. I mean, I've matter? seen some things in the news recently, but 8 they didn't impact my report. So she helped me identify some A. MS. O'DELL: I'll just add for of the fragrance chemicals. 10 the record: Other than what's been 10 Q. Anything else? 11 No. 11 marked as an exhibit here, just to make A. 12 12 Do you bill separately for the it clear. ¹³ services of your wife, Ms. Asher Crowley? 13 MR. ZELLERS: Yes. 14 14 Yes. A. I did my best to keep track of A. 15 When I go back and I look and provide either -- in the references or, Q. you know, disclosed within sources considered ¹⁶ through the invoices that have been produced and that we've marked as Exhibit 2, will I or within the appendices everything that I see references to Ms. Asher Crowley? 18 looked at. 19 I think you'll see a different 19 BY MR. ZELLERS: 20 ²⁰ bill rate for her time. Q. When you were -- strike that. 21 21 Your bill rate is what? Were you first contacted by O. 22 \$600 an hour. ²² Ms. O'Dell to become involved as an expert in Α. 23 Q. Is your bill rate the same for this matter? ²⁴ doing the review and preparation of the A. Q.

No.

²⁴ the preparation of your report?

²² projects, and I couldn't start working on

²³ this immediately. So I don't recall the

²⁴ exact date that we first met. I signed a

Page 38

- ¹ protective order and engagement letter. I ² would consider that when we first got
- ³ engaged. We can get you, you know, those ⁴ dates if you'd like.
- Does April or spring -- strike ⁶ that.
- 7 Does April or May of 2018 sound about right?
- A. Yes.
- 10 O. What did Ms. Thompson ask you to do with respect to this matter?
- 12 She indicated that she and her 13 colleagues were looking for an expert to review the fragrance chemicals in the talcum powder products and provide some additional information.
- 17 When were you first asked to O. prepare a report?
- 19 A. I would say midsummer, June, ²⁰ July.
- Were you given any additional ²² instruction in terms of what plaintiffs'
- ²³ counsel wanted you to do or were requesting
- 24 that you do in this matter around the time

Page 40

- ¹ deal with those objections at a later time.
- ² So, once she has made her objection, you can
- go ahead and answer the question as long as you understand it.
- Okay. I'm sorry. Can you repeat the question?
- O. Sure. This additional topic 8 that you were asked to consider by
- plaintiffs' counsel, you never got to the point of considering it or formulating any opinions. Is that right?
- 12 I did put some time in A. 13 considering it, but I ran out of time to properly research it, and I think I won't be rendering an opinion on it today.
 - Any other topics that you were asked to address by either Ms. Thompson or any of the counsel for plaintiffs in this matter?
 - A. No.
- 21 Originally defense counsel were O. provided with a report that was dated
- ²³ November 12th of 2018. We then received a
- ²⁴ second slightly revised report around

Page 39

- ¹ that you were asked to prepare a report?
- I mean, the two questions that appear in my report were the instructions.
- Did plaintiffs' counsel in the ⁵ talc MDL ask you to address any other questions?
- I was briefly asked to consider ⁸ reviewing the flotation process used in the talc manufacturing.
 - Q. Did you decline that?
- I ran out of time. I didn't 11 A. 12 have time.
- 13 You are expressing no opinions, 14 then, with respect to the flotation process involved in the talc processing. Is that 16 right?
- 17 MS. O'DELL: Object to form. 18 You may answer.
- 19 Sorry. I couldn't hear you.
- 20 MS. O'DELL: You may answer.
- 21 BY MR. ZELLERS:

10

- O. Yeah. As we go along today, 22
- ²³ Counsel will make some objections. She's ²⁴ doing that just to protect the record. We'll

Page 41 ¹ December 4th of 2018. Are you familiar with

² that?

13

18

20

A. No. I think -- I think

⁴ Ms. O'Dell told me that they originally

⁵ submitted an unsigned copy, and when they

recognized that, they resubmitted the signed

copy, something to that effect.

MS. O'DELL: I would just state for the record the incorrect PDF was 10 put in the Dropbox. That's what 11 happened. So -- and then once we 12 realized that, we provided the correct

version. BY MR. ZELLERS:

- 15 Deposition Exhibit 7 is your final report with respect to this matter. Is that right?
 - Α. I believe so.
- 19 That is the report that contains all of the opinions that you intend to express in the talc MDL. Is that right?
- 22 Yes. A.
- 23 Have you been disclosed as an O. ²⁴ expert in any other talcum powder proceeding

	M1 Glage ib: 239	Jle	C1 / 111.D.
	Page 42		Page 44

I 21 the questions asked and review the data in a find them to be reputable. ²² fair and impartial way? 22 (Exhibit No. 11 marked)

Why is that important?

23

24

A.

Q.

Yes.

Deposition Exhibit 11 --

²³ BY MR. ZELLERS:

24

Page 86 Page 88 1 MS. O'DELL: Thank you. Held accountable for what? ² BY MR. ZELLERS: BY MR. ZELLERS: Q. You have no issue that you, as O. -- is from the EPA website, and ⁴ an expert, need to be free from bias, ⁴ it sets forth the standards for scientific integrity. Is that right? ⁵ falsification, and plagiarism in your review MS. O'DELL: &Object to the ⁶ analysis and preparation of your report in 7 ⁷ this matter. Correct? form. 8 MS. O'DELL: Object to the form. That's what it looks like. Α. BY MR. ZELLERS: A. I think you're asking me, you know, if I maintain scientific integrity. Is 10 Do you see that the EPA explains ¹¹ that scientific integrity is highly important that right? If that's your question, the ¹² to insulate the scientific community from answer is yes. ¹³ things such as bias, falsification, and 13 BY MR. ZELLERS: 14 plagiarism? Q. And the EPA, which you cite and 15 rely on, cites standards for scientific MS. O'DELL: What page are you 16 ¹⁶ integrity. Correct? reading from? 17 17 MR. ZELLERS: Page 2. Α. Yeah. ¹⁸ BY MR. ZELLERS: 18 Q. And those standards state that 19 Q. I'm looking at the middle of the scientific integrity is important because it provides insulation from bias, falsification, page. "Scientific integrity is important ²¹ because it provides insulation from and plagiarism. Correct? plagiarism" -- correct? 22 A. That's what it says. 23 23 That's what it says, yeah. You agree with that? Q. 24 24 It also provides insulation from Q. Α. Yeah. Page 87 Page 89 ¹ research misconduct. Is that right? Q. Correct? 2 2 MS. O'DELL: Object to the form. A. Yeah. 3 I don't see where it says "misconduct" All right. Are you familiar on the document. I may be --⁴ with the Office of Research Integrity? And 4 5 MR. ZELLERS: Sure. ⁵ let me hand you a page from their website 6 ⁶ that we'll mark as Exhibit 12. MS. O'DELL: I may be missing 7 (Exhibit No. 12 marked) it. 8 MR. ZELLERS: Okay. And, A. No, I am not. 9 actually, I'd rather the witness ask me BY MR. ZELLERS: 10 questions, but I'll try to help you 10 Q. You've never heard of the Office 11 here. of Research Integrity? 12 12 No, I haven't. A. BY MR. ZELLERS: 13 13 Are you aware that the federal "Why is scientific integrity government has an Office of Research 14 important?" 15 15 Integrity? The second bullet point says, ¹⁶ "Scientific integrity, along with federal 16 A. No. policies on research misconduct" -- it gets 17 Do you see from Deposition Exhibit 12 that plagiarism is defined as the ¹⁸ to the point where scientists such as ¹⁹ yourself can be held accountable. Do you appropriation of another person's ideas, ²⁰ agree? processes, results, or words without giving 21 appropriate credit? MS. O'DELL: Excuse me. Object 22 22 to the form, misstates the document. A. Yes. 23 23 You can answer if you understand the Do you agree with that O. ²⁴ definition of plagiarism? 24 question.

Page 90

- 1 It seems like a reasonable definition of plagiarism.
- Are you aware that several ⁴ paragraphs from your report were copied and pasted from various websites and articles?
- A. Yes.
- 7 O. Can you tell us where in your report you copied and pasted statements from other websites and articles?
- 10 I mean, a good majority of the report was drawn from those sources.
- 12 It would be wrong for you to 13 simply lift or copy and paste the text from 14 other sources and include it in your report without giving attribution to those sources. ¹⁶ Correct?
- 17 MS. O'DELL: Object to form.
- 18 A. I did every -- I made every ¹⁹ effort to cite where I drew information from. ²⁰ And, Counselor, if you're going to suggest ²¹ that copying and pasting information into ²² that report, specifically in the appendices,
- ²³ represents plagiarism, that was a collation
- ²⁴ of the information from which I formed the

- ¹ different. I'm not talking about
- ² paraphrasing. I'm not talking about where

Page 92

Page 93

- ³ you do cite to a source.
- It would be wrong for you as an ⁵ expert witness in this case to lift, word for
- ⁶ word, text from other articles and other
- sources and include those in your report.
- Correct?

12

- A. I did not --
- 10 MS. O'DELL: Excuse me. Object 11 to the form.
 - No. I disagree. A.
- 13 BY MR. ZELLERS:
- 14 Q. It would be appropriate for --15 MS. O'DELL: Excuse me, sir.
- 16 MR. ZELLERS: Sure. 17
- MS. O'DELL: If you're not 18 finished, you may finish your answer.
- 19 I wasn't finished. I had to gather information on these chemicals, and I
- relied upon several sources to do so. The appendices were created by examining those
- ²³ sources, collating that information, which
- ²⁴ included copying and pasting it in the

Page 91

- ¹ basis of that report and the opinion.
- ² BY MR. ZELLERS:
- Would it be wrong, in the body
- ⁴ of your report, not speaking of the
- ⁵ appendices, for you to copy and paste
- ⁶ statements from other authors and websites
- ⁷ and materials without giving attribution to those sources?
- 9 MS. O'DELL: Object to the form.
- 10 A. I don't think so.
- ¹¹ BY MR. ZELLERS:
- 12 Q. You think it would be ¹³ permissible to take quotes from other ¹⁴ articles, websites, and sources, include them ¹⁵ in the body of your report, and pretend that 16 they are your words?
 - MS. O'DELL: Object to the form.
- I don't believe I did that. I
- ¹⁹ believe that what I did was either paraphrase
- or cite to a source. And if I have missed a 21 citation, then, you know, it's easily
- ²² corrected.

17

- 23 BY MR. ZELLERS:
- 24 My question is a little

- ¹ report. So, no, it's absolutely not
- ² inappropriate to do so.
- ³ BY MR. ZELLERS:
- Q. I am not speaking of the
- ⁵ appendices. I'm speaking of the body of your report where you set forth your opinions.
- It would be wrong in the body of
- your report to lift and copy and paste text from other articles or from other sources
- without giving attribution to those sources.
- ¹¹ Correct?

12

17

18

- MS. O'DELL: Object to the form.
- 13 A. No. I don't believe so. I don't ¹⁴ believe I did that. I believe that in some of the tables I recite some of the items from ¹⁶ the appendices word for word. So --
 - MS. O'DELL: Excuse me. Let him -- you may finish.
- 19 Yeah. So let's be very clear about this, Counselor. If you're going to
- suggest that my report is anything less than
- ²² ethical and that there's plagiarism or this
- ²³ or that, I was relying upon that information
- ²⁴ to draw, you know, the conclusions and the

Page 94 Page 96 ¹ opinions that I drew. ¹ entire paragraph -- second paragraph under ² Section 4.2 on Page 18 -- is copied and ² BY MR. ZELLERS: So I understand your testimony, ³ pasted word for word from an article written ⁴ you do not believe that it is wrong for you 4 by Anne Steinemann and published in to take, word for word, information --⁵ Environmental Impact Assessment Review, 2008? Why don't you show me where that I may have reviewed that and A. ⁷ is. gotten it from there and, you know, didn't do 8 ⁸ an adequate job of paraphrasing. May I see MS. O'DELL: Excuse me. Let him the article, please? finish. ¹⁰ BY MR. ZELLERS: Q. Sure. Because it's your 11 Q. Let me finish my question. 11 testimony it would be okay if you paraphrased statements from Ms. Steinemann in her paper. 12 MS. O'DELL: And then let me 13 object. So you can finish your --Is that right? 14 ¹⁴ BY MR. ZELLERS: MS. O'DELL: Object to the form. 15 15 Would it be wrong for you, in A. Yes. 16 (Exhibit No. 13 marked) ¹⁶ the body of your report, to go to other articles or other sources and lift that BY MR. ZELLERS: ¹⁸ information word for word and include it in Q. I'm going to hand you what we'll mark as Deposition Exhibit 13. 19 your report without attribution to other ²⁰ sources? Would that be wrong? 20 A. Okay. 21 21 Which is the Steinemann article. MS. O'DELL: Object to the form, 22 ²² Your first sentence of this paragraph starts asked and answered, misstates his prior 23 testimony. You may answer the question ²³ with, "Regulation of consumer products 24 ²⁴ largely falls under the Consumer Products as you understand it. Page 97 Page 95 Yeah. I don't believe I did it. ¹ Safety Act." ² If I did, it was an oversight. Okay? And Is that right? ³ I'll state again --Yes. A. MS. O'DELL: There's no --Go to Page 2 of the Steinemann ⁵ BY MR. ZELLERS: ⁵ article underneath the regulatory analyses, ⁶ the third paragraph, second sentence, 6 O. Turn to --7 ⁷ "Regulation of consumer products largely MS. O'DELL: There's no question ⁸ falls under the Consumer Products Safety pending. 9 BY MR. ZELLERS: Act," and I eliminated the statement in 10 Turn to Page 18 of your report. 10 parens. 11 ¹¹ Do you see Page 18? That's word for word. Correct? 12 12 A. Yes. A. No, it's not. 13 13 Paragraph 2. Are those your What -- other than the omitted paren which states "other than food, drugs ¹⁴ words? And I'm sorry. So it's clear, Paragraph 2 underneath Section 4.2, fragrance cosmetics, tobacco, and pesticides" that --¹⁶ chemical regulatory review. 16 Yeah, those are the same words, 17 ¹⁷ that's correct. Without the parens, that's MS. O'DELL: Just so I'm clear, 18 the paragraph beginning "Regulation of 18 right. 19 consumer products"? 19 Then we go to the second 20 MR. ZELLERS: Yes. sentence, and go down to the next paragraph in Dr. Steinemann's report, the one that 21 BY MR. ZELLERS: starts "notably." Do you see that? 22 Are those your words? Q. 23 23 I believe I typed them, yeah. A. A. Yes. Are you aware that nearly that 24 24 Q. Q. Then it continues, "The CPSA

Page 98 Page 100 ¹ does not require disclosure of all Go to Page 27 of your report. ² ingredients in products," and it continues Do you see the last full paragraph? ³ for several more sentences. Α. Yes. Those sentences appear, word for Q. Are you aware that the last full ⁵ word, in your second paragraph on Page 18. paragraph on Page 27 of your report, all but the first sentence was copied and pasted from ⁶ Correct? a Wikipedia entry on mucus membrane? MS. O'DELL: Object to the form. MS. O'DELL: Object to form. A. I believe I paraphrased it. I I believe I paraphrased it. don't think it's word for word. BY MR. ZELLERS: ¹⁰ BY MR. ZELLERS: 11 11 Q. Well, I don't want to take the Q. Well, I will let the record 12 time to go through and do a word-for-word speak for itself in terms of doing the ¹³ analysis. ¹³ word-by-word comparison. I don't believe 14 Go to, then, if you will, Page 3 14 that you did, but we'll let the record, ¹⁵ of the Steinemann article, and the first again, speak for itself. ¹⁶ sentence on Page 3, "Ingredients can also be Look at Page -- strike that. exempt from disclosure." 17 (Exhibit No. 14 marked) 18 You state that sentence as the 18 BY MR. ZELLERS: ¹⁹ next sentence in your report. Right? Q. Look at Exhibit 14, which is the 20 Wikipedia entry or statement on mucous A. Yep. MS. O'DELL: Object to the form. membrane. 22 MS. O'DELL: Is this 14? ²² BY MR. ZELLERS: 23 23 Q. Then if we go to the next MR. ZELLERS: Yes, 14. 24 ²⁴ paragraph, several sentences in where it Page 99 Page 101 ¹ says, "Under the FFDCA, fragrance ingredients ¹ BY MR. ZELLERS: ² that qualify," that sentence appears verbatim Q. You are -- and specifically you ³ in your report. Is that right? ³ have lifted verbatim in the second to last MS. O'DELL: Object to the form. ⁴ paragraph or the last full paragraph on A. Where is this? ⁵ Page 27 the Wikipedia statement as to what a ⁶ mucous membrane or mucosa is. And I'm ⁶ BY MR. ZELLERS: ⁷ looking at the very first page, the Q. So you go to the second 8 paragraph on Page 3 of the Steinemann ⁸ introductory paragraph of Exhibit 14. Is ⁹ article. The sentence starts -- and this is that right? ¹⁰ about three or four sentences in -- "Under 10 MS. O'DELL: Object to form. A. I believe I paraphrased it, as ¹¹ the FFDCA, fragrance ingredients that qualify ¹² as trade secrets," that is your last sentence ¹² I've said. 13 in Paragraph 2 of your report. Is that 13 BY MR. ZELLERS: 14 right? Q. Well, you start with -- and I'm 15 ¹⁵ looking at the second sentence -- "A mucous Yeah, that's consistent. 16 membrane or mucosa is a membrane," and then 16 MS. O'DELL: Object to the form. you end the paragraph, four or five sentences ¹⁷ BY MR. ZELLERS: later, by stating, "prevent bodily tissues 18 All right. Have you read the 19 Consumer Product Safety Act, the Federal from becoming dehydrated." ²⁰ Hazardous Substances Act, or the Toxic 20 At least those words are the 21 Substances Control Act? ²¹ same words. Correct? A. I did go pull them up on the 22 A. I will take --²³ internet and took a look at them. I didn't 23 MS. O'DELL: Object to the form. 24 ²⁴ read them in total. A. I will have to take a look at

Page 106 Page 108 ¹ BY MR. ZELLERS: MS. O'DELL: Object to the form, 2 Q. You are not expressing an asked and answered. You may answer the 3 ³ opinion as to whether or not the fragrance question. ⁴ chemicals alone can either cause cancer or A. No, I did -- I wasn't asked to ⁵ increase the risk of cancer. Correct? consider that. MS. O'DELL: Object to the form. BY MR. ZELLERS: That's -- that's correct. Q. You are not rendering any opinion that fragrance chemicals plus talc BY MR. ZELLERS: cause ovarian cancer. Correct? You leave 9 Q. It also -- strike that. 10 that to other experts? You also are not expressing any ¹¹ opinion that the fragrance chemicals alone 11 That's correct. A. 12 can cause or increase the risk for ovarian You are not offering any Q. ¹³ cancer. Correct? ¹³ opinions about the inhalation exposure to 14 fragrance chemicals. Is that right? Α. That's correct. 15 15 Are you aware of any A. That's correct. Q. ¹⁶ epidemiology that substantiates the theory 16 O. You're not providing any that fragrance chemicals in talc can either opinions relating to asbestos. Correct? ¹⁸ cause cancer or increase the risk of cancer? 18 Α. That's correct. 19 MS. O'DELL: Object to the form. O. Your opinions in this matter, 20 Yeah. As I cited in my report, other than putting them in your report, have ²¹ there's a number of fragrance chemicals with you published on them? ²² demonstrated in vitro and in vivo studies 22 A. No. 23 that demonstrated a higher risk or, in fact, 23 Q. What methodology -- strike that. 24 ²⁴ in which cancer occurred. Why haven't you published on Page 107 Page 109 ¹ your opinions that you're expressing in this ¹ BY MR. ZELLERS: ² case? 2 Those studies you cite to --3 I signed a protective order. A. Yes. 4 This is all confidential information. -- are reference -- let me O. ⁵ finish. What methodology did you use in reaching your opinions in this case? 6 Those studies you cite to are A. I was given the list of referenced in your report. Is that right? ⁸ fragrance chemicals. I set about identifying A. Yes. For any individual plaintiff in them. The names of the chemicals were in the O. ¹⁰ this litigation, do you know what amount of ¹⁰ Thomas Dydek report. That often started by ¹¹ fragrance chemicals individual plaintiffs 11 just plugging that into Google or PubChem to ¹² were exposed to? 12 see what I could find. 13 13 After doing that, I would then MS. O'DELL: Object to the form. 14 try to identify a CAS number so I could 14 No. I do not. cross-reference it into various databases and ¹⁵ BY MR. ZELLERS: gather the physical and chemical properties, 16 Did you make any effort to as well as the safety profile, in vitro or in ¹⁷ discern any individual plaintiff's level of 18 vivo studies, and any published or known exposure? pharmacological properties. 19 No. I wasn't asked to consider 19 Α. 20 I would then go to IFRA and CIR ²⁰ that. 21 ²¹ websites and look at their -- the information Did you make any effort to ²² discern whether any individual plaintiff was 22 they had on it, the FDA website, in ²³ actually exposed to harmful levels of ²³ particular the Inactive Ingredient Database. ²⁴ fragrance chemicals? 24 I looked in some of the

Page 110

¹ journals, specifically Food and Chemical

- ² Toxicology, to see what the studies were. I
- ³ looked at the EFSA website, the European Food
- ⁴ Safety Authorities, you know, all the
- ⁵ different places that I've identified in my
- ⁶ report and gathered as much information as I

⁷ could on it.

8 Once Appendix A and Appendix B

- ⁹ were built, then I started classifying them.
- 10 How many of them are considered -- are
- 11 classified as irritants? Which ones are
- 12 allergens? Which ones are eye irritants?
- ¹³ And so forth.
- 14 I also looked at, you know, the
- ¹⁵ RTECS database, the Registry of Toxic Effects
- ¹⁶ of Chemical Substances, and so forth.
- 17 There's a tremendous amount of
- ¹⁸ work to identify some of these chemicals
- ¹⁹ because the names given to me, you know,
- ²⁰ aren't the standard chemical names. So there
- ²¹ was a significant effort just to try and
- ²² figure out what they were.
- Essentially what you have done
- ²⁴ in this case is to take the list of fragrance

¹ and to render your opinions.

I mean, there's books on how you

Page 112

- ³ formulate and the steps that you take to
- gather the information on the materials and
- ⁵ chemicals that you're going to use to create
- ⁶ a composition and how you go about doing
- ⁷ that. So I imagine that it's been published
- in one way or another.
 - Q. To your knowledge, the
- methodology that you have used in reviewing
- the information relating to fragrance
- chemicals and arriving at your opinions has
- not been subject to peer review. Correct?
 - MS. O'DELL: Object to the form.
- A. I'm not sure I understand your question. Look, these are chemicals. Okay?
- I mean, they happen to be fragrances, but
- they're really no different than a chemical
- used to make a food or a pharmaceutical.
- They're chemicals.
- When you're doing a safety
- assessment of them, there's a number of ways
- to collect and collate that information. I
- ²⁴ don't think that anything that I did is

Page 111

14

- ¹ chemicals or fragrance ingredients and then
- ² Google them or ChemPub them and go to
- ³ websites, FDA and IFRA and others, to catalog
- ⁴ or to list out information about the
- ⁵ fragrance chemicals. Is that right?
- MS. O'DELL: Object to the form. 6
- A. That's -- that's generally
- 8 correct. I also, you know, like I said,
- ⁹ looked at the technical literature. I mean,
- ¹⁰ it wasn't just websites, databases. I tried
- 11 to examine the totality of the evidence for
- ¹² each and every chemical and collate that into
- ¹³ a meaningful -- in a meaningful way to
- ¹⁴ examine their properties and to answer the
- questions that were posed to me.
- ¹⁶ BY MR. ZELLERS:
- 17 Do you know whether the
- methodology that you've used, whether that's
- 19 been published anywhere?
 - The methodology that I used to
- gather the information, whether --21
- 22 Q. Yes.

20

- 23 -- that's been published? A.
- 24 Used to gather the information

- Page 113 ¹ different than what a standard formulator
- ² would use in putting a product together for
- ³ examining the safety of a -- of a commercial
- ⁴ product.

12

13

20

24

- ⁵ BY MR. ZELLERS:
- Do you believe the standard for
- proving causation in the scientific
- literature is the same as the one that
- applies in litigation?
- 10 MS. O'DELL: Object to the form.
- 11 Are you talking about for a specific
 - disease or --
 - MR. ZELLERS: I'm just asking
- 14 the questions. If you can, just limit 15
- your objection to form. ¹⁶ BY MR. ZELLERS:
- 17 Q. So I'm asking you that question,
 - Doctor. If you can answer it, please do. If
- you can't, okay.
 - A. Could --
- 21 MS. O'DELL: I object to the
- 22 form of the question. It's vague. 23
 - It's unclear. But if you understand it, you may answer it.

Page 114 Page 116 A. I was going to ask him to repeat O. Any others? ² it, please. A. Yes. d-Limonene was found to ³ BY MR. ZELLERS: ³ be cytotoxic against Chinese hamster ovary ⁴ cells. I'm not sure how to pronounce the Q. Sure. Do you believe the ⁵ standard for proving causation in the ⁵ name of this author, but it's ⁶ scientific literature is the same as the one K-P-O-V-I-E-S-S-I, et al., from 2014. ⁷ that applies in litigation? What page of your report? O. 8 8 A. I'm not sure. Page 22. A. All right. Any other articles Are you aware of any publication O. 10 that links the fragrance chemicals in baby or publications that link the fragrance chemicals or a fragrance chemical that you 11 powder and Shower to Shower to ovarian 12 cancer? believe is in baby powder and Shower to 13 MS. O'DELL: Object to the form. ¹³ Shower to ovarian cancer? 14 14 A. I don't believe I found a source There's a bunch of them. Α. ¹⁵ that made that association. However, you ¹⁵ Page 22, Skatole, cytotoxic against Chinese 16 know, as I said earlier, a number of these ¹⁶ hamster ovary cells. That was in Reddy, 17 chemicals have demonstrated studies against 17 2002. 18 Chinese hamster ovary cells or in vivo animal 18 Q. Any others? 19 studies in which cancers in the ovaries were 19 Yes. As I just indicated, genotoxic No, I have not. materials do not -- are not thresholded. ²¹ BY MR. ZELLERS: 22 You identified a potential ²² They don't have a threshold. One molecule is ²³ hazard. Is that right? ²³ enough to cause an increased risk.

24

I was not asked to identify a

24

Non-genotoxic carcinogens do

Page 126 Page 128 ¹ because it couldn't be reproduced or the ¹ have the dose response relationship. ² study design is not consistent with You've not considered dose ³ response in this case. Correct? ³ established standard." A. I wasn't asked --So I certainly took those into 5 ⁵ consideration as well. So if it was a study MS. O'DELL: Excuse me. Object ⁶ that was not considered to be valid, I didn't 6 to the form, misstates his testimony. You may answer the question. ⁷ report it. 8 BY MR. ZELLERS: 8 BY MR. ZELLERS: Q. Go ahead. There is a difference between 10 Α. I was not asked to, and I was animal studies and human studies. Correct? 11 unable to based on the information that I was A. That's correct. 12 You can't just apply an animal given. 13 13 study or results of an animal study to a Q. Those fragrance chemicals that 14 you believe are capable of a genotoxic human study. Correct? MS. O'DELL: Object to the form. response, have you identified those in your 16 report? A. I don't know how to answer that 17 question. What do you mean by "apply"? First of all, I don't believe Α. ¹⁸ they are. I didn't to do the research. I'm BY MR. ZELLERS: 19 simply reporting what I found in the Q. I will withdraw the question. ²⁰ research. Those conclusions were drawn by 20 Do you agree that all substances ²¹ the authors of those studies. I'm simply can be potentially hazardous if the dose is ²² reporting that they were found to have valid too high? 23 ²³ genotoxic results. MS. O'DELL: Object to the form. What you did is you went out and I mean, that's sort of a Q. Page 127 Page 129 ¹ you were asked by counsel for plaintiffs to ¹ hypothetical. What if -- fairytale land. So ² catalog the information relating to these ² I suppose, if you have too much water, you ³ fragrance chemicals. Is that right? ³ could drown, or too much salt, that could MS. O'DELL: Object to the form. ⁴ cause problems. A. I reviewed the totality of the Generally speaking, poisons are, ⁶ you know, dose-and-exposure relationship. ⁶ evidence on the chemicals. ⁷ So, in that context, yes, most materials BY MR. ZELLERS: ⁸ could be hazardous if too much is consumed or Q. You then have reported that information in your report. Correct? if the exposure is too great. 10 MS. O'DELL: Object to the form. ¹⁰ BY MR. ZELLERS: 11 11 Yes. Q. Do you agree that for chemicals ¹² BY MR. ZELLERS: ¹² and substances there can be multiple routes 13 of exposure? Any genotoxic characteristic of ¹⁴ any of the fragrance chemicals would be set A. I'm not sure what you're asking ¹⁵ forth in the information you've collected in me. Yes, you know, you can inhale air and ¹⁶ your report. Fair? you can also have transdermal absorption. 17 17 MS. O'DELL: Object to the form. Q. You can also have ingestion. 18 A. Yeah. If I found a genotoxic 18 Correct? 19 result, I would report it unless, of 19 A. Yeah. 20 course -- and there were some instances --20 O. Those are all different routes ²¹ for example, the European Food Safety of exposure? 21 ²² Authority was actually quite good about 22 Yes. A. ²³ saying, you know, "This result was positive 23 Is that right? O. ²⁴ for genotoxicity, but we are dismissing it 24 I prefer to call them routes of

Page 35 of 96 Page 130 Page 132 ¹ administration, typically, is the ¹ genotoxic, one molecule is enough to cause an ² increase in risk associated with that ² nomenclature used. particular compound. Do you agree that if a person is ⁴ exposed to a substance by ingestion, they So there's general principles ⁵ will absorb a different amount of a substance ⁵ that a person of skill can look at, and they ⁶ than if the substance is applied to the skin, don't need to do a full risk assessment to ⁷ a dermal exposure? draw a conclusion as to its safety or risk associated with an exposure. So you're speaking in generalities, and it varies from substance to Your answer to my question ¹⁰ substance. The bioavailability is, I think, 10 relates to genotoxic materials. Correct? ¹¹ what you're referring to. So you may eat 11 All substances, in general. 12 12 something and only half of it is absorbed So it is not necessary, in order 13 into the body, a portion of it may be 13 to assess the risk of a substance, to do a 14 metabolized in the stomach or not absorbed at dose response assessment. Is that your ¹⁵ all. testimony? 16 16 It would have a different MS. O'DELL: Object -pharmacokinetic profile when absorbed through 17 A. No. I think --¹⁸ the skin, perhaps. So route of 18 MS. O'DELL: Excuse me. Object ¹⁹ administration does impact pharmacokinetics 19 to the form, misstates his testimony. ²⁰ and biological activity, including toxicology 20 Yeah, you're misstating what I ²¹ and pharmacology. ²¹ just said. I can read an MSDS and have a 22 ²² very good sense on how to handle a chemical Can the route of exposure have ²³ an impact on the amount of a substance that ²³ or a SafeBridge assessment or any number of ²⁴ is absorbed by the body? ²⁴ safety assessments. I don't need to do a Page 131 Page 133 ¹ risk analysis. That's already been done and A. ² published in the literature. O. Do you agree that it is not ³ scientifically valid to only identify a ³ BY MR. ZELLERS: ⁴ hazard and then try to formulate conclusions Someone, though, has to do -- as ⁵ about the risk of a particular contaminant ⁵ part of a risk assessment to understand the ⁶ without going through a full risk assessment? ⁶ risk of a particular, in this case, fragrance 7 ⁷ chemical, someone needs to do a dose response MS. O'DELL: Object to the form. Can you repeat the question? ⁸ assessment. Correct? BY MR. ZELLERS: MS. O'DELL: Object to the form. 10 Sure. Do you agree that in 10 A. Are you asking me how data ¹¹ order to have a scientifically valid opinion 11 inside an MSDS or a tox study is -- I mean, with respect to the risk of a particular I'm not sure what you're asking me. If 13 contaminant, it is important to go through a you're asking me how tox studies are done and 14 how safety information on chemicals is ¹⁴ full risk assessment? 15 created, they generally are done. I don't A. No. ¹⁶ need to do one to review the data available 16 MS. O'DELL: Object to the form. BY MR. ZELLERS: on something to understand the risk associated with that particular chemical. 18 Q. It's not necessary? 19 19 BY MR. ZELLERS: A. No. 20 It's not necessary to look at Q. My question is: Someone, in

²⁴ relationship. If it's been classified as

21 22

dose response in that relationship. Correct?

²³ materials do not live under a dose response

As I told you earlier, genotoxic

21 order to assess the risk of a particular

23 Correct?

A.

24

²² chemical, needs to do a risk assessment.

They can do -- certainly do

Page 36 of 96 Page 134 Page 136 ¹ that. I counted. The same way for baby powder. I counted based off of the The risk assessment, one element ³ or part of it, would be to do a dose response information disclosed. ⁴ assessment. Correct? In Dr. Dydek's report? Q. That is often done with new Yeah. A. ⁶ molecular entities and chemicals to establish MS. O'DELL: Object to the form. their safety profile. BY MR. ZELLERS: 8 Q. Another part of a risk Q. Does the list of fragrance assessment would be an exposure assessment. chemicals that you relied on indicate the amount of each chemical in baby powder? 10 Correct? 11 11 Yes. A. A. 12 12 There then would be a risk O. Does it indicate the amount of O. ¹³ characterization. Is that right? ¹³ each chemical in baby powder -- strike that. 14 MS. O'DELL: Object to the form. Withdraw. 15 Yes. Does it indicate the amount of A. ¹⁶ BY MR. ZELLERS: each chemical in Shower to Shower? 17 Q. All right. You have not done 17 A. No. ¹⁸ that analysis for the fragrance chemicals 18 O. What is the concentration of 19 identified in the talcum powder in this case. each of the fragrance chemicals that you have identified in a bottle of baby powder? ²⁰ Correct? 21 21 MS. O'DELL: Object to the form. MS. O'DELL: Objection. 22 A. No. I relied upon the available 22 I don't know. I wasn't provided ²³ information for the chemicals from, you know, that information. ²⁴ MSDS sheets and the published studies that Page 135 Page 137 ¹ did do those things. ¹ BY MR. ZELLERS: ² BY MR. ZELLERS: O. What is the concentration of In your report, you state that ³ each of the fragrance chemicals that you have ⁴ there are 141 fragrance chemicals in baby identified in a bottle of Shower to Shower? powder. Is that right? I don't know. I wasn't provided A. A. Yes. that information. 7 Q. Where did you get that number Can you tell me how much of each ⁸ fragrance chemical is in one ounce of baby 8 from? powder? I counted the ones that were 10 ¹⁰ disclosed to me in the Dydek report, and I Α. No, I cannot. 11 noted that some of those fragrances are 11 O. In one ounce of Shower to ¹² actually mixtures of chemicals themselves. 12 Shower? 13 So, for example, certain gums are actually --No, I can't. In part, it would ¹⁴ or resins are actually crude extracts that ¹⁴ have been nice to have seen where -- in ¹⁵ are actually a combination. And I think I industry standard content uniformity studies. 16 used the word "at least." ¹⁶ So the fragrance is blended with talcum 17 Q. You did not do any independent powder, and it's industry standard to take aliquots of the blend and test them to verify 18 testing of the baby powder to try to that they're uniformly and homogeneously ¹⁹ determine what fragrance chemicals were ²⁰ included in the powder. Correct? ²⁰ mixed, but that information wasn't made

In your report, you say there

²³ are 53 fragrance chemicals in Shower to

21

22

²⁴ Shower. Where did you get that number from?

No, I did not do any testing.

²³ information? I did.

²¹ available to me.

Q.

22

Did you ask counsel for that

Q. Did you do any independent

² testing to determine the concentration of the

³ fragrance chemicals?

A. No.

1

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

Q. In what other products are any

of these ingredients used? Are you --

A. I wasn't asked to consider that.

MS. O'DELL: Excuse me. Excuse
me. When you say "ingredients," you're
talking about the totality of all the
chemicals that are listed in his
report, or are you asking just

generally are there other products that they're used in?

MR. ZELLERS: Counsel, I'm more concerned if the witness doesn't understand the question than whether you understand the question. My question --

MS. O'DELL: I understand that, but I need to understand in order to object and make my record, so --

²³ BY MR. ZELLERS:

Q. My question is: Did you attempt

want to complete your answer, Doctor,

² you are welcome to do that.

A. Yeah. So it's disclosed in

⁴ my -- in my report. I reviewed the FDA's

⁵ Inactive Ingredient Database for each one of

Page 140

6 these chemicals, and on Page 43, Table 14

⁷ lists those chemicals that are listed on the

⁸ Inactive Ingredient Database.

Those chemicals listed for
 topical administration -- in other words, to

11 the skin -- and those chemicals that are

¹² listed for vaginal administration. According

¹³ to paragraph -- or Table 14 on Page 43,

¹⁴ benzyl alcohol present in baby powder is

 15 listed for vaginal administration. That's

¹⁶ the only one in baby powder.

In Shower to Shower, that information is in Table 23 on Page 61, the

same type of table with IID listed, topicaladministration and vaginal administration.

²¹ In Shower to Shower, propylene glycol and

22 t-butyl hydroquinone are the only two that

²³ are in approved products for vaginal

²⁴ administration.

¹ BY MR. ZELLERS:

Page 139

¹ to look or make a determination as to in what

² other products any of these fragrance

³ chemicals are used?

A. Yes, I did. I looked on the FDA
 Inactive Ingredients Database.

Q. Did you make a determination as to in what other products they are used vaginally?

⁹ A. Yes.

Q. Did you include that in your report?

¹² A. Yes.

Q. What fragrance chemicals did you identify that are used vaginally?

A. I'm going to have to go look at the report, because I don't have that committed to memory, but --

¹⁸ Q. Well, do you state it or set it ¹⁹ forth in the report?

A. Yes.

20

Q. Just tell me the page or where I can look for that notation.

MS. O'DELL: You -- you may tell him the page, certainly, but if you

Page 141

Q. Do you know when the list of

³ fragrance chemicals that you relied on from

⁴ Dr. Dydek's report was produced?

MS. O'DELL: Object to the form. A. Do I know when I received it?

Are you asking when I got it or --

8 BY MR. ZELLERS:

⁹ Q. My question is: Do you know for what period of time that list of fragrance ingredients was for?

MS. O'DELL: Object to the form.

A. I'm not sure I understand what vou're asking me.

15 BY MR. ZELLERS:

O. Sure.

¹⁷ A. Are you asking me do I know what ¹⁸ time period that fragrance composition was

⁹ used in those products?

Q. Let me try to ask a better question.

Do you know if the list of fragrance chemicals for the baby powder is the list of current fragrance ingredients?

Page 142 Page 144 1 A. No, I --¹ potential harm caused by the fragrance 2 ² chemicals in the products? MS. O'DELL: Objection --3 objection to form. You can answer. You know, I would have to review A. Yeah, I don't know with ⁴ those changes and take that into consideration. To be able to provide an ⁵ certainty. We did ask for the list of ⁶ open-ended answer without reviewing the ⁶ fragrance chemicals and all change control ⁷ documents associated with that composition. ⁷ underlying information and what those changes 8 So the presumption is that the information ⁸ were I think would be inappropriate. So I'd ⁹ that we were given is current. be happy to take that into consideration and 10 be given an opportunity to study it. As I was finishing this report, ¹¹ we were provided some information that showed Q. Let me ask you about your first 11 ¹² a few compositional changes over the years. opinion, and that is that several of the 13 For example, styrene, I believe, was removed 13 chemicals used in the J&J Consumer Products, ¹⁴ in, I think, 2014. ¹⁴ Inc., talc products are not in compliance 15 BY MR. ZELLERS: with governmental and industry standards. 16 Q. Do you know if the list of ¹⁶ That's your opinion. Is that right? ¹⁷ fragrance chemicals in Shower to Shower that 17 Correct. A. you relied on is the current list of 18 As part of that opinion, you ¹⁹ fragrance chemicals? identify 22 fragrance chemicals in baby 20 powder with a regulatory concern. Is that MS. O'DELL: Object to the form. A. Yeah, same answer. 21 right? 22 22 BY MR. ZELLERS: A. Yes. 23 Q. Do you know if the list of O. And 20 fragrance chemicals in ²⁴ fragrance chemicals for either baby powder or ²⁴ Shower to Shower with a regulatory concern. Page 143 Page 145 ¹ Shower to Shower has changed over time? ¹ Is that right? MS. O'DELL: Object to the form, A. Yes. 3 asked and answered. You define regulatory concern as A. I answered that. We were seven different categories on Page 18 of your ⁵ provided with one document that showed a report. Is that right? ⁶ history of changes, and it did show some A. Yes. ⁷ changes over time. O. Is regulatory concern a recognized term in the field of toxicology? ⁸ BY MR. ZELLERS: That is the only information you MS. O'DELL: Object to the form. 10 have in terms of how the composition of 10 A. I mean, toxicology and 11 regulations are two different things, so I ¹¹ fragrance chemicals has changed relating to ¹² either baby powder or Shower to Shower. Is think you're sort of confusing two very 13 that correct? ¹³ different subjects, so --14 A. Yes. 14 BY MR. ZELLERS: MS. O'DELL: Object to the form. 15 You're the one who is opining ¹⁶ that there is regulatory concern with regard ¹⁶ BY MR. ZELLERS: 17 Q. Do you know whether the to certain of the fragrance chemicals. ¹⁸ concentration of the fragrance chemicals has ¹⁸ Correct? changed over time for either baby powder or 19 So, yes, I am summarizing review Shower to Shower? ²⁰ of the compliance of these particular 21 ²¹ chemicals. And I'd just like to add that I A. I do not know. 22 If the list or concentration of ²² was provided with some documents where J&J ²³ did their own regulatory review of these ²³ the fragrance chemicals changed over time,

²⁴ would that impact your analysis regarding any

²⁴ chemicals, and the words they used were

Page 146 Page 148

- ¹ "regulatory concern." So I borrowed that --
- ² I don't think that's plagiarism, but I
- ³ borrowed the use of those two words to title
- ⁴ this section.
- ⁵ Q. In the couple of courses that
- ⁶ you took on toxicology, do you recall being
- ⁷ taught that regulatory concern is a
- 8 recognized term in that field?
- 9 MS. O'DELL: Object to the form.
- ¹⁰ A. You're confusing two completely ¹¹ different things.
- ¹² BY MR. ZELLERS:

13

24

12

- Q. Can you answer my question?
- ¹⁴ A. And I am answering. And, you ¹⁵ know, apples and oranges are both fruits, but
- they have different colors. Your question
- ¹⁷ doesn't make any sense at all.
- Regulations and toxicology are two different things.
- Q. Is regulatory concern a recognized term in the field of regulations?
- MS. O'DELL: Object to the form.
 A. I suppose you could ask the FDA.

- ¹ Table 6. Do you have Table 6 in front of ² you?
- ³ A. I do. Page 18 and 19 and 20.
 - Q. The column to the right,
- ⁵ regulatory concern -- in that column, you
- ⁶ list the reasons you believe the specific
- ⁷ chemicals you list constitute a regulatory
- ⁸ concern. Is that right?
- ⁹ A. Yes.
- Q. You did the same thing for
 - ¹ Shower to Shower in Table 15?
 - A. Yes.

12

13

14

20

- Q. Is that right?
- A. Yes.
- Q. The reasons that you include in
- ¹⁶ this column are the same seven categories
- that you include in your definition of
- ¹⁸ regulatory concern from Page 18 of your
- ⁹ report. Is that right?
 - A. Yes.
- Q. You only -- strike that.
 - In Table 6 and Table 15, you
- 23 only identify three specific statutory and/or
- ²⁴ regulatory sources in the regulatory concern

Page 147

¹ BY MR. ZELLERS:

- Q. You list all the fragrance
- ³ chemicals in baby powder that you believe
- ⁴ present a regulatory concern in Table 6 of
- ⁵ your report. Is that right?
- ⁶ A. Yes, as they've been defined
- ⁷ within the report.
- ⁸ Q. You list all the chemicals that
- ⁹ you believe present a regulatory concern
- 10 relating to Shower to Shower in Table 15 of
- 11 your report. Is that right?
 - A. I believe so, yes.
- Q. If a fragrance chemical is
- ¹⁴ included in Table 6 or Table 15, does that
- ¹⁵ mean it causes cancer?
- A. No. You know, again, you're
- ¹⁷ confusing regulations with toxicology. So
- ¹⁸ the first question relates to do regulatory
- ¹⁹ bodies, trade groups, say you can use these
- ²⁰ things. Okay? Those regulations are often
- ²¹ based on toxicology, but you seem to be
- ²² confused on how they're applied and how this
- ²³ information is to be understood.
- Q. Take a look, if you will, at

¹ column. Is that right?

MS. O'DELL: Object to the form.

Page 149

A. I'd have to go check that.

⁴ BY MR. ZELLERS:

- O. You list CFR Title 21, CIR,
- ⁶ which is Cosmetic Ingredient Review, and
- ⁷ IFRA, International Fragrance Association.
- 8 Is that right?
 - MS. O'DELL: Object to the form.
- A. I think, actually, there's four.
- 11 The Code of Federal Regulations, IFRA, CIR,
- and the EU Annex, which I think is from -- is
- 13 that from European Food Safety -- you know, I
- ¹⁴ didn't -- I didn't count it up. Like I said,
- didn't Talan't count it up. Like I said,
- ¹⁵ I tried to look at all the different sources,
- ¹⁶ and these were the primary regulatory bodies
- ⁷ that make (inaudible) --

18

- O. The other --
- THE REPORTER: I'm sorry. The
- regulatory bodies that?
- THE WITNESS: That make those regulations.
- 23 BY MR. ZELLERS:
 - Q. The other four categories of

potential regulatory concern that come from

² your report, Page 18, those are not listed as

³ reasons for regulatory concern in the table.

⁴ Is that right?

MS. O'DELL: Object to the form.

A. I'm sorry. I'm not sure I

7 follow your question.8 BY MR. ZELLERS:

⁹ Q. And let me ask a better ¹⁰ question.

The other four categories that you include in the regulatory concern column do not cite or reference any regulations or

¹⁴ databases. Is that right?

A. Well, for example, not permitted for cosmetic use. Copper chlorophyll, it is an approved colorant by FDA, but it's not

 $^{\mbox{\scriptsize 18}}$ allowed for use in cosmetics. So I didn't

19 cite to the specific source of that

²⁰ information here in this table, but if you go

²¹ to the Appendix A, you can click a hyperlink

and it will take you right to the citation inthe Code of Federal Regulations.

Q. What I'm trying to identify are

from 1 finish his answer.

12

16

17

18

² BY MR. ZELLERS:

Q. You can finish your answer, but
 I need you to just answer my questions or
 we'll be here forever.

Page 152

Page 153

My question simply was: Did you
use the Code of Federal Regulations? Finish
your answer, and then I'll ask another
question, but I want to try to move this

question, but I want to try to move this
 along.
 MS_O'DFLL: He's answering

MS. O'DELL: He's answering the question. Answer it fully.

A. I've got all day, so we -- we can be here as long as we need to.

MS O'DELL: We're going to

MS. O'DELL: We're going to be here for seven hours on the record, but keep -- you may answer his question.

A. So all these things are considered by a scientist when creating a

²⁰ product, and that includes looking at what

²¹ the government says is allowed to be used,

how it can be used, what kind of products it

23 can be used in, how much it can be used for

²⁴ which given route of administration. And

Page 151

¹ just the regulations or databases that you're

² relying on with respect to regulatory

³ concern. So, No. 1, you looked at Code of

 $^4\,$ Federal Regulations, Title 21. Is that

5 right?

A. Yeah.

Q. And one of the reasons that you
 list for various fragrance chemicals is that

⁹ the chemical is not listed in Code of Federal

¹⁰ Regulations, Title 21. Is that right?

A. That's right. And the reason for that is when formulation scientists,

¹³ whether they be a cosmetic chemist, a food

¹⁴ scientist, or a pharmaceutical scientist, is

going to create a product, use those that are
 approved. And one of the first places you

¹⁷ look is the Code of Federal Regulations on

18 how they can be used, what they can be used

19 in, and how much they can be used for a given

²⁰ route of administration. Now you start

²¹ looking at some of these other regulatory

bodies for specifications. So this --Doctor --

Q. Doctor --

MS. O'DELL: Excuse me. Let him

¹ then you go and start looking below that at

² the regulatory bodies in the world of

³ cosmetics. That includes CIR and IFRA -- or

⁴ the Food Chemicals Codex if it's something

⁵ used in foods, or the pharmacopeias, if

6 there's a standard for that.

So, you know, when I'm hired tohelp create a product, these are all things

⁹ that we consider when we build it.

MR. ZELLERS: Move to strike as nonresponsive.

BY MR. ZELLERS:

Q. To what section of CFR Title 21 are you referring to?

¹⁵ A. I'm sorry? You're asking me ¹⁶ which section?

Q. Yes. Which -- CFR Title 21 is big. Right?

A. Yeah.

19

Q. What section did you look at in terms of your analysis in this case in determining that the absence of a listing of a fragrance chemical in CFR Title 21 is a regulatory concern?

A. So if you go to the government's website, you can pull up Part 21 of the Code

of Federal Regulations, and you can type in

⁴ something and search for it. So I searched

⁵ for the whole thing.

Generally speaking, GRAS-listed
 chemicals are -- have a little monograph

8 there or a section or code. I looked in the

⁹ entirety of Title 21, which covers food,

¹⁰ drugs, and cosmetics.

Q. Do all fragrance chemicals in the United States need to be listed in Code of Federal Regulations, Title 21?

¹⁴ A. No.

MS. O'DELL: Object to the form.BY MR. ZELLERS:

Q. Why does not being listed in CFRTitle 21 present a regulatory concern?

A. It means the FDA has not reviewed the data on it.

Q. One way or the other. Correct?

²² A. Correct.

Q. Look at -- strike that.

You also identify as a

¹ ingredients may be excluded from evaluation

Page 156

Page 157

² by the CIR expert panel if their safety is

³ being determined by the Research Institute

⁴ for Fragrance Materials?

A. Yes.

Q. So the CIR may not even review

fragrance chemicals if RIFM - And REXPAN have don

A. And REXPAN have done that.

⁹ Q. Have done that. Is that right?

A. Yeah, that's correct.

Q. Why, then, is -- if a fragrance

12 chemical is not listed in CIR, why does that

³ present a regulatory concern?

A. Because some of the chemicals are not fragrances.

Q. Do you identify which chemicals are not fragrances in your report?

¹⁸ A. Yes.

14

Q. Take a look at IFRA. You list

²⁰ as an additional reason in Table 6 for

²¹ regulatory concern if there is no IFRA -- and

²² IFRA is International Fragrance Association.

23 Is that right?

MS. O'DELL: Object to the form.

Page 155

¹ regulatory concern if a fragrance chemical is

² not listed by CIR, the Cosmetic Ingredient

³ Review. Is that right?

⁴ A. Yes.

8

24

Q. Are you familiar with CIR's

⁶ review procedures?

A. I have read about them, yeah.

(Exhibit No. 17 marked)

⁹ BY MR. ZELLERS:

Q. Deposition Exhibit 17. Are

¹¹ these the Cosmetic Ingredient Review

² procedures that you reviewed in connection

¹³ with your analysis of this matter?

MS. O'DELL: Object to form.

¹⁵ A. I don't know.

¹⁶ BY MR. ZELLERS:

Q. Are you familiar with these

¹⁸ procedures?

A. I believe I've read a few

²⁰ articles that have been published about the

²¹ CIR QRA system and so forth, but I don't know

22 that I've reviewed this specific document, to

²³ be candid with you.

Q. Do you agree that fragrance

¹ A. International -- I have the name

² of IFRA in my report. I think you got it

³ right. International Fragrance -- is it

⁴ Research Association?

⁵ BY MR. ZELLERS:

Q. Well, whether it's International

⁷ Fragrance Research Association or

⁸ International Fragrance Association, we both

⁹ know what --

11

19

20

21

A. IFRA is, yes.

Q. -- IFRA is. Is that right?

A. I think -- I think we can agree

¹³ upon that, yeah.

Q. IFRA makes usage standards for

fragrance chemicals. Is that right?

A. I think they also make purity

¹⁷ standards as well.

Q. Is that a yes?

A. Yes. Sorry about that.

Q. It's okay.

(Exhibit No. 18 marked)

²² BY MR. ZELLERS:

Q. Deposition Exhibit 18.

²⁴ Deposition Exhibit 18, if you look at the

Page 160 Page 158 ¹ second paragraph, are those the standards for And if you need to read the document 2 he's referring to, feel free to do the IFRA expert panel? 3 MS. O'DELL: I just object to that. this exhibit to the degree it seems to A. It says -- reading Item No. 3, 5 be an incomplete copy of whatever is ⁵ it says, "if the safety assessment does not support the current use, the panel instructs being presented. BY MR. ZELLERS: ⁷ IFRA to issue a standard." 8 If you're asking me about that, The top of the document, ⁹ Exhibit 18, says, "about the standards then that's what it says. That's how they do ¹⁰ IFRA, International Fragrance Association," ¹¹ and at the bottom there's a citation to the 11 BY MR. ZELLERS: 12 ¹² IFRA website. Is that right? So in your report, when you list 13 A. Yes. 13 "No IFRA standard" next to an ingredient, 14 that actually means that IFRA has neither 14 MS. O'DELL: I stand on my restricted nor banned the chemical. Correct? 15 objection of the document itself. ¹⁶ BY MR. ZELLERS: Not necessarily. They have --17 ¹⁷ it appeared to me that they have published O. In order for IFRA -- let me ¹⁸ withdraw that. ¹⁸ standards on purity, providing specifications 19 and usage levels, regardless of whether it's To make usage standards, there ²⁰ is an independent expert panel that performs restricted or not. They all have -- all the fragrance chemicals that I examined have some a safety assessment for and as part of IFRA. ²² Correct? sort of usage level. 23 23 Q. Looking at Deposition A. Yeah, that's correct. 24 24 Exhibit 18 --Q. And if the safety assessment Page 159 Page 161 ¹ does not support the current use of the A. Yeah. ² chemical, the panel instructs IFRA to issue a O. -- this appears to be from the ³ standard either restricting or banning a ³ IFRA website. Correct? ⁴ material. Is that correct? Α. Yeah. 5 This describes how the expert A. That's what it says. Q. So that means that if the safety panel is used. Is that right? assessment does support the current use of a MS. O'DELL: Objection. ⁸ chemical, IFRA does not issue a standard. Yes. A. ⁹ Correct? BY MR. ZELLERS: 10 MS. O'DELL: Object to the form. 10 The expert panel is made up of renowned independent experts in the fields of 11 I'm sorry. Can you repeat the 12 question? dermatology, toxicology, pathology, and ¹³ BY MR. ZELLERS: environmental sciences. Is that right? 14 14 O. Sure. MS. O'DELL: Object to form. 15 15 That's what it says. A. It's a little confusing. A. We started this day today by my ¹⁶ BY MR. ZELLERS: 16 17 telling you not to answer a question you Q. Their role is to evaluate the ¹⁸ didn't understand. data on a fragrance ingredient to see if it 19 Yeah. supports the current use level to make sure A. 20 ²⁰ that there are no risks for the consumer. In Do you agree that if the safety ²¹ assessment by the expert panel supports the cases where the safety assessment does not ²² current use of a chemical, IFRA does not ²² support the current use, the panel then ²³ instructs IFRA to issue a standard either ²³ issue a standard? Correct?

MS. O'DELL: Object to the form.

24

²⁴ restricting or banning a material. Did I

Page 164 Page 162 ¹ read that correctly? ¹ conjunction with other materials. Is that ² right? 2 A. I believe so. And that is your understanding Α. Yes. Q. ⁴ of how the expert panel is used with respect Q. So P means chemicals should not to the IFRA standards. be used as a fragrance ingredient. Correct? A. That's --A. Yes. 7 7 R means that IFRA has set a O. Is that correct? O. 8 8 limit as to how much of an ingredient should Yes. A. be used. Is that right? I'm going to ask you about some 10 of the chemicals that you identify in A. Yes. Tables 6 and 15 as a regulatory concern. 11 Q. Turn to 163, which is on Page 9 12 of Deposition Exhibit 19. Do you see that? No. 1, balsam Peru. Do you see 13 that? No. There's ten pages here, and 14 they're numbered 1 through 10. A. Yes. 15 15 Myroxylon pereirae oil, or O. Go to Page 9. Q. 16 ¹⁶ balsam Peru, was on a list of ingredients Oh. Okay. A. that you reviewed. Is that right? 17 Entry 163 lists Peru balsam O. 18 A. Yes. crude as prohibited. Is that right? 19 A. Yes. O. That is one of the ingredient --²⁰ one of the ingredients that you say is not in 20 The next line, Entry 164, it Q. ²¹ regulatory compliance. Is that right? lists Peru balsam extracts and distillates as Α. Yes. restricted. Is that right? 23 23 Q. You claim that IFRA prohibits A. Yes. 24 ²⁴ its use as a fragrance. Is that right? Restricted means that IFRA has O. Page 163 Page 165 ¹ set a level for safe use. Correct? 1 Α. That's what I found. O. Take a look at the Index of IFRA Restricted means the material ³ should be limited quantitatively. That's the ³ Standards, which we will mark as Deposition ⁴ argument. You've read that to me, and that's ⁴ Exhibit 19. ⁵ right there on your own document. 5 (Exhibit No. 19 marked) Exactly. So there is a limit in ⁶ BY MR. ZELLERS: ⁷ terms of what a level would be for safe use. Are you familiar, generally, with these standards? Correct? 9 You're adding words to the Α. Yes. Α. 10 O. The IFRA recommendations are definition of what R means. It says, "The grouped into three categories; P for use of the material should be limited prohibited, R for restricted, and S for quantitatively." I don't hear the words or specified. Is that right? 13 see the words "safe use" there. So you're 13 14 A. Yes. ¹⁴ mischaracterizing what R means. 15 Prohibited is material should 15 R means that up to a certain O. limit, it is acceptable to use the chemical ¹⁶ not be used as a fragrance ingredient. Is that right? according to IFRA? 18 18 A. That's what it says, yes. Α. That's correct. 19 R, the use of the material All right. Do you agree or do Q. you know if balsam Peru oil refers to the should be limited quantitatively? 21 21 extract or distillate? Yes. A. S for specified, the material 22 MS. O'DELL: Object to the form. 23 should only be used if it meets certain ²³ BY MR. ZELLERS: ²⁴ purity criteria or if it is used in 24 And let me withdraw that. Let

Page 168 Page 166 ¹ me ask a better question. A. Yes. Balsam Peru oil refers to the Q. The ingredient that you ³ extract or distillate. Is that right? reference in your report is Myroxylon They both have the same CAS pereirae oil or balsam Peru oil. Correct? ⁵ number. Interesting. I want to go to my Α. Yep. ⁶ report and look and see what I wrote, if you That is listed by IFRA in its O. ⁷ don't mind, and that's going to take me a standards as a Peru balsam extract and 8 moment to get there. Let me pull it up on distillate. Is that right? ⁹ the computer. That would be faster. A. Yes. Well, here. I can help you, I 10 10 O. If we look at the IFRA standard, 11 think. Let me give you a document, and if Exhibit 19, and we go back to Page 9 of 10, you need to look at something else, you can Entry 164, Peru balsam extract and distillate 13 look at something else. 13 is a restricted but not prohibited item. Is 14 that right? MS. O'DELL: Yeah. Feel free to 15 15 A. That's what it says. keep --16 16 You do not know the level or THE WITNESS: I'm going to, O. 17 amount or concentration of Peru balsam veah. 18 MS. O'DELL: Keep reviewing what extract and distillate in the baby powder or 19 you'd like to review. Shower to Shower powder. Is that correct? 20 20 I will tell you what I relied I do not --Α. 21 ²¹ upon. MS. O'DELL: Object to the form. 22 ²² BY MR. ZELLERS: I do not know the amount. Α. Q. Well, my question isn't what you BY MR. ZELLERS: Take a look at Table 6. You ²⁴ relied upon. My question is: Do you agree O. Page 167 Page 169 ¹ list a fragrance chemical benzene, ethenyl-. ¹ that the substance that the fragrance ² chemical that you identified is not A. Uh-huh. ³ prohibited by IFRA? Q. Is that "yes"? MS. O'DELL: Object to the form. Yes. A. ⁵ BY MR. ZELLERS: You claim in your report, Q. ⁶ Table 6, that benzene, ethenyl- is not 6 And I think I can make it easy Q. permitted for flavor or fragrance use. Is ⁷ for you. that right? So the source I relied upon said ⁹ both resins, essential oils, and that was Α. That's correct. ¹⁰ TSCA. 10 Q. What is that opinion based on? 11 11 FDA recently delisted it. (Exhibit No. 20 marked) A. ¹² BY MR. ZELLERS: Isn't it true the FDA only removed it from its list of approved 13 Deposition Exhibit 20 -flavorings because companies stopped using it 14 MS. O'DELL: Are you referring 15 to a particular page in your report? as a flavoring, but it is not banned as a A. It's on Page 152. ¹⁶ fragrance? 16 17 BY MR. ZELLERS: MS. O'DELL: Object to the form. 18 Deposition Exhibit 20 is the A. To the best of my knowledge -- I 19 IFRA standard -mean, I read the same, probably, report that you did when FDA removed it. I don't believe 20 And that is -- I did look at A. ²¹ that it's allowed to be used as a fragrance. ²¹ that, yeah. 22 I also want to go back to the Deposition Exhibit 20 is the ²³ IFRA standard for Peru balsam extracts and ²³ Peru balsam. I pulled up the IFRA standard

²⁴ distillates. Is that right?

²⁴ that I looked at, and it was described as

Page 172 Page 170 ¹ Peru balsam crude, is listed as prohibited, ¹ crude is the same exact CAS number as the ² and the synonyms are the same my -- how do ² oil. Do you see that? So do you now ³ you say it? Myroxylon pereirae? ³ understand how I drew my conclusion? ⁴ BY MR. ZELLERS: ⁴ BY MR. ZELLERS: That's absolutely not true, is Q. I'm not -- yes. I'm not -- all 6 it? ⁶ I care about is that we now have clarified 7 I'm looking at it right here. ⁷ that the fragrance chemical in the baby A. All right. Then let's mark as powder and Shower to Shower powder is the 8 O. Deposition Exhibit --Peru balsam extract and distillate. Correct? 10 A. It's from the 42nd amendment. MS. O'DELL: Object to the form. 11 And it's your testimony under I'll take your word for it. 11 ¹² oath that Peru balsam crude is the same as 12 BY MR. ZELLERS: ¹³ Myroxylon pereirae oil? Is that your 13 O. There is a --14 testimony under oath? 14 MS. O'DELL: Object to the form. No. That's what I'm telling you BY MR. ZELLERS: ¹⁶ I drew the conclusion from. I relied upon Q. There is a separate substance, 17 which is the Peru balsam crude, which is that. 18 And what you know is that Peru described in IFRA standard that we've marked as Exhibit 21, and that is the prohibited 19 balsam crude is not the ingredient that is in the baby powder or Shower to Shower powder. substance. Correct? Yeah, and they're both listed ²¹ Correct? 22 MS. O'DELL: Object to the form. ²² Myroxylon pereirae Klotsch. I mean, those ²³ three words appear on both. They have the A. I don't know that. 23 24 ²⁴ same CAS number. So if what is being used in Page 171 Page 173 ¹ BY MR. ZELLERS: ¹ the baby powder is the restricted material ² instead of the prohibited material, then I'll Q. Let me help you. Let me -- and let me point you ³ be happy to update my report. ⁴ to what I'm looking at, because it also Take a look, then -- so let's go ⁵ describes it exactly as it was described in back to my question about benzene, ethenylfrom your report at Table 6, Page 18, and ⁶ what I was given, and it says it's ⁷ prohibited. Balsam oil Peru -- balsam Peru, specifically look at Exhibit --⁸ Myroxylon pereirae balsam Peru oil. MS. O'DELL: Would you mind just (Exhibit No. 21 marked) 9 saying that chemical again, because I 10 ¹⁰ BY MR. ZELLERS: missed it? 11 Q. Okay. Deposition Exhibit 21 is MR. ZELLERS: Sure. Benzene, the IFRA standard for Peru balsam crude. Is 12 ethenyl-, E-T-H-Y --13 13 that right? MS. O'DELL: I got it. 14 14 A. Yes. MR. ZELLERS: -- or maybe 15 15 Peru balsam crude is -- they E-N-Y-L. give a synonym of exudation of Myroxylon 16 MS. O'DELL: Thank you. 17 pereirae Klotsch. Is that right? (Exhibit No. 22 marked) 18 A. Yeah, that's what it says right 18 BY MR. ZELLERS: ¹⁹ there. 19 Deposition Exhibit 22, this is 20 Exudation is different than a the FDA's announcement as to the reason that O. extract and distillate. Correct? it was removing benzene, ethenyl- from its 22 MS. O'DELL: Object to the form. list of food additives. Is that right? 23 Yeah, so let me just point one 23 That's what it says, yeah. A.

24

Q.

If you --

²⁴ thing out to you. The CAS number of the

Why don't we call it styrene. ² It's a little bit easier to pronounce.

If we go to the second page of ⁴ Exhibit 22, the first paragraph, the reason

⁵ the FDA gives for removing styrene as a food

⁶ additive is, "In response to a separate food

⁷ additive petition from the Styrene

⁸ Information and Research Center, the FDA is

⁹ granting the petition by amending its food

¹⁰ additive regulations to no longer allow for

¹¹ the use of styrene as a synthetic flavoring

¹² substance and adjuvant because industry has

¹³ abandoned this use."

14 Is that right?

15 I believe that you faithfully A. ¹⁶ read that.

17 Q. Okay. This statement says

nothing about banning its use as a fragrance.

Is that right?

20 That's correct. A.

21 All right. Take a look at your O.

²² report and your reference to diethyl

²³ phthalate. You identified that as a

²⁴ fragrance chemical with a regulatory concern.

Page 175

¹ Is that right? And I'm looking at Pages 46

² and 47 of your report, Table 15.

It's not a fragrance chemical.

⁴ Yeah, it's listed there.

Q. Diethyl phthalate is not a

⁶ fragrance. Is that right?

7 Α. That's correct.

Q. For that reason, there is no

⁹ IFRA standard. Is that right?

10 That would probably be why the

11 IFRA folks wouldn't create a standard for it. All right. Diethyl phthalate is 12

13 listed on the IFRA transparency list. Is

that right?

8

24

15 A. I am not sure. I'd have to

¹⁶ check that.

17 Q. Do you agree that each fragrance

¹⁸ ingredient that is included on the

¹⁹ transparency list is included in the RIFM

safety assessment program?

21 MS. O'DELL: Object to form.

22 A. I'm sorry. Repeat the question.

²³ BY MR. ZELLERS:

Sure. Do you agree that each

¹ fragrance ingredient that is included on the

² transparency list is included in the RIFM

³ safety assessment program?

A. I haven't --

MS. O'DELL: Object to form.

A. Yeah. I haven't examined the

transparency list and checked to see if RIFM

has done a safety assessment on it. So I

cannot opine or answer your question.

¹⁰ BY MR. ZELLERS:

11 Q. If RIFM has done a safety

assessment on diethyl phthalate, then it ¹³ would be a fragrance. Correct?

MS. O'DELL: Object to the form.

15 A. No.

14

17

23

1

5

8

19

¹⁶ BY MR. ZELLERS:

O. Does RIFM -- well, let me

withdraw that.

You list as a reference an

²⁰ article on the genotoxicity of phthalate

²¹ esters. Is that right?

22 A. Which one are you referring to?

The Al-Saleh, A-L, hyphen, Q.

²⁴ S-A-L-E-H article.

Page 177

Page 176

MS. O'DELL: Are you referring

2 to a particular page in the report? 3

MR. ZELLERS: I will. Yeah,

4 Page 66.

MS. O'DELL: Okay. Thank you.

6 Page 66 in the report?

7 THE WITNESS: Yes. It's the

first reference.

MS. O'DELL: Okay.

10 BY MR. ZELLERS:

Q. You're generally familiar with 11

the paper. Correct?

13 Yeah. I read -- read and A.

¹⁴ reviewed it.

15 (Exhibit No. 23 marked)

Q. Take a look -- is Deposition 16

Exhibit 23 that article that you reference in

your report.

A. I believe so. Yeah.

20 Look at the first page in the

²¹ left column under introduction. Do you see

22 at the very bottom, the last full sentence,

²³ "PAEs, most commonly diethyl phthalate (DEP),

²⁴ are also used as solvents and fixatives in

11 12

13 14

15

16

17

So you've asked him a question. It's pending. He's going to respond to it.

MR. ZELLERS: And he needs to respond to it. That's my question.

MS. O'DELL: You may not like his response, but he's free to respond

18 to it. so --19 RTECS demonstrate -- you know, stated -- not me, RTECS -- "Diethyl esters can cause reproductive and developmental ²² toxicity. The NTP program found that in ²³ cultured Chinese hamster ovary cells, both ²⁴ diethyl phthalate and dimethyl phthalate

¹ a clear record, you are referencing animal ² studies. Correct?

A. Yeah.

My question is: Are you aware of any human studies that demonstrate or provide data that diethyl phthalate causes ovarian cancer in humans?

No, I'm not. And, you know, as I was saying, there's also not any studies demonstrating the safety in vaginal administration.

12 Let me ask you about a couple 13 more, and then we'll take a break.

> A. Okav.

14

15

16

Citrus Medica Limonum, Pages 18 Q. and 19, Table 6. Do you see that?

17 A. There's Citrus Medica Limonum, 18 lemon peel oil, yeah.

19 Yes. And you list that as a ²⁰ fragrance with a regulatory concern. Is that 21 right?

22 A. Yes.

23 You also list this as a O.

²⁴ fragrance chemical as one with IFRA critical

Page 186 Page 188 ¹ effects. Is that right? ¹ BY MR. ZELLERS: MS. O'DELL: Object to the form. Therefore, the absence of an ³ BY MR. ZELLERS: ³ evaluation by CIR, that fact that there is Q. On Page 11 -- I'm sorry. ⁴ not an evaluation by CIR, is not a regulatory concern in and of itself. Correct? ⁵ Page 37, Table 11. A. Yeah, phototoxicity. MS. O'DELL: Object to the form. 7 Citrus Medica Limonum is lemon A. That's a generalization. So Q. peel oil. Is that right? diethyl phthalate, again, not a fragrance, 9 Yes, that's my understanding. there is a CIR on it. Right? Okay. You A. 10 Citrus Medica Limonum is listed just pointed to the balsam Peru. That's a O. ¹¹ on the IFRA transparency list. Correct? ¹¹ fragrance. Did CIR have something to say 12 I would have to check it. 12 about that? Α. 13 O. We discussed before that CIR So the absence of something from ¹⁴ does not evaluate fragrances. Is that right? ¹⁴ CIR doesn't mean that, you know -- I forgot 15 MS. O'DELL: Object to the form. 15 how you asked your question. 16 BY MR. ZELLERS: They do in some cases, but they don't always. That's my understanding. 17 That's all right. The absence ¹⁸ BY MR. ZELLERS: may or may not be a regulatory concern? Can 19 Q. Would you agree that the absence we agree on that? of an evaluation by CIR is not a regulatory 20 A. I guess it depends on who --21 21 concern? MS. O'DELL: Objection; form. 22 A. So, I mean, let's be clear about -- on whose product it is. A. 23 this. When companies engage me to help them BY MR. ZELLERS: ²⁴ build products, they don't want me to take Why would phototoxicity have O. Page 189 Page 187 ¹ any unnecessary risks. Right? ¹ anything to do with peroneal exposure? So, ideally, you use excipients Well, I personally don't sun ³ and active ingredients that are listed by the ³ bathe in the nude, but I suppose some people ⁴ FDA, have a CIR monograph or safety study, ⁴ do. But sunlight can enter through windows. ⁵ you know, are listed in the Food Chemical ⁵ I get your point, taken. ⁶ Codex, have a full -- published in a MS. O'DELL: Hey, Mike, we've 7 peer-reviewed journal safety study. been going about -- Michael, excuse So more often than not, the 8 me -- we've been going about an hour generally-accepted standard is to go use 9 and 45 minutes, which I think is 10 ¹⁰ chemicals that meet all those criteria. So gracious of --11 ¹¹ there's risk associated with using things MR. ZELLERS: If you could give ¹² that don't. 12 me five minutes. I just have one -- I 13 13 mean, and if you have to take a break MR. ZELLERS: Move to strike as 14 nonresponsive. now, then okay. 15 MS. O'DELL: I just don't want 15 BY MR. ZELLERS: 16 to continue this on -- it's quite a 16 Try, if you can, to answer my O. 17 question. long time we've been going. If you've 18 18 CIR, the Cosmetic Ingredient got five minutes, please finish. 19 ¹⁹ Review, does not evaluate fragrances. MR. ZELLERS: Yeah, let's try to 20 ²⁰ Correct? finish this section and decide what 21 21 MS. O'DELL: Object to the form, we're going to do. 22 22 MS. O'DELL: But 12:45, an hour asked and answered. 23 23 A. Yeah. I answered that and 45 minutes in, it's quite a long 24 previously and said not always. time.

Page 190 Page 192 1 1 THE VIDEOGRAPHER: Going off the MR. ZELLERS: Understood. 2 ² BY MR. ZELLERS: record, the time is 12:47 p.m. 3 Methyl Hydrogenated Rosinate, (Recess from 12:47 p.m. to ⁴ you list that as a fragrance chemical with a 1:55 p.m.) regulatory concern. Is that right? THE VIDEOGRAPHER: This marks It's not a fragrance chemical. 6 A. the beginning of Disc 3. Back on the record, the time is 1:55 p.m. ⁷ It's a chemical. BY MR. ZELLERS: So it's your opinion that Methyl ⁹ Hydrogenated Rosinate is not a fragrance. Is Dr. Crowley, your second opinion ¹⁰ is that the fragrance chemicals in baby 10 that right? 11 11 powder and Shower to Shower contribute to the A. That's correct. 12 12 inflammatory properties, toxicity, and Would you agree that Methyl O. 13 Hydrogenated Rosinate is listed on the IFRA potential carcinogenicity of these products. 14 Is that right? transparency list? 15 15 I would have to check. A. Yes. Α. 16 16 Q. Do you agree that each fragrance In your report, you state that ingredient that is included on the IFRA 35 of the fragrance chemicals in baby powder transparency list is included in the RIFM have a safety/toxicology concern. Correct? 19 safety assessment program? A. 35? 20 MS. O'DELL: Object to form. 20 Yes. Page 11. Q. A. I think you asked that of me --21 A. 34. ²² BY MR. ZELLERS: O. And 12 of the fragrance 23 ²³ chemicals in Shower to Shower have a Q. I did of another chemical --²⁴ another ingredient. safety/toxicology concern. Is that right? Page 191 Page 193 Right. I'm sorry. I thought it A. Yes. ² was open-ended. You know, like I said, I Q. You define safety/toxicology ³ haven't done that cross-reference, so I would ³ concern as any fragrance chemical that is ⁴ listed on the Registry of Toxic Effects of ⁴ have to check that. ⁵ Chemical Substances, or the RTECS list, or And the same set of questions ⁶ has safety in use concerns. Is that right? ⁶ with respect to the CIR not evaluating MS. O'DELL: Object to the form. ⁷ fragrances and not having an evaluation by ⁸ CIR is not a regulatory concern, you'd give A. I think I've got a little bit ⁹ me all the same answers again? broader definition than that. It's really I 10 considered the totality of the evidence, so Pretty much, yeah. 11 ¹¹ certainly RTECS or other toxic, you know, MS. O'DELL: Object to the form. 12 reports from the literature. 12 It depends on who is willing to A. 13 BY MR. ZELLERS: ¹³ take on that risk. ¹⁴ BY MR. ZELLERS: Q. You list the fragrance chemicals 15 Last question. Not having an ¹⁵ in baby powder, Table 7, that you believe ¹⁶ IFRA standard means that IFRA has neither ¹⁶ have a safety/toxicology concern. Is that 17 restricted nor banned the chemical. Correct? right? 18 MS. O'DELL: Object to the form. 18 Well. I don't believe -- I'm 19 A. Well, it could also mean they 19 reporting work that someone else has done. 20 ²⁰ haven't done one, that they haven't done a O. Right.

21

22

Right.

A.

Golkow Litigation Services

MR. ZELLERS: Let's take a

safety assessment.

break.

21

22

23

As we established earlier, you

²⁴ analysis. You've gone out and you've googled

personally did not do the review and

Page 51 of 96 Page 194 Page 196 ¹ it or you've PubChem'd it to collect that 1 That's a different question than you 2 ² information? asked before. You're welcome to answer 3 Yeah. Α. MS. O'DELL: Object to the form. A. Not in humans, but we have 5 Misstates his methodology. in vitro studies and animal studies. I gathered the information from BY MR. ZELLERS: ⁷ a number of sources. Q. Is there any epidemiology substantiating the theory that any of the BY MR. ZELLERS: fragrance chemicals used in baby powder or Is safety/toxicology concern a ¹⁰ recognized term in the field of toxicology? Shower to Shower cause cancer in humans? A. I mean, it's a term of art, I 11 MS. O'DELL: Object to the form. 12 ¹² think, that, you know, adequately describes A. I think that's the same question ¹³ what I was asked to do. 13 you just asked, so it's the same answer. 14 BY MR. ZELLERS: Q. I asked you earlier what ¹⁵ methodology you followed. The methodology O. No. Correct? ¹⁶ you followed for your second opinion is the MS. O'DELL: Object to the form. ¹⁷ methodology you described for us earlier. 17 A. No, that's not my answer. Not ¹⁸ Correct? ¹⁸ in humans. There are animal and in vitro 19 A. ¹⁹ studies. Yes. 20 ²⁰ BY MR. ZELLERS: You are not rendering an opinion Q. 21 that if a fragrance chemical is included in Q. You are not aware of any ²² epidemiologic studies that establish that any ²² either Table 7 or Table 16 of your report, ²³ of the fragrance ingredients that you've ²³ that that means it causes cancer in humans. ²⁴ Correct? ²⁴ listed out cause cancer in humans. Correct? Page 197 Page 195 MS. O'DELL: Object to the form. MS. O'DELL: Object to the form. That's not necessarily true. And if you need to, you're welcome to ³ BY MR. ZELLERS: look at the real-time if you need to 4 look at the question. That's not --Ο. I mean, this isn't a yes or no Okay. So that was -- your last ⁶ question. As I understand your question, a question was not specific to ovarian cancer. ⁷ number of these chemicals have validated You said cancer in humans. So I'd like to ⁸ studies that they are carcinogens. answer that. What epidemiologic studies in Four chemicals in the baby 10 humans substantiate the theory that the powder have been identified by the ¹¹ fragrance chemicals included in Table 7 and ¹¹ International Agency for Research on Cancer as potential carcinogens. Benzene, ethenyl-, ¹² Table 16 cause ovarian cancer? ¹³ also known as styrene, has been implicated as A. Well, I read to you some studies ¹⁴ previously. You just rephrased your question a reproductive toxicant, neurotoxicant, and ¹⁵ to human studies and ovarian cancer. You has been demonstrated to be a carcinogen both ¹⁶ know, your question prior to that was not ¹⁶ in vivo and in vitro. ¹⁷ specific to ovarian. It was just cancer. BY MR. ZELLERS: ¹⁸ Limonene is an IARC potential carcinogen. Is that a human study? 18

19 You know, we've talked about styrene. And I'm sorry to interrupt you. 21 My question is: Are you aware of any ²² epidemiologic studies that associate those ²³ fragrances to ovarian cancer in humans? 24 MS. O'DELL: Object to the form. 19 I would have to check the underlying studies. 21 The National Toxicology Program ²² considers styrene to be reasonably ²³ anticipated to be a human carcinogen. EPA ²⁴ considers para-Cresol to be possibly

Page 198 Page 200

¹ carcinogenic.

IARC has also stated that
 coumarin, eugenol, and d-Limonene are not
 classifiable as to their carcinogenicity.

Q. We --

6 A. The --

5

Q. And I'm sorry. You're referring
to IARC and to its various analyses. Is that
correct?

10 A. That's correct.

Q. And I'm going to ask you about that in a bit.

¹³ A. Okay.

O. All right.

A. And I haven't answered your question with respect to Shower to Shower,

but there's also similar verbiage, as you're

¹⁸ well aware, with respect to Shower to Shower.

The chemicals there include benzophenone, which is an IARC Group 2B, coumarin and

²¹ eugenol are not classifiable, and musk ketone

²² has been suspected of being a carcinogen. It

²³ has been classified as a Category 3

²⁴ carcinogen by SCHER, which is the European

¹ products present a health risk for women that

² use the products? And by "products," I'm

³ including baby powder and Shower to Shower.

4 Is that right?

A. Yeah. I believe that peroneal application of the talc products is

associated with a higher risk of cancer.

O. You have --

A. And I believe that the fragrance
 chemicals, as they are so called by Johnson &
 Johnson -- that's not my choice of words, but

they're chemicals -- contribute to that.
 O. You have not done a full human

14 health risk assessment, correct, as we

¹⁵ discussed earlier today?

A. I --

17

MS. O'DELL: Object to form.

8 A. I was unable to do a risk

assessment because I was never provided with

²⁰ the composition of the fragrances. So, in

 21 order to do that, you need that information.

²² It was asked for, and it was never provided.

23 BY MR. ZELLERS:

Q. You have not been able to do a

Page 199

¹ folks.

Q. To be clear -- and I understand
this is a different question, but there are
no epidemiologic studies which substantiate
the theory that the fragrance chemicals that
you include in either Table 7 or Table 16
cause or increase the risk of ovarian cancer
in humans. Correct?

MS. O'DELL: Object to form.

A. I would have to check that, but, you know, I wasn't asked to consider that, so --

13 BY MR. ZELLERS:

Q. At least as you sit here, you are not aware of any. Correct?

A. I am not aware of an

¹⁷ epidemiological study substantiating the

¹⁸ causation of ovarian cancer from the

19 so-called fragrance chemicals. Let's just

call them chemicals, because not all of themare fragrances.

²² Q. You believe that the use of the ²³ chemicals, including fragrance chemicals,

²⁴ that you've listed in Tables 7 and 16 in the

¹ dose response analysis. Correct?

MS. O'DELL: Object to the form.

Page 201

A. Again, I couldn't do it because

⁴ I didn't have the information from J&J, I

⁵ suppose, to enable doing that.

⁶ BY MR. ZELLERS:

O. What dose of the chemicals

⁸ listed in Table 7 and 16 does a woman receive

⁹ from one application of baby powder in her

¹⁰ peroneal region?

16

17

23

24

11 A. It's unknown to me. That

² information was requested and not provided.

Q. If I asked you what dose there would be for two applications or five or any number, it --

A. I couldn't answer.

MS. O'DELL: Object to the form.

BY MR. ZELLERS:

Q. Do you have any information or are you able to tell me the cumulative dose that a woman would receive if she used baby powder once a day for a year?

MS. O'DELL: Object to the form.

A. I don't have the information to

Page 202 Page 204 ¹ make that judgment. ¹ human health if the ingredient represents ² BY MR. ZELLERS: ² less than 0.1 percent of the total product ³ other than the genotoxicity issue we talked Q. If she used it once a day for ⁴ five years or ten years? ⁴ about earlier? MS. O'DELL: Object to the form. MS. O'DELL: Object to the form. Same answer. A. Okay. So, as we talked about earlier, genotoxins don't have a threshold. BY MR. ZELLERS: Right? They are -- I'd have to go look at 8 Q. Are you familiar with the ⁹ standards released by the Globally Harmonized other known carcinogens and what the -- what ¹⁰ System of Classification and Labeling of 10 the -- that are thresholded to answer that ¹¹ Chemicals, or GHS? ¹¹ question. So it's so open-ended, I couldn't 12 answer without reviewing the literature. Α. Yes. 13 Q. 13 BY MR. ZELLERS: You rely on the GHS standards in your report. Is that right? 14 One of -- strike that. O. 15 15 Yes. We talked about exposure and A. 16 It's true, is it not, that for exposure assessments earlier today. Is that Q. carcinogens, the GHS does not require a 17 right? hazard statement regarding an ingredient if 18 A. Yes. 19 that ingredient makes up less than 19 O. You've not done an exposure 0.1 percent of the entire product? assessment in this case. Right? 21 MS. O'DELL: Object to form. 21 Right. I couldn't because I A. 22 I'd have to check the GHS didn't have the information. 23 standards on that. Q. Have you ever evaluated a 24 ²⁴ vaginal product? Page 203 Page 205 A. I've developed vaginal products. ¹ BY MR. ZELLERS: ² There's a product called Crinone. It's Q. Take a look at Deposition ³ commercially available. It's a vaginal cream ³ Exhibit 24. ⁴ containing progesterone. It's administered (Exhibit No. 24 marked) ⁵ BY MR. ZELLERS: ⁵ to women to prevent them from going into O. Exhibit 24 are the GHS standards preterm labor. ⁷ of classification and labeling of chemicals. I've also developed vaginal bacteria -- vaginosis and fungal vaginosis Is that right? It's labeled GHS Info Sheet products. ¹⁰ No. 7 on carcinogenicity. 10 Q. When did -- which products? All right. If you go to Table 2 11 So the company that makes ¹² on Page 2 of Exhibit 24, it provides the Thiola, Mission -- I, for God's sake, cannot ¹³ cut-off values or concentration limits that think of the name of that product right now.

¹⁴ trigger the classification of mixtures. 15

- A. Okay.
- 16 Do you see that? Q.
- 17 Yes. A.
- And for both Category 1 and 18 Q.
- ¹⁹ Category 2 carcinogens, the cut-off is
- greater than -- equal to or greater than
- 21 0.1 percent. Is that right?
- 22 That's what it says. A.
- Do you have any science that
- ²⁴ ingredients can have a critical effect on
- 14 It's escaping me. But they have a bacterial vaginosis product that I helped formulate. And you --16 Q. 17 A. We also --18 O. Go ahead and finish, please. 19 Yeah. There's also a company called Columbia Laboratories. They've been bought and sold I don't know how many times. ²² They're the makers of Crinone. We also looked at other products ²⁴ for them based on the, you know, Crinone drug

		<u>υσι</u>

Being listed on the RTECS database just means that toxicological data that's been published about the ingredient? A. Yes.	9 agree? 10 MS. O'DELL: If you know. Don't 11 guess. 12 A. I don't know. My dad has 13 multiple myeloma, and and he was a smoker, 14 but I don't know the etiology of well, did 15 you say malignant myeloma or 16 BY MR. ZELLERS: 17 Q. Malignant melanoma. 18 A. Yeah. I don't know if there's 19 an established connection between smoking and 20 that. 21 Q. You're not an expert in cancer.

²⁴ Correct?

²⁴ be an expert in cancer.

Page 214 You are not an expert in ovarian

cancer. Correct?

O.

1

I am not an expert in ovarian A. cancer.

5 Do you agree that fragrances are Q. generally broken down quickly in the body? MS. O'DELL: Object to the form.

8 I don't know that I can agree to a general statement like that. I would have ¹⁰ to examine the route of administration. So whether they're applied to the skin or if ¹² they're swallowed, as we discussed earlier,

13 the kinetics of how they're metabolized,

¹⁴ distributed, and eliminated are a function of 15 those things.

¹⁶ BY MR. ZELLERS:

17 Those are all important components. Correct?

A. Yes.

19

2

20 Q. And you have not done an analysis of that type in this case. Correct? 22

That's correct.

23 Q. Do you agree that the primary ²⁴ effects of exposure to fragrance chemicals

Page 216 Yeah. I think I answered that I

² would take that on a case-by-case basis.

³ There could be chronic effects, especially

⁴ with respect to sensitizers.

⁵ BY MR. ZELLERS:

Q. You have not done that type of ⁷ analysis at least with respect to any potential relationship between the fragrance

chemicals or chemicals you've identified in

¹⁰ baby powder or Shower to Shower and ovarian cancer. Correct?

12 MS. O'DELL: Objection to form.

13 A. Well, several of them did have published chronic dosing studies, and I certainly looked at those. No, I have not done a deep-dive analysis on that.

BY MR. ZELLERS:

18 What, if anything, does 19 irritation have to do with the development of ovarian cancer?

Irritation causes an Α. ²² inflammatory response. Inflammatory

²³ responses are associated with a higher risk

Page 217

²⁴ of developing cancers, and specific --

Page 215

¹ are acute, like headache or skin irritation?

MS. O'DELL: Object to the form.

Again, it's a general statement. ⁴ You know, my son is allergic to certain

⁵ fragrance chemicals, and so you can have an

⁶ allergic response. Right? I think you

⁷ mentioned irritation and what else?

⁸ BY MR. ZELLERS:

Do you agree that the primary ¹⁰ effects of exposure to fragrance chemicals are acute, like headaches or skin irritation? 12

MS. O'DELL: Object to the form.

13 A. You know. I --

¹⁴ BY MR. ZELLERS:

15 Or do you defer on that?

I think I would do it on a 16

¹⁷ case-by-case basis. I would look at each

¹⁸ fragrance chemical and do what I did here.

19 You know, there could be chronic effects from

²⁰ repeat administration. So, no, I wouldn't

²¹ characterize them as only acute.

22 My question was "are primarily Q. 23 acute."

24 MS. O'DELL: Object to the form. Q. That's a general statement.

² Correct?

A. It is a general statement. But ⁴ also, with respect to the vagina, insults to

⁵ the vagina do, in fact, generate certain

⁶ proteins that are part of the inflammatory ⁷ response, and those have been positively

⁸ linked with higher incidences of cancers in

the reproduction -- female reproductive

10 organs.

11 Q. Let me go back to my original question. You are not aware of any

epidemiologic studies that associate the

¹⁴ fragrance chemicals or the chemicals that you

identified in Shower to Shower or baby powder

¹⁶ with an increased risk of ovarian cancer.

17 Correct?

MS. O'DELL: Object to form.

BY MR. ZELLERS: 19

20 O. In humans. 21

MS. O'DELL: Object to form.

22 I mean, you keep tagging on the "in human" part of it. I mean, we have

²⁴ animal studies that show toxicity issues with

Case 3:16-md-02738-MAS-RLS Document Page 57 of 96 Page 220 Page 218 ¹ cells in animal models, like Chinese hamster And I'd like to add one quick ² ovary cell models, oocyte degeneration that ² point. You mentioned the rosin earlier, ³ are associated with female reproductive ³ Methyl Hydrogenated Rosinate. That's glue. ⁴ organs. So, no, not in humans, but we've ⁴ It's a film former. It adheres the fragrance ⁵ seen in vitro and in vivo animal studies. ⁵ chemicals to the talc particles. So where ⁶ BY MR. ZELLERS: ⁶ the talc particles go, the fragrance ⁷ chemicals will go. Take a look, if you will, at O. your report, Table 7, Page 21. The first We have a result here in which ingredient you list is d-Limonene? d-Limonene was found to be cytotoxic against ¹⁰ Chinese hamster ovary cells in which the 10 Limonene, I believe, is how it's ¹¹ inhibitory concentration of 50 percent was 50 11 pronounced. 12 micrograms per mL. That is a very, very low Limonene? O. 13 Yeah. concentration. A. 14 14 That's a chemical found in the So, if there was d-Limonene O. peels of citrus fruit. Is that right? attached to a talc particle with the rosin 16 I don't know if it comes from and that particular talc particle entered the vagina and landed next to an ovary, I think ¹⁷ the peels. I read that a while back. I'll ¹⁸ take your word for it. I know it's in ¹⁸ that data strongly suggests that those two 19 lemons. I believe it's in oranges, too, and materials are not compatible and there would ²⁰ other citrus fruits. ²⁰ be problems. That study makes it clear and ²¹ equivocal that d-Limonene is not compatible And I know that there's a ²² with Chinese hamster ovary cells. I wouldn't ²² cleanser that's got it in there. I misstated. For our record, put my daughter's ovary at risk with it. ²⁴ it's Page 22 where Table 7 begins.

Page 219

Page 221

1 Oh. 2 Q. Is that right? 3 Yeah. A.

4 d-Limonene is used as both a ⁵ fragrance and a flavoring. Is that right?

I believe so. A.

6 7 If d-Limonene were associated 8 with the development of ovarian cancer, wouldn't you expect to see higher rates of ¹⁰ ovarian cancer among people who handle fruit?

11 MS. O'DELL: Object to the form. 12 MR. ZELLERS: What are you 13 objecting to? That was a good question. 14

So again we get to route of ¹⁶ exposure. I mean, the presumption is that handling fruit, you know, doesn't transfer ¹⁸ the d-Limonene through the skin into the

19 blood and ultimately reach the ovaries. And, you know, this matter --²¹ peroneal application, that's awfully close to ²² the ovaries, and, you know, as I said, I've ²³ been asked to assume that it does enter the ²⁴ vaginal cavity.

¹ BY MR. ZELLERS:

Q. In order to do a proper ³ scientific analysis, you have to make an assessment of concentration. Correct?

A. Uh-huh.

Q. Yes?

Yes. Α.

12

17

MS. O'DELL: Object to form.

BY MR. ZELLERS:

10 You have to makes an assessment ¹¹ of dose response. Correct?

MS. O'DELL: Object to the form.

13 A. It depends. Again, I keep telling you genotoxic materials -- they are not thresholded.

BY MR. ZELLERS: 16

O. It is --

One molecule is enough to cause an increased risk and carcinogenicity.

20 Is d-Limonene a genotoxic Q. 21 material?

22 I don't believe it's been classified as that, but cytotoxicity against Chinese hamster ovary cells indicates that it

¹ could be against ovaries, at least in this ² animal model.

- And what --Q.
- A. And you don't do those kind of
- ⁵ studies against humans. They're unethical.
- ⁶ Right? So the safety of d-Limonene has not
- ⁷ been established in human vaginas. Q. In order to do a scientific
- study, d-Limonene -- you would need to also
- ¹⁰ do an exposure analysis. Correct?
- 11 MS. O'DELL: Object to the form.
- 12 Not necessarily.
- 13 BY MR. ZELLERS:
- 14 Q. You would not need to do an
- ¹⁵ exposure analysis in order to lead to a
- ¹⁶ scientifically valid conclusion of the effect
- of d-Limonene on a human?
 - MS. O'DELL: Object to the form.
- 19 A. You could, but you don't have
- 20 to. What kind of -- I mean, I guess in the
- 21 model that you want to rely upon, it seems to
- ²² be an important fact to you. But the fact is
- 23 it hasn't been done in humans in the vagina.

- Page 224
- ¹ model you are familiar with to assess the
- ² risk in humans that does not include any type
- ³ of exposure assessment or analysis?
 - MS. O'DELL: Object to the form.
- ⁵ BY MR. ZELLERS:
- O. I don't want to sit here and
- have you --
 - A. You asked --
- -- internet research --Q.
- 10 A. -- the question. I'm going to
- get you the answer. 11
- 12 Well, I'm not asking you to do
- 13 internet research. What I'm asking you to
- 14 do --
- 15 Α. This isn't -- it's not internet
- 16 research.
- 17 O. Well, you're doing something on
- your computer.
- 19 I'm looking for the name of the A.
- 20 Klimisch rating --
- 21 Well, I'm okay if you supplement
- your answer later on in the deposition. 23 Okay. That's fine.
- A. 24 I just want to --Q.

1

2

- Page 223
- ¹ BY MR. ZELLERS:
- Q. An exposure analysis is an ³ important part of a risk assessment.
- ⁴ Correct?

6

18

- 5 MS. O'DELL: Object to the form,
 - asked and answered.
- 7 A. You've asked the question. I've
- answered it previously.
- BY MR. ZELLERS:
- 10 Q. And I'm assuming and recalling your answer was "yes." Is that right?
- 12
- MS. O'DELL: That's not correct.
- 13 Misstates his testimony.
- ¹⁴ BY MR. ZELLERS:
- 15 Is an exposure analysis an
- ¹⁶ important part of a risk assessment?
- 17 The risk assessment --
- 18 MS. O'DELL: Objection; form.
- 19 -- that you presented in one of
- your earlier exhibits says it is, but that's
- not the only risk assessment model that there
- ²² is.
- ²³ BY MR. ZELLERS:
- 24 Tell me what risk assessment

- MS. O'DELL: Well, and if you
- want to explain what you were doing and

Page 225

- respond, you're welcome to do that.
- Klimisch rating is an evaluation
- ⁵ approach. It's a systemic approach for
- ⁶ evaluation of data, and it's got reliability
- ⁷ categories, so -- and that is a risk
- ⁸ assessment model.
- BY MR. ZELLERS:
- 10 That involves no exposure
- assessment. Is that right?
- It does not involve an exposure 12 A.
- 13 assessment.
 - Do you know the concentration of
- d-Limonene in either baby powder or Shower to
- Shower? 16

17

- A. No.
- MS. O'DELL: Object to the form.
- 19 A. It was not provided to me.
- BY MR. ZELLERS:
- Similarly, you don't know what 21
- ²² dose of d-Limonene a woman would be exposed
- 23 to if she utilized either Shower to Shower or
- ²⁴ baby powder. Correct?

Page 228 MS. ODELL: Object to the form. A That's right. I wasn't provided with that information. BY MR. ZELLERS: Q. In your list, you give us benzaldehyde? MS. O'DELL: Which list are your referring to? MS. O'DELL: Fair enough. I just didn't know- MS. O'DELL: Fair enough. I just didn't know- MS. CELLERS: That's okay. MS. D'BELL: Ratie of the search of the s		<u>мі фа</u> е́ь: 239	<u> </u>	5017 111.0.
2 A. That's right. I wasn't provided 3 with that information. 4 BY MR. ZELLERS: 5 Q. In your list, you give us 6 benzaldehyde? 7 MS. O'DELL: Which list are you 7 meferring to? 8 MR. ZELLERS: Page 22, Table 7. 10 MS. O'DELL: Fair enough. I 11 just didn't know 12 MR. ZELLERS: That's okay. 13 A. Benzaldehyde. That's correct. 14 BY MR. ZELLERS: 15 Q. Benzaldehyde. Do you know what 15 benzaldehyde is? 16 Q. What is it? 17 A. Yes. 18 Q. Mra is it? 19 A. It's aldehyde of benzene. 20 Q. Artificial almond oil. Correct? 21 A. Yeah. 22 Q. It's used as a fragrance in 23 lotions. Is that right? 24 MS. O'DELL: Object to the form. 25 Istanting that it's used or 2 not used. 3 BY MR. ZELLERS: 4 Q. Assuming that it's used or 2 not used. 3 BY MR. ZELLERS: 4 Q. Assuming that it's used as a 5 fragrance in lotion, lotions are applied topically to the 6 skin. Is that right? 7 MS. O'DELL: Object to the form. 8 A. Generally, yeah, And we keep 9 going down this rabbit hole. Just because 10 you can rub it on the skin or swallow it 1 doesn't mean it's safe for your eyes or, in 12 the case of females, vaginas. 13 BY MR. ZELLERS: 4 Q. At some point Ms. O'Dell is 10 doesn't mean it's safe for your eyes or, in 12 the case of females, vaginas. 13 BY MR. ZELLERS: 4 Q. Page 232

¹ BY MR. ZELLERS:

- O. Well --
- Here is what the data that I did
- ⁴ find stated, was that there was a positive in
- ⁵ sister chromatid exchange, which is
- ⁶ genotoxicity, with human lymphocytes from
- ⁷ healthy non-smoking donors. It was also
- ⁸ found to induce formulation of stable
- ⁹ DNA-protein cross-links in cultured human
- ¹⁰ lymphoma cells. That's from TOXNET.
- 11 Demir -- I don't know how to
- ¹² pronounce it -- Kocaoglu and Kaya reported
- ¹³ that it may have significant genotoxic
- ¹⁴ effects.

- It was cytogenic at 50 nanomoles ¹⁶ per liter in 24 hours against Chinese hamster
- ¹⁷ ovary cells. Nanomoles per liter. That's a
- ¹⁸ very low concentration.
- 19 Sister chromatid exchange in
- ²⁰ Chinese hamster ovary cells published by
- ²¹ Galloway.
- 22 So again, that's -- that's a
- ²³ direct -- direct evidence of benzaldehyde
- ²⁴ interacting with a cell, and that's different
 - Page 231
- ¹ than cells on your tongue, and that's
- ² different than cells on your skin.
- ³ BY MR. ZELLERS:
- It is not a --O.
- 5 So --A.
- 6 I'm sorry. Finish your answer. O.
- 7 So that's what I'm reporting.
- ⁸ And companies that are going to develop
- products that are intended for topical
- ¹⁰ administration take those kinds of things
- ¹¹ into consideration. That's why they do eye
- ¹² irritation and eye sens- -- you know, skin
- ¹³ sensitization studies.
- 14 If a product is going to be
- ¹⁵ applied to the peroneal area, companies are
- ¹⁶ going to consider, well, that may enter the
- ¹⁷ anus. It could enter the vagina. What is a
- ¹⁸ potential outcome?
- 19 Those are standard and typical
- considerations when companies develop
- 21 products.
- 22 Routes of exposure are
- ²³ important. Correct?
- 24 Yes.

- You have not done an analysis
- ² with respect to routes of exposure with
- ³ regard to benzaldehyde. Correct?
 - MS. O'DELL: Object to the form.
 - A. I did. I did look at all the
- available information on pharmacokinetics;
- absorption, distribution, metabolism, and
- elimination. And --
- BY MR. ZELLERS:
 - Where is that in your report? O.
 - It would be in the appendices. A.
- 12 O. All right.
 - So the PubChem link, it lists A.
- all of that.
 - Do you know --O.
- The pharmacologies -- I'm sorry. 16 A.
- I wasn't done.
- 18 Q. All right. Please finish your
- answer.
- 20 A. Yeah. The pharmacology for each
- and every one of those chemicals I looked at
- in depth.
- 23 Q. Do you know the concentration of
- ²⁴ benzaldehyde in baby powder or Shower to
- Page 233
- ¹ Shower?
 - A. I think you've asked me this
- question now at least a half dozen times. I
- ⁴ have not been provided with the compositions.
 - The same thing for what dose of
- this chemical a woman would be exposed to if
- she used baby powder or Shower to Shower.
- Correct?
- MS. O'DELL: Object to the form
- 10 of that question and the question
- 11 before.
- Again, that information was
- 13 requested and was not provided.
- 14 BY MR. ZELLERS:
- Looking at Table 7, Pages 21 to
- ¹⁶ 26, can you point to any chemical where there
- ¹⁷ is evidence that the chemical contributes to
- ovarian cancer in humans?
- 19 MS. O'DELL: Object to the form.
- 20 A. Give me a minute.
- para-Cresol. Women exposed in their
- ²² workplace to varnishes that contained mixed
- ²³ Cresols had increased gynecological problems
- ²⁴ such as menstrual disorders and hormonal

¹ disturbances. An increased frequency of

- ² perinatal mortality and abnormal development
- ³ of newborn infants was also reported.
- ⁴ BY MR. ZELLERS:
- Q. Do any of those studies relate
- ⁶ to or reference an increased risk of ovarian
- cancer?

8

- MS. O'DELL: Object to the form.
- A. Ovarian cancer in humans or in
- 10 animals? I feel like --
- BY MR. ZELLERS:
- 12 Q. In humans, yes.
- 13 -- we keep going back and forth A.
- ¹⁴ here.
- 15 Let's limit it to humans. O.
- 16 A. Pardon me?
- 17 O. In humans.
- 18 MS. O'DELL: Object to the form.
- 19 No, they have not been studied
- for ovarian cancer in humans.
- 21 BY MR. ZELLERS:
- Q. I want to ask you the same
- ²³ question with respect to Shower to Shower.
- ²⁴ So Table 16, can you point to any chemical

- ¹ your answer?
 - A. Yeah.
- In your report, you claim that
- ⁴ four chemicals in baby powder have been
- ⁵ identified by IARC, the International Agency
- ⁶ for Research on Cancer, as potential
- ⁷ carcinogens. Is that right? And I'm looking
- at Page 12.

10

- A. Yes.
 - Q. You list styrene, d-Limonene,
- 11 coumarin --
- 12 Yes. Α.
- 13 Q. -- and eugenol?
- 14 Yes. Α.
- 15 You also claim, on Page 12, that
- three chemicals in Shower to Shower have been
- identified by IARC as possible carcinogens.
- Is that right?
- A. Yes.
- 20 Benzophenone, coumarin, and Q.
- eugenol. Is that right? Those are the three
- that you identified for Shower to Shower?
- 23 Benzophenone, coumarin, and
- ²⁴ eugenol. I also identified musk ketone.

Page 235

- ¹ where there is evidence that the chemical
- contributes to ovarian cancer in humans?
- 3 A human study? You want to --A.
- 4 Q.
- You're choosing to ignore all A.
- the animal studies and in vitro studies?
- 7 Just --
- 8 I'm not asking --Q.
- 9 Just so we're clear on that. Α.
- 10 I'm not looking to argue with
- you. Okay? I've asked you a question. I'd
- like you to try to answer to the best of your
- 13 ability?
- 14 MS. O'DELL: I will object. I'm
- 15 going to object to the form of the
- 16 question and just ask if you would let
- 17 Dr. Crowley finish.
- 18 Yeah. So you're asking for
- ¹⁹ human studies only.
- BY MR. ZELLERS:
- 21 O. Yes.
- 22 Right? There isn't one because A.
- ²³ these haven't been studied in human vaginas.
- 24 In your -- are you finished with

Page 237

Page 236

- ¹ That's the Scientific Committee on Health and
- ² Environmental Risks in Europe. You also
- ³ didn't mention para-Cresol, which the EPA
- ⁴ considers to be possibly carcinogenic.
 - I'm going to get to musk ketone
- ⁶ and para-Caresol -- or Cresol, but right now
- ⁷ I want to just limit my questions to the IARC
- references that you make.
 - A. Okav.
- 10 Q. Understood?
 - A. Sure.

- You're familiar with the --
- well, and so our record is clear, you
- identified four chemicals or fragrance
- chemicals with baby powder that are
- potentially -- that are potential carcinogens
- according to IARC. Is that right? Styrene,
- d-Limonene, coumarin, and eugenol.
- 19 A. Isn't that the same question you just asked me?
- 21 Yes, but you then added in musk
- ketone and para-Cresol. Those two you cite other sources for them being identified as a
- possible or potential carcinogen. Is that

Page 238 Page 240 ¹ on my computer. ¹ right? 2 Α. Yes. If you look at Deposition ³ Exhibit 25, the classification system in the MS. O'DELL: Object to the form. ⁴ preamble, for Group 3, the chemical is not ⁴ BY MR. ZELLERS: ⁵ classifiable as to its carcinogenicity to Q. I just want, right now, to talk ⁶ about the IARC references that you make. ⁶ humans. That's the title of that group. Is ⁷ You're familiar with the classification that right? ⁸ system that IARC has established. Is that A. That's what it says, "The agent 9 right? is not classifiable as to its carcinogenicity 10 to humans." A. Yes. 11 11 Group 4 chemicals are probably The description -- at least the O. Q. first paragraph of the description for not carcinogenic to humans. Is that right? 13 Is that a question? 13 Group 3, "This category is used most commonly 14 for agents for which the evidence of 14 Yes. Q. 15 Yeah, Group 4 is probably not carcinogenicity is inadequate in humans and A. inadequate or limited in experimental ¹⁶ carcinogenic to humans. 17 Group 3 chemicals are not 17 animals." classifiable as to the carcinogenicity to 18 Did I read this correctly? 19 humans. Right? MS. O'DELL: Object to the form. 20 20 Yeah, I believe you read that Yes. A. 21 That category is used where the faithfully. O. BY MR. ZELLERS: ²² evidence of carcinogenicity is inadequate in ²³ humans and inadequate or limited in 23 All right. Group 2B --24 ²⁴ experimental animals. Correct? Well, wait a minute. You need Page 241 Page 239 No. That's only half of it. ¹ to read the next paragraph, because that's ² The other part of that is evidence of ² important, in Group 3. "Exceptionally, ³ carcinogenicity is inadequate in humans but ³ agents for which the evidence of ⁴ sufficient in experimental animals, but ⁴ carcinogenicity is inadequate in humans but ⁵ strong evidence that the mechanism of ⁵ sufficient in experimental animals may be ⁶ carcinogenicity in experimental animals may placed in this category when there is strong ⁷ not operate in humans, or agents that don't evidence that the mechanism of ⁸ fall into any other group. carcinogenicity in experimental animals does (Exhibit No. 25 marked) not operate in humans." ¹⁰ BY MR. ZELLERS: 10 Q. Are you done? 11 Q. So we have a clear record, So -- yeah. A. ¹² Deposition Exhibit 25 is the preamble to the Okay. Q. 13 IARC monographs on the human evaluation of 13 So --Α. ¹⁴ carcinogenic risks to humans. Is that right? O. I don't want to have a 15 discussion -- I mean, I just asked for the That's what it says. 16 MS. O'DELL: You said 25? 16 definition. 17 Well, your only picking half of 17 MR. ZELLERS: 25. A. 18 MS. O'DELL: Thank you. it is part of the problem. 19 BY MR. ZELLERS: 19 Is there anything else you want 20 to read into the record for the definition of Are you familiar with this --21 I have seen -a Group 3 IARC chemical? A. 22 -- preamble? 22 Q. A. Yep. 23 I have seen this. I also have 23 Read what you want to read, and Q. the IARC classifications from their website ²⁴ let's move on.

		<u>γος</u>	
	Page 242		Page 244
1	A. The third part of that is agents	1	potential carcinogen is strike that.

Would you agree IARC has not concluded that styrene is carcinogenic in humans? Correct? A. Okay. They've concluded it's in Group 2B, which is possible carcinogenic to humans. And I need to request a break because I need to blow my nose. MR. ZELLERS: Let's take a break. THE WITNESS: Is that all right? MR. ZELLERS: That's a very legitimate reason. THE VIDEOGRAPHER: Going off the record, the time is 2:53 p.m. (Recess from 2:53 p.m. to 3:05 p.m.) THE VIDEOGRAPHER: Back on the

Page 246 Page 248 ¹ BY MR. ZELLERS: 1 MS. O'DELL: So you do not know 2 Q. Dr. Crowley, Deposition the year of this publication? ³ Exhibit 26 is the IARC monograph with respect 3 MR. ZELLERS: I do not know the ⁴ to styrene. Is that correct? year of this other than I believe it to A. I think I found more than one of 5 be the most recent IARC monograph with 6 6 them. Which one is this? This is Volume 82? respect to styrene. All I can tell you is it's after 1994, and it is part of Q. Is Exhibit 26 a -- an IARC 8 the IARC monographs in Volume 82. 8 document? 9 So I'm looking at the copy I MS. O'DELL: Object to the form. A. 10 A. I'm going to take your word for 10 found, and it --11 it, but I can't say with certainty because I 11 BY MR. ZELLERS: ¹² don't see IARC -- oh, there it is on the 12 Oh, I'm sorry. So I can 13 second page. It says "IARC monograph ¹³ identify Deposition Exhibit 26 as a 2002 IARC ¹⁴ Volume 82." So, yeah, it sure looks like it. monograph. 15 BY MR. ZELLERS: A. Okay. So this is only part of 16 ¹⁶ it, because I also considered this particular Q. As we discussed before, an ¹⁷ ingredient can cause or contribute to the document. It looks to me like you've development of one type of cancer but not provided me with copies up through 520 --¹⁹ Page 522. The actual report I found was 114 another type of cancer. Correct? 20 Yeah, that's -- that's true. 20 pages long, and it contains -- it goes up to 21 ²¹ Page 550. Isn't it true that in human 22 ²² studies, styrene exposure has only been Q. I have just given you, in ²³ associated with an increased risk in 23 Exhibit 26, excerpts from the monograph. The ²⁴ lymphatic and hematopoietic neoplasms? And ²⁴ first page of the exhibit was 437. The last Page 247 Page 249 ¹ I'm looking at the IARC monograph, ¹ page I provided you was 522, so I will ² Exhibit 26, at Page 520. acknowledge these are just excerpts --3 MS. O'DELL: Object to the form. Okay. A. A. Can you direct me to --4 -- from the monograph. ⁵ BY MR. ZELLERS: 5 MS. O'DELL: Well, fair enough. 6 Sure. 6 Thank you for acknowledging that. And 0. 7 7 I'll just note for the record, so it's -- where on Page 520? I'm going 8 ⁸ to trust that you're faithful in reading it clear, Exhibit 26 skips from Page 438 to 517, and then it's 517 to 522, and 9 to me. 10 10 The one thing I'd like to verify the remainder is omitted. 11 is there are multiple IARC examinations of BY MR. ZELLERS: 12 styrene, so do you know which -- this is from 12 Doctor, I'm ready to continue. ¹³ Volume 82, but which year is that? Do you ¹³ Are you ready? 14 14 know? A. All right. 15 15 I'm pointing you to, in Well, looking at the cover page ¹⁶ of Exhibit 26, the IARC monograph states, ¹⁶ Exhibit 26, the section on human ¹⁷ "This substance was considered by previous carcinogenicity data, Section 5.2 that begins ¹⁸ working groups in 1978, 1987, and 1994. on Page 518. Do you see that? ¹⁹ Since that time, new data have become 19 A. Yes. ²⁰ available, and these have been incorporated Are you aware of any human O. 21 into the monograph and taken into studies associating styrene exposure with an

²⁴ to the year.

²² consideration in the present evaluation."

That's what I know with respect

²² increased risk of -- well, let me withdraw

In this section, IARC references

²³ that question.

Page 250 Page 252 ¹ a human study relating to an increased risk 1 It's very fair for -- you've asked him ² of lymphatic and hematopoietic neoplasm with 2 does the monograph refer to ovarian ³ styrene exposure. Is that generally 3 cancer, and it's very fair for him to ⁴ accurate? 4 be able to examine that document and 5 MS. O'DELL: Object to the form. 5 answer your question and not rely on A. I mean, they -- they talk about 6 this truncated, incomplete exhibit. ⁷ a number of studies. If you go to Page 519, 7 MR. ZELLERS: The exhibit I 8 the second to last paragraph, "There have 8 provided to him was the summary of data ⁹ also been reports of increased risks of 9 reported in evaluation for human ¹⁰ rectal, pancreatic, and nervous system 10 carcinogenicity data. 11 cancers in some of the cohort and 11 BY MR. ZELLERS: But my question to you, ¹² case-control studies. The numbers of cases 12 were quite small in these studies, and most ¹³ Dr. Crowley, is: Are you aware of any study that associates styrene exposure with an ¹⁴ of the larger cohort studies have not yielded ¹⁵ similar findings. Many of the cohort studies increased risk of ovarian cancer in humans? ¹⁶ did not examine these sites in detail." MS. O'DELL: Object to the form. 17 17 So I don't think it's just A. No. 18 limited to those. 18 BY MR. ZELLERS: 19 BY MR. ZELLERS: Q. If I ask you the same questions 20 Q. Let me cut to the chase and ask as I asked before, you don't know the dose or the amount or the concentration of styrene in you my question --22 A. Okav. the baby powder or Shower to Shower product. 23 ²³ Correct? Q. -- and then we can hopefully MS. O'DELL: Object to the form. ²⁴ move along. Page 251 Page 253 Johnson & Johnson did not There are no human studies that ² provide that information to enable that kind ² associate styrene exposure with an increased ³ risk of ovarian cancer in humans. Is that ³ of assessment. ⁴ BY MR. ZELLERS: 4 right? 5 MS. O'DELL: Object to the form. Q. The same --A. I'm going to take my new copy, A. It was requested. and I'm going to do a search. The same statement: You do not BY MR. ZELLERS: ⁸ know the amount of exposure or the duration Again, I'm objecting to you of exposure of any individual in this case. ¹⁰ doing internet research to try to answer my ¹⁰ Correct? 11 questions. MS. O'DELL: Object to the form. 12 12 The same answer: Information MS. O'DELL: Excuse me. He's 13 ¹³ was requested, and Johnson & Johnson did not not doing internet research. As he's provide that to enable that kind of analysis. 14 noted to you, that he was provided, in 15 Exhibit 26, an incomplete monograph, 15 BY MR. ZELLERS: 16 and he has the full monograph before 16 Do you agree that the studies --17 the human studies with respect to styrene are him. And so it's very fair to answer characterized by IARC as generally small, 18 your question --19 MR. ZELLERS: Ms. O'Dell. statistically unstable, and often based on subgroup analyses? 20 MS. O'DELL: No, no, no. Let me 21 21 MS. O'DELL: Object to the form. finish. 22 22 A. Could you please point me to MR. ZELLERS: If he is 23 ²³ where you read that?

24

MS. O'DELL: No. Let me finish.

referring ---

Page 254 Page 256 ¹ BY MR. ZELLERS: ¹ try to answer my questions as best you can. Sure. Take a look --Is it true that in animal ³ studies styrene exposure has only been Which page? ⁴ associated with an increased incidence of Yes. Page 520. So at the very Q. ⁵ top of 520 -- this, again, is in the section pulmonary adenomas and carcinomas in mice? ⁶ on human carcinogenicity data -- IARC states, MS. O'DELL: Object to the form. ⁷ "The increased risks for lymphatic and Can you please --A. 8 BY MR. ZELLERS: 8 hematopoietic neoplasms observed in some of ⁹ the studies are generally small, Q. Sure. ¹⁰ statistically unstable, and often based on 10 A. -- direct me to where you're --¹¹ subgroup analyses. These findings are not 11 Take a look at the IARC 12 very robust." monograph. I'm now looking at the Section 13 Did I read that correctly? 13 5.3, Exhibit 26, Page 520, animal carcinogenicity data. 14 A. I believe so. Do you see that? 15 15 Q. All right. 16 Yes. So styrene was tested for 16 A. I think one other thing we should talk about with respect to styrene is carcinogenicity in mice in an inhalation its metabolite. study and four oral gavage studies. That's 19 what you're talking about. Right? MR. ZELLERS: Doctor, I'm going 20 to object because I just need you to 20 Q. Yes. 21 21 answer my questions. A. All right. 22 BY MR. ZELLERS: 22 O. It was only associated with an ²³ increased incidence of pulmonary adenomas and And my question was: Did I read ²⁴ carcinomas in mice. Is that right? ²⁴ that correctly? Page 257 Page 255 The answer --That's what it says. But let's 1 MS. O'DELL: Object to the form. ² also jump down two paragraphs. "Styrene-7,8-A. Yeah. You did read it ³ oxide is a major metabolite of styrene and ⁴ has been previously evaluated by IARC. The ⁴ correctly, but as long as we're talking about ⁵ the safety of styrene in human studies, we ⁵ evaluation at that time was that there was ⁶ can't ignore its metabolite. ⁶ sufficient evidence in experimental animals Styrene-7,8-oxide has been ⁷ for the carcinogenicity of styrene-7,8-8 implicated and found to be carcinogenic and 8 oxide." ⁹ genotoxic in virtually every study that has What is styrene-7,8-oxide? O. ¹⁰ ever been done with it. Metabolism of 10 It's the metabolite. So when 11 styrene is absorbed, it's metabolized to the 11 styrene to those metabolites have also been ¹² demonstrated both in humans and in animals to ¹² 7,8-oxide. ¹³ be carcinogenic. So this is very similar to 14 ¹⁴ certain drugs. There are drugs called So while you're picking and prodrugs. The chemical that you swallow has ¹⁵ choosing certain portions of the IARC ¹⁶ zero biological activity. However, once it's 16 monograph, let's consider the thing in total, all of the evidence. been metabolized, the metabolite is 18 pharmacologically active. That's the case MR. ZELLERS: Move to strike as 19 nonresponsive. 19 here with styrene. 20 ²⁰ BY MR. ZELLERS: This is an animal study. O. 21 Q. I have not -- my question was: ²¹ Correct? ²² Did I read that statement correctly from 22 A. It's an animal study. ²³ IARC? This is not your opportunity to just All right. d-Limonene. You 23 ²⁴ pontificate. I'll move on, but I need you to ²⁴ claim that IARC has identified d-Limonene as

Case 3:16-md-02738-MAS-RLS Document Page 67 of 96 Page 258 Page 260 ¹ a potential carcinogen. Is that right? And ¹ carcinogenicity is inadequate in humans and ² inadequate or limited in animals, or the ² I'm looking at your report. I believe it was ³ evidence of carcinogenicity in humans is ³ Page 12. ⁴ inadequate but sufficient in experimental A. 5 ⁵ animals with strong evidence that the d-limonene -- strike that. ⁶ mechanism doesn't relate. That's what the (Exhibit No. 27 marked) ⁷ classification -- which we've read into the BY MR. ZELLERS: 8 Q. Exhibit 27 is again excerpts record previously. from the IARC monograph on d-Limonene? The summary of Group 3 I'm going to pull up the entire classification by IARC is that the agent is 10 not classifiable as to its carcinogenicity to monograph. 11 12 humans. Is that right? MS. O'DELL: So just for the 13 record, Exhibit 27 starts at Page 307 MS. O'DELL: Object to form. 14 and goes to 308, then skips to 320 ¹⁴ BY MR. ZELLERS: 15 and --Q. That is -- I'm reading from 16 ¹⁶ Exhibit 25. MR. ZELLERS: It's just as with 17 17 the styrene monograph. What I have Yeah. There's three elements Α. 18 done here is to photocopy the sections that go into the group classifications, and 19 relating to human carcinogenicity data you're only reading the first one. You're 20 and animal carcinogenicity data. 20 not reading all three. 21 21 Now, Doctor, in fairness --MS. O'DELL: And feel free to 22 22 look at the whole monograph if you need MS. O'DELL: Let him finish, 23 23 to, Dr. Crowley. sir. 24 24

Page 259

¹ BY MR. ZELLERS:

Α.

You have to answer my question.

Excuse me. I wasn't finished.

Page 261

³ I'm reading the title. Is that right?

I'm not reading the definitions.

⁵ I'm reading the title. Did I read the title correctly?

I think so. A.

All right. And I don't mean to Q.

unnecessarily cut you off, but we have had an

extensive discussion, both of us, in terms of

the definitions. Correct?

Right. A.

13 Q. All right.

And we have. And I think that

it's pretty clear that IARC considers both

¹⁶ human and animal studies when they come up with these classifications.

Isn't it true that there are no

human studies linking the use of d-Limonene to any type of cancer?

21 The IARC monograph states that ²² there was no data available to the working group on studies of cancer in humans with ²⁴ d-Limonene. That's correct.

¹ BY MR. ZELLERS:

Q. Dr. Crowley, IARC has classified ³ d-Limonene as a Group 3 agent. Is that 4 right?

THE WITNESS: I have it.

- 5 I believe that's correct. A.
- The first sentence, as we read

⁷ before, of the definition of a Group 3

⁸ classification means that the chemical is not

⁹ classifiable as to its carcinogenicity in

¹⁰ humans. Is that right?

MS. O'DELL: Object to the form.

¹² BY MR. ZELLERS:

That's what the Group 3

classification means?

15 Α. That's correct, not

¹⁶ classifiable.

11

13

17 Q. Do you agree that IARC has not ¹⁸ identified d-Limonene as a potential

¹⁹ carcinogen, but really what IARC has done is

²⁰ determined there is no adequate evidence to 21 say that it is a carcinogen?

I would state that IARC has ²³ classified it as Group 3, which means there's

²⁴ evidence of -- the evidence of

- 1			J74

A. Alveolar/bronchiolar tumors, adenomas, and carcinomas in both males and females, hepatocellular adenomas in females, and marginal incidence in squamous cell papillomas and carcinomas of the stomach. Q. Those are all animal studies. Correct? A. Correct. I'm going to look at this second one. Hepatocellular tumors, and that's in mice. Now, I spent my New Year's
	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. I believe so. Q. In fact, though, according to IARC, coumarin is also a Group 3 agent. Is that right? A. That's correct, it's Group 3. (Exhibit No. 28 marked) BY MR. ZELLERS: Q. Deposition Exhibit 28 is the IARC coumarin monograph excerpts. If I asked you all the same set of questions A. I'm probably going to give you the same answers. Q with respect to coumarin that I asked you with d-Limonene, we'd get the same answers. Correct? MS. O'DELL: Object A. Yes.	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	animal studies, the only potential association that has been found is lung or strike that are lung tumors, hepatocellular tumors, and renal tubal adenomas? A. Alveolar/bronchiolar tumors, adenomas, and carcinomas in both males and females, hepatocellular adenomas in females, and marginal incidence in squamous cell papillomas and carcinomas of the stomach. Q. Those are all animal studies. Correct? A. Correct. I'm going to look at this second one. Hepatocellular tumors, and that's in mice. Now, I spent my New Year's down at the coast, and I did at the beach,
	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. I believe so. Q. In fact, though, according to IARC, coumarin is also a Group 3 agent. Is that right? A. That's correct, it's Group 3. (Exhibit No. 28 marked) BY MR. ZELLERS: Q. Deposition Exhibit 28 is the IARC coumarin monograph excerpts. If I asked you all the same set of questions A. I'm probably going to give you the same answers. Q with respect to coumarin that I asked you with d-Limonene, we'd get the same answers. Correct? MS. O'DELL: Object A. Yes. MS. O'DELL: Object to the form.	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	animal studies, the only potential association that has been found is lung or strike that are lung tumors, hepatocellular tumors, and renal tubal adenomas? A. Alveolar/bronchiolar tumors, adenomas, and carcinomas in both males and females, hepatocellular adenomas in females, and marginal incidence in squamous cell papillomas and carcinomas of the stomach. Q. Those are all animal studies. Correct? A. Correct. I'm going to look at this second one. Hepatocellular tumors, and that's in mice. Now, I spent my New Year's down at the coast, and I did at the beach, and I did thumb through these, and I feel
	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A. I believe so. Q. In fact, though, according to IARC, coumarin is also a Group 3 agent. Is that right? A. That's correct, it's Group 3. (Exhibit No. 28 marked) BY MR. ZELLERS: Q. Deposition Exhibit 28 is the IARC coumarin monograph excerpts. If I asked you all the same set of questions A. I'm probably going to give you the same answers. Q with respect to coumarin that I asked you with d-Limonene, we'd get the same answers. Correct? MS. O'DELL: Object A. Yes. MS. O'DELL: Object to the form. BY MR. ZELLERS:	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	animal studies, the only potential association that has been found is lung or strike that are lung tumors, hepatocellular tumors, and renal tubal adenomas? A. Alveolar/bronchiolar tumors, adenomas, and carcinomas in both males and females, hepatocellular adenomas in females, and marginal incidence in squamous cell papillomas and carcinomas of the stomach. Q. Those are all animal studies. Correct? A. Correct. I'm going to look at this second one. Hepatocellular tumors, and that's in mice. Now, I spent my New Year's down at the coast, and I did at the beach, and I did thumb through these, and I feel like there was another one that demonstrates

- ¹ Q. What type of animal study was ² that?
- ³ A. That was a rat.
- ⁴ Q. With any of these animal
- studies, do you know the dose of the chemical
- ⁶ that the animals were exposed to?
- A. Yeah. They're present here in the report.
- ⁹ Q. Eugenol. Eugenol is -- strike ¹⁰ that.
- You state in your report that
- ¹² eugenol is both a potential carcinogen and a
- ¹³ possible carcinogen. Is that right?
- ¹⁴ Page 12.
- ¹⁵ A. I'm actually on Page 21. I'm ¹⁶ sorrv.
- Coumarin and eugenol are not classifiable. I think that's the word I used.
- Q. In fact, as with d-Limonene and coumarin, eugenol is classified by IARC as a
- ²² Group 3 agent. Is that right?
- ²³ A. Yes.

24

11

Q. At the risk of drawing another

¹ IARC's assessment and classification, you'd

Page 268

- ² give me the same answers. Correct?
- MS. O'DELL: Object to the form.
 - A. Yeah, so, I mean, the entire
- ⁵ IARC monograph is lengthy. In the case of
- ⁶ coumarin, they -- they actually have
- ⁷ Section 4, other data relevant to an
- ⁸ evaluation of carcinogenicity and its
- ⁹ mechanism. And so there they looked at the
- pharmacokinetics; absorption, distribution,
- ¹¹ metabolism, and excretion. That's on
- ¹² Page 202 of the coumarin monograph, which I
- ³ don't think you had in your cut.
- So, you know, there's a lot of
- ¹⁵ factors that go into these carcinogenicity
- ⁶ examinations by IARC or even NTP.
- ⁷ BY MR. ZELLERS:
- Q. IARC is made up of a number of
- ¹⁹ experts who come together to look at the
- carcinogenicity of certain chemicals. Is
 - that right? And ingredients?
 - A. It's an expert group, yeah.
- Q. Yeah. And at least with respect
- ²⁴ to IARC and the experts that are a part of

Page 267

- ¹ objection from counsel for the plaintiffs, if
- ² I ask you the same questions regarding
- ³ eugenol that I have asked relating to
- ⁴ coumarin and d-Limonene, as relates to the
- ⁵ meaning of a Group 3 classification by IARC,
- ⁶ you'd give me the same answers. Right?
- MS. O'DELL: Object to the form.
- 8 And because I don't believe that's a
- ⁹ fair way to ask those questions. If
- you've got the questions, ask him, but,
 - you know --
- ¹² BY MR. ZELLERS:
- O. You can answer.
- MS. O'DELL: It's a different --
- it's a different monograph. It's a
- different circumstance, and he should
- be able to have the opportunity to
- clarify.
- 19 BY MR. ZELLERS:
- Q. And he does have every
- ²¹ opportunity. But assuming I'm asking you all
- ²² the same set of questions with respect to
- ²³ eugenol as I asked you with d-Limonene and
- ²⁴ with coumarin, at least as it relates to

- Page 269

 ¹ IARC's analysis for d-Limonene, coumarin, and
- ² eugenol, they have determined that those are
- ³ all Group 3 chemicals, and the definition --
- ⁴ or at least the statement of a Group 3 is
- ⁵ that the agent is not classifiable as to its
- ⁶ carcinogenicity to humans. Correct?
- MS. O'DELL: Object to the form.
 - A. Yeah, that's right. And you've
- ⁹ also got to consider what routes of
- ¹⁰ administration they examined. Right?
- So, you know, if you look at the
- coumarin monograph, you don't find where it's
- been administered vaginally in any animal to
- ⁴ ascertain whether that would pose a risk.
 - (Exhibit No. 29 marked)
- ¹⁶ BY MR. ZELLERS:
- Q. Exhibit 29 are the excerpts from
- ⁻⁸ the IARC eugenol monograph.
- ¹⁹ A. Is this Monograph 36? Yeah,
- ²⁰ Volume 36.
- So, again, the entire monograph
- 22 that I have is 363 pages long.
- Q. You have that, and you have that
- ²⁴ in front of you. Is that right?

I mean, what the body turns it into matters, so BY MR. ZELLERS: Q. Okay, Doctor. I want to finish, so please finish your answer and let me ask my next question.

Page 274 Page 276 1 if you --¹ the same -- so this is from 101. Mine is ² also 101. Yeah. Yeah. I mean, each of these ³ IARC monographs needs to be considered in ³ BY MR. ZELLERS: ⁴ whole, not just which parts suit your Q. We're in sync? ⁵ position, that the absence of human studies Yeah. Mine -- you know, again, ⁶ means that somehow these are safe. That's ⁶ I think you've got snips here. You've only got a few pages of the entire report. ⁷ not the conclusion that a person of skill in ⁸ the art would conclude. You, though, have the full So there were carcinogenicity report on --¹⁰ studies on the metabolites, and other 10 A. I do. ¹¹ bio-relevant factors are considered. 11 -- your computer. Is that Q. 12 right? ¹² BY MR. ZELLERS: 13 O. You're referring to the animal 13 A. I do. study in rats. Is that right? 14 IARC has classified benzophenone Q. Mice, rats, guinea pigs. They as a 2B chemical. Is that right? ¹⁶ did IV admin of multiple different doses in A. I believe so. dogs. All of that is considered when these 17 2B, according to IARC, means the O. monographs are generated. agent is possibly carcinogenic to humans. Is 19 And after all of that analysis that right? ²⁰ and after all of that review, the IARC expert 20 A. Yes, 2B means possibly panel determined that eugenol was a Group 3 carcinogenic to humans. ²² agent that was not classifiable as to its It's true, is it not, that there carcinogenicity to humans. Correct? ²³ are no human studies linking the use of That was the conclusion, yeah. benzophenone to any type of cancer. Correct? Page 277 Page 275 MS. O'DELL: Object to the form. 1 Q. Let me --Yeah, the IARC monograph says no A. And the conclusion in the ³ monograph actually states it very clearly as data were available to the working group. ⁴ to why they drew that conclusion. It says, ⁴ BY MR. ZELLERS: ⁵ "The evaluation is there is limited evidence Q. With respect to animal studies, ⁶ for carcinogenicity of eugenol in benzophenone exposure has only been associated with an increased incidence of ⁷ experimental animals. In the absence of ⁸ epidemiological data, no evaluation can be hepatocellular cancer, histiocystic sarcoma, ⁹ made of the carcinogenicity of eugenol in leukemia, and renal tubal adenoma. Correct? ¹⁰ humans." Let's see here. Hepatoblastoma 11 ¹¹ in male mice, histiocystic sarcoma in Q. Let me ask you now about ¹² benzophenone. That is the last agent that females -- female mice, increased incidence 13 you cite or reference IARC as a source for of mononuclear cell leukemia in male and ¹⁴ its carcinogenicity. Is that right? ¹⁴ female rats. Renal tube adenoma in male I think I also cited the rats, histiocytic sarcoma in female rats, and ¹⁶ national -- the NTP technical report, which ¹⁶ tumors in the kidney, yeah. is 267 pages long, and --17 There are no animal studies linking the use of benzophenone with an 18 O. Take a look at -increased risk of ovarian cancer. Correct? 19 -- the IARC monograph. A. 20 All right. Take a look, if you MS. O'DELL: Object to the form. will, at the IARC monograph, the excerpts, 21 Just a moment. There's more ²² relating to benzophenone, Exhibit 30. ²² because don't forget there's an NTP report, ²³ too. And, frankly, NTP is extraordinarily 23 (Exhibit No. 30 marked) Yeah. It looks like we've got

24

²⁴ thorough. So let's go look at that.

Page 278 Page 280 So according to the National ¹ feed study controls, and the incidence in the ² 625 part per million group exceeded the ² Toxicology Program, male rats receiving ³ benzophenone had severe kidney nephropathy, ³ historical control range for all routes. ⁴ kidney tumors, and leukemia. Female rats had In the current two-year study, ⁵ only females were affected, and the liver and ⁵ higher rates of leukemia, liver tumors, ⁶ increased severities of kidney nephrology, ⁶ lung were involved in all affected females. ⁷ metaplasia, epithelia of the nose and The histiocytic sarcomas were 8 hyperplasia of the spleen. Some female mice 8 highly invasive in all three 1,250 PPM mice. ⁹ also developed rare histiocytic sarcomas. I Multiple organs throughout the body had ¹⁰ believe those were associated with the neoplastic histiocytic legions; ovaries, ¹¹ repro- -- female reproductive organs. uterus, spleen, adrenal gland, kidney, The NTP program also concluded urinary bladder, and multiple lymph nodes ¹³ that benzophenone caused cancer -- kidney were affected in all three animals. ¹⁴ cancer in male rats, liver tumors in male 14 MR. ZELLERS: Move to strike as ¹⁵ mice, and histiocytic sarcomas in female 15 nonresponsive. ¹⁶ mice. 16 BY MR. ZELLERS: 17 ¹⁷ BY MR. ZELLERS: O. Doctor --18 At least based upon the 18 MS. O'DELL: I oppose the 19 19 information you have available to you and motion. ²⁰ that you're reading from, there is not an 20 BY MR. ZELLERS: ²¹ animal study cited by NTP that associates 21 On Page --²² benzophenone in animals with an increased 22 THE REPORTER: I did not hear ²³ risk of ovarian cancer. Correct? 23 you. 24 Yeah, so, you know --MS. O'DELL: I oppose the Page 279 Page 281 1 Q. Is that correct? motion. A. That's correct, but the question ² BY MR. ZELLERS: ³ really requires some qualification. There is On Page 21, you state that the ⁴ no ovarian cancer animal model that I am ⁴ Environmental Protection Agency designated ⁵ p-Cresol, or para-Cresol, as possibly ⁵ aware of. And if you look in the report ⁶ issued by Canada and their health ministry, ⁶ carcinogenic. Is that right? ⁷ they state that. There is no animal model A. Yes. ⁸ for ovarian cancer. Do you know what studies the EPA Q. Are you ready for my next reviewed in determining that p-Cresol is a O. potential carcinogen? ¹⁰ question? 11 11 I believe that I found a report Yes. Just one moment, please. A. You were asking about to support that, and it was the -- also in ¹³ benzophenone, and I knew there was an the NTP report. I also found "The tumor-¹⁴ association with ovaries. So this is from promoting -- tumor-promoting action of phenol 15 the NTP report, and I'm going to read it. and related compounds" --¹⁶ Histiocytic sarcoma in females. There was a 16 THE REPORTER: Doctor. 17 ¹⁷ positive trend in the incidence of THE WITNESS: I'm sorry. histiocytic sarcomas, all organs. The 18 THE REPORTER: I don't know if ¹⁹ evidence in 625 part per million females was 19 I'm going to have that, so can you try 20 ²⁰ significantly greater than that in the to read a little slower? ²¹ controls. 21 THE WITNESS: Yeah. 22 22 That's from Table 17 in D3 of The report titled "The ²³ that particular report. Only two histiocytic tumor-promoting action of phenol and related

²⁴ sarcomas have been observed in historical

compounds for mouse skin" by Boutwell and

1 answer my 2 MS. O'DELL: willing to 3 respond to you. But you don't get to 4 dictate what his response is going to 5 be. 6 MR. ZELLERS: But I do get to 7 ask him for a response. 8 MS. O'DELL: And he gave you 9 one. 10 MR. ZELLERS: Well 11 BY MR. ZELLERS: 12 Q. Doctor, you are not aware of any 13 human study associating p-Cresol with any 14 type of ovarian cancer. Correct? 15 MS. O'DELL: Object to the form, 16 asked and answered. 17 A. So, as I said, I don't think 18 that any regulatory authority in the world 19 would allow me to administer para-Cresol to a 20 human ovary. It wouldn't happen. 21 BY MR. ZELLERS: 22 Q. Are you	1 BY MR. ZELLERS: 2 Q. Is there 3 A. So 4 Q any study that associates 5 p-Cresol or para-Cresol with ovarian 6 cancer in humans? 7 A. That study would never be done. 8 So, no, that doesn't exist. It is unethical 9 to dose ovaries with para-Cresol. 10 Q. Are you aware of any observation 11 of an increased risk of ovarian cancer with 12 exposure to para-Cresol or para-Cresol in 13 humans? 14 MS. O'DELL: Object to the form. 15 A. So I believe I mentioned this 16 before. There was a positive validated 17 cytogenic response in Chinese hamster ovary 18 cells, including DNA damage to human 19 lymphocytes, and morphological 20 transformations in mouse fibroblasts. 21 All three of those studies are 22 done with cell lines. They are in vitro,
1 answer my 2 MS. O'DELL: willing to 3 respond to you. But you don't get to 4 dictate what his response is going to 5 be. 6 MR. ZELLERS: But I do get to 7 ask him for a response. 8 MS. O'DELL: And he gave you 9 one. 10 MR. ZELLERS: Well 11 BY MR. ZELLERS: 12 Q. Doctor, you are not aware of any 13 human study associating p-Cresol with any 14 type of ovarian cancer. Correct? 15 MS. O'DELL: Object to the form, 16 asked and answered. 17 A. So, as I said, I don't think 18 that any regulatory authority in the world 19 would allow me to administer para-Cresol to a 20 human ovary. It wouldn't happen. 21 BY MR. ZELLERS:	1 BY MR. ZELLERS: 2 Q. Is there 3 A. So 4 Q any study that associates 5 p-Cresol or para-Cresol with ovarian 6 cancer in humans? 7 A. That study would never be done. 8 So, no, that doesn't exist. It is unethical 9 to dose ovaries with para-Cresol. 10 Q. Are you aware of any observation 11 of an increased risk of ovarian cancer with 12 exposure to para-Cresol or para-Cresol in 13 humans? 14 MS. O'DELL: Object to the form. 15 A. So I believe I mentioned this 16 before. There was a positive validated 17 cytogenic response in Chinese hamster ovary 18 cells, including DNA damage to human 19 lymphocytes, and morphological 20 transformations in mouse fibroblasts. 21 All three of those studies are

¹ considered by IARC, NTP, and so forth.

According to this report, Derek ³ and Lewis studied the cellular toxicity

- ⁴ effects against CHO cells in a culture for 20
- ⁵ hours with para-Cresol at a concentration
- ⁶ of 1,000 micrograms per mil, and they -- they
- ⁷ found these results, which are indicative of
- ⁸ toxicity.

14

- ⁹ BY MR. ZELLERS:
- 10 O. You do not know the
- ¹¹ concentration or the amount of p-Cresol or
- para-Cresol in baby powder or Shower to
- ¹³ Shower. Correct?
 - MS. O'DELL: Object to the form.
- 15 Again, Johnson & Johnson never ¹⁶ provided the information in order to do any
- kind of analysis like that.
- ¹⁸ BY MR. ZELLERS:
- 19 Q. You also have not made any
- ²⁰ estimate or evaluation and have no
- ²¹ information as to the exposure of women to
- ²² either baby powder or Shower to Shower.
- ²³ Correct?

24

MS. O'DELL: Object to the form.

Page 287

17

20

24

- Yeah, so I can't do that without
- ² the information that Johnson & Johnson did
- 3 not provide, so --
- ⁴ BY MR. ZELLERS:
- On Page 21 of your report, you
- ⁶ state that the European Food Safety Authority
- ⁷ found that there is substantial evidence that
- 8 ethyl methylphenylglycidate --
- I'm sorry. What page did you A. ¹⁰ say?
- 11 Page 21 -- has genotoxic
- potential from the available in vitro and ¹³ in vivo studies.
- 14 Did you make that statement?
- 15 A. I didn't make that statement.
- ¹⁶ The European Food Safety Authority did.
- 17 Do you know whether these
- 18 studies were conducted on animals or humans?
- 19 Usually those studies are
- conducted on animals.
- 21 Do you know what doses of the
- 22 chemical the study subjects, the animals,
- ²³ were exposed to?

24

I didn't commit them to memory,

Page 288 ¹ but we could go check the underlying study.

- What evidence are you relying on
- ³ that this molecule is associated with ovarian 4 cancer?
 - A. Let's go take a look. So sister
- ⁶ chromatid exchange and chromosomal
- ⁷ aberrations in Chinese hamster ovary cells,
- ⁸ the concentration was 16 to 160 micrograms
- per milliliter in the Galloway study.

Let's go take a look at the

- ¹¹ European Food Safety Authority studies if you ¹² like.
- 13 Any human study or study of Q. ethyl methylphenylglycidate --
 - A. Human tox studies aren't
- performed, as we've discussed.
 - So the answer is no. Correct?
- No human toxicology study. Correct?
 - MS. O'DELL: Object to the form.
 - That's correct. A.
- BY MR. ZELLERS:
- Juniperus communis fruit oil.
- ²³ You state that the CIR expert panel concluded
 - that there is insufficient information

Page 289

- ¹ available to support the safety of juniperus
- communis fruit oil for use in cosmetics.
 - Did you make that statement?
- I believe I quoted the CIR A. review panel.
 - O. Do you know what --
- So it's not really a statement.
- It's -- it's a citation to those folks.
- Do you know what information the
- CIR expert panel considered? 11
 - Yeah, I read the report. A.
- Do you know if it was related to O. ¹³ any type of cancer?
 - A. I would have to go back and
- review the report. Juniperus communis fruit oil is 16 O.
- fruit oil. Correct?
 - It's juniper fruit oil, I
- believe, which -- I mean, it's a -- it's an
- extract. Right? So I think, actually,
- 21 that's one that's actually a combination of
- ²² many things. I don't think it's one unique
- ²³ chemical, if my memory serves me.
 - On Page 48, you state that the

Page 292 ¹ European Scientific Committee on Health and ¹ assessment. ² Environmental Risk has classified musk ketone So this is consistent with how I ³ as a Category 3 carcinogen. Is that right? ³ have worked in the past in doing safety I'm sorry. What page did you ⁴ analyses on other compounds. ⁵ BY MR. ZELLERS: 5 say? Q. What the Scientific Committee on Q. Page 48. Again, I didn't state it. I'm ⁷ Health and Environmental Risk looked at was a A. just citing the source. chemical called musk xylene. Is that right? You went out and you did your That's what it says. A. ¹⁰ search and collected information, and here 10 O. If you take a look at the ¹¹ you're citing from an entity called SCHER, 11 information that they considered in ¹² S-C-H-E-R, which is the Scientific Committee classifying musk ketone as a Category 3 13 on Health and Environmental Risk with the ¹³ carcinogen -- look on Page 3, under opinion, ¹⁴ European Commission. Is that right? ¹⁴ the second paragraph of 3.1, introduction. 15 ¹⁵ Do you see that? A. Yes. 16 16 (Exhibit No. 31 marked) A. Yes. 17 BY MR. ZELLERS: What SCHER -- the committee O. 18 Take a look at Deposition states, "Musk xylene has been classified as 19 Exhibit 31. This document sets forth the 'Category 3 carcinogen'" --20 A. Uh-huh. ²⁰ classification of a musk ketone. Is that 21 Q. -- "based on an 80-week oral 21 right? And again --22 ²² carcinogenicity study in mice and absence of A. Yep. genotoxicity. The classification of musk 23 Q. Strike that. 24 ²⁴ xylene as 'Category 3 carcinogen' is Turning to the third page in the Page 291 Page 293 ¹ second paragraph under background, it states, 1 considered as a borderline case since an ² "The recommendation for carcinogenic ² increase in liver tumors in the highly ³ Category 3 was obtained by reading-across ³ sensitive B6C3F1 mouse is considered of ⁴ from musk xylene (which is classified as such ⁴ little relevance for human hazard ⁵ since the 29th ATP), since there are no test 5 assessment." ⁶ data on carcinogenicity on musk ketone Did I read that correctly? ⁷ itself." Yes, I believe you did. A. 8 All right. Musk xylene is Is that right? classified as a Category 3 carcinogen based 9 That's right. A. on this study of mice. Correct? 10 So the classification was based 11 11 on studies of a chemical that is similar to Well, I mean, you just read the musk ketone, but not on studies that actually paragraph to me. It's an 80-week oral study. ¹³ involved musk ketone. Correct? 13 Now, in this -- in this case, I'd like to see 14 MS. O'DELL: Objection to form. an 80-week vaginal study. A. That's correct. And you make 15 Okay. You've got to answer --¹⁶ a -- this is, I think, an important ¹⁶ please answer my questions. ¹⁷ circumstance here. Because this is how the 17 This classification was based ¹⁸ SafeBridge folks classify compounds. They do upon an animal study; in this case, mice. Is ¹⁹ a read-across. that correct? 20 20 What does this particular A. Yes. 21 compound have in common with others that are 21 The mice were highly predisposed 22 like it? And as part of that, they examine to cancer. Is that right? ²³ the available literature in animal studies I mean, they said highly ²⁴ and in vitro studies to make that sort of ²⁴ sensitive. I don't know that that means

Page 294 Page 296 ¹ they're predisposed or not, but --¹ only thing I want to clarify is that you and This animal study does not ² I were in agreement that at least with musk ³ xylene, there was no animal study associating ³ relate in any way to ovarian cancer. ⁴ that chemical or musk ketone with ovarian ⁴ Correct? 5 cancer. Correct? A. I wouldn't --MS. O'DELL: Object to the form. 6 A. That's correct. 7 THE WITNESS: Sorry. Q. All right. 8 Yeah, I wouldn't call it that. It's got similar properties to musk xylene, but it does not have BY MR. ZELLERS: carcinogenic studies in animals. 10 Q. You would agree with me that it doesn't relate to ovarian cancer? 11 In your report, Section 4.4, you 12 No, not really. No. discuss the fragrance chemicals that are 13 MR. ZELLERS: Let's take a break classified as irritants. Is that right? 14 so we can change our disc. ¹⁴ This is Page 27. 15 I think so, yes. THE WITNESS: Okay. Α. 16 THE VIDEOGRAPHER: Going off the 16 You rely on hazard statements O. 17 record, the time is 4:01 p.m. from the GHS. Is that right? 18 (Recess from 4:01 p.m. to 18 A. GHS and -- and OSHA. 19 You have a discussion here about 4:21 p.m.) O. 20 THE VIDEOGRAPHER: This marks whether the GHS classifies the chemical as an 21 the beginning of Disc 4. Back on the irritant or sensitizer. Is that right? 22 record, the time is 4:21 p.m. I'm sorry. What's your -what's your question? ²³ BY MR. ZELLERS: Sure. My question is --Dr. Crowley, I want to go back O. Page 295 Page 297 ¹ just to the Deposition Exhibit 31. I thought A. Are you asking me if I described ² I asked you a couple of questions at the end them? Yes, I did. ³ of our last session which were clear, but All right. GHS also has ⁴ classifications for the carcinogenicity of ⁴ when I glanced back at our real-time ⁵ transcript, they did not look clear. chemicals. Is that right? MS. O'DELL: The last exhibit I I believe so, yes. 6 A. 7 have is 30. Am I wrong? Those categories are H350, may cause cancer; H350i, may cause cancer by 8 THE WITNESS: It's the musk 9 inhalation; and H351, suspected of causing ketone. 10 MS. O'DELL: Musk ketone. cancer? 11 11 Excuse me. Okay. Sorry. MS. O'DELL: Object to the form. ¹² BY MR. ZELLERS: ¹² BY MR. ZELLERS: Q. My only question that I want to 13 13 Q. Is that right? ¹⁴ clarify is we had some discussion about a That is consistent with my ¹⁵ study involving mice and musk xylene. That recollection. I think they may have a few 16 study did not -- was an animal study, but it ¹⁶ more, but I could be wrong. I'd have to look 17 ¹⁷ did not relate in any way to ovarian cancer. at it. 18 ¹⁸ Is that correct? The GHS, to your knowledge, has 19 MS. O'DELL: Object to the form. not classified any of these chemicals as may A. Yeah. I mean, that was a -cause cancer or suspected of causing cancer. ²¹ where was it? I'm sorry. We were on Page 3. ²¹ Correct? 22 ²² Where was the dadgum thing? It was --MS. O'DELL: Object to the form. 23 ²³ BY MR. ZELLERS: I don't believe that I looked 24 I was looking on Page 3. The ²⁴ for that.

Page 298 Page 300 ¹ BY MR. ZELLERS: ¹ information is a predecessor to the GHS ² system. Correct? Q. Are you aware of any MS. O'DELL: Object to the form. ³ classification by GHS with respect to any of ⁴ the chemicals that you identify in your A. I don't know which came first, ⁵ report where GHS has classified the chemicals to be candid with you, so --⁶ as either may cause cancer or suspected of BY MR. ZELLERS: ⁷ causing cancer? Q. They contain similar type 8 I think there were -information? 9 MS. O'DELL: Object to the form, A. Yeah. 10 10 asked and answered. O. What methodology did you use to 11 determine that chemicals that GHS classifies THE WITNESS: Sorry. 12 as irritants or sensitizers but not A. I think there were some that ¹³ were marked as suspected, and they -carcinogens contribute to cancer? 14 BY MR. ZELLERS: MS. O'DELL: Object to the form, Are those in your report? 15 15 O. mis- -- lack of foundation. 16 I believe they're in the So, you know, as I was stating appendices. I think I put them in there. Do previously, irritants, sensitizers, you want me to search for them? allergens, and so forth all elicit immune 19 Q. No. What I want you to do, responses -- I'm sorry -- inflammatory though, is -- you collected this information responses, and increases in inflammation have regarding the different chemicals. Correct? ²¹ been associated with a higher risk for 22 ²² cancer. A. Yes. 23 MS. O'DELL: Object to the form. 23 BY MR. ZELLERS: 24 For each of the chemicals that Page 299 Page 301 ¹ BY MR. ZELLERS: ¹ you list in Section 4.4 that are classified ² as irritants, do you know how much exposure That would have included any GHS ³ assessments of the chemicals, including ³ is necessary to cause irritation? ⁴ whether they may cause cancer or are MS. O'DELL: Object to the form. ⁵ suspected of causing cancer. Correct? A. It varies on a case-by-case ⁶ basis. I did make every effort to identify No. I looked at MSDS sheets, ⁷ and find those underlying studies, including ⁷ and I also looked at fragrance companies that ⁸ had some of that information on their 8 studies that were published, you know, 70 ⁹ websites. years ago in the 1950s. Many of those studies were included in the fragrance 10 So the -- if I found the 11 monograph book that I purchased that outlined ¹¹ information in an MSDS, I recorded it. If it was listed on the fragrance company website, them that described the thresholds. ¹³ you know, I recorded that as well. 13 And, in addition, several of 14 I didn't buy access to the GHS ¹⁴ these compounds, as we talked about 15 system that has those listings for each and previously, have usage restrictions described ¹⁶ every chemical. I don't know how to do --¹⁶ by any number of authorities like the ¹⁷ European Food Safety Authority or the FDA. 17 how to get that access, so --And then, you know, the trade groups, you 18 To the extent you found any ¹⁹ information, you would have included it in know, IFRA and CIR have also, you know, published levels. your --21 21 BY MR. ZELLERS: Yes. A. 22 22 Q. With irritants, threshold levels -- appendices. Correct? Q. 23 ²³ or dosage is a necessary part of the A.

MSDS, those sheets or that

24

²⁴ analysis. Correct?

Page 302 Page 304

7

8

10

14

- MS. O'DELL: Object to the form.
- Yes. Irritants are threshold
- ³ based. You know, the important thing to
- ⁴ understand there is it's usually done on a
- ⁵ fairly small pool of people, and the
- ⁶ threshold is sort of an average of a group,
- ⁷ so it may vary from person to person.
- 8 BY MR. ZELLERS:
- As we discussed earlier, you did 10 not consider how much of each chemical is in
- 11 the finished product, either baby powder or
- ¹² Shower to Shower. Correct?
 - MS. O'DELL: Object to the form.
- 14 So we -- we've talked about this
- ¹⁵ a lot. We asked for the information from J&J
- ¹⁶ to enable doing that, and it was never
- provided. So I was unable to do that kind of
- ¹⁸ thing.

13

- 19 BY MR. ZELLERS:
- Q. You did not consider how much of ²¹ each chemical actually reached the ovary in
- ²² women. Correct?
- 23 MS. O'DELL: Object to the form.
- Yeah, I've answered that

- ¹ and then the GHS classifications; H315,
- ² causes skin irritation; H317, causes an
- ³ allergic skin reaction; R 36/38, irritating
- 4 the skin and eyes; R 43 --
 - THE REPORTER: Skin what?
- 6 Irritating the skin --
 - THE WITNESS: And eyes.
 - THE REPORTER: You're facing
- that way. Thank you.
 - If you make reference to a GHS
- 11 classification in the appendices, you had
- ¹² access, then, to the GHS classifications for
- ¹³ that chemical. Correct?
 - MS. O'DELL: Object to the form.
 - A. I got the information from a
- ¹⁶ number of sources. So MSDS sheets, fragrance
- company websites, the -- a number of sources,
- including the monograph of fragrance and
- 19 flavors also had some of those.
- 20 So, you know, if it's been
- 21 disclosed as an irritant or a skin sensitizer
- ²² but I was unable to find, you know, an MSDS

Page 305

- 23 that stated it as such -- you know, so, for
- ²⁴ example, I think that -- I mean, the balsam

Page 303

- ¹ question previously.
- ² BY MR. ZELLERS:
- Q. And that was not information
- ⁴ that you had available. Correct?
- MS. O'DELL: Object to the form.
- A. I wasn't asked to consider it,
- ⁷ and it wasn't available to me.
- ⁸ BY MR. ZELLERS:
- And at least on how much of a ¹⁰ chemical may reach the ovary, you'll defer to
- 11 other experts. Is that correct?
 - MS. O'DELL: Object to the form.
- 13 A. Yeah, potentially. I may get
- ¹⁴ reengaged to provide more testimony there.
- ¹⁵ BY MR. ZELLERS:
- 16 Q. What studies are you relying on
- ¹⁷ in classifying these chemicals in Section 4.4
- as irritants? Are they referenced in your
- 19 report?

- 20 Yeah, they're predominantly A.
- ²¹ listed in the appendices. So, for example,
- ²² if you go to Page 70, that's the Appendix A,
- ²³ and it starts with d-Limonene. You'll see
- ²⁴ that the fourth column there's a PubChem link

- ¹ Peru, one of the reasons it's restricted is
- ² because so many people are sensitive to it.
- ³ I didn't need a GHS to know that it was a
- ⁴ sensitizer.
- ⁵ BY MR. ZELLERS:
- Q. My question is a little
- different.
- If you reference a GHS
- category --
- 10 A. Yeah.
- 11 -- for a chemical in your Q.
- appendix, does that mean, for that chemical,
- 13 that you had access to the GHS data?
 - A. No. So you're asking did I look
- ¹⁵ at the underlying data from an MSDS sheet?
- ¹⁶ Not necessarily.
- 17 You know, I did a literature
- 18 review. I used Web of Science. I used
- ¹⁹ Google Scholar. You know, a number of these
- ²⁰ sources, including that monograph book,
- ²¹ provide the underlying data that you can go
- ²² to. 23 And so I cited that where
- 24 possible inside the report and in the

¹ appendices, and in many cases I did go read ² the underlying reports if I could get them.

Do you know whether, in the ⁴ reports that you looked at, that there was a pure concentration of the substance used or a ⁶ diluted chemical?

MS. O'DELL: Objection to the form.

A. Yeah, almost always in the early ¹⁰ studies they were mixing it with Vaseline and ¹¹ diluting it. And they, in some cases, would ¹² do multiple strengths. They were not ¹³ applying it at a 100 percent concentration, ¹⁴ nor were they applying it after it had been

¹⁵ blended with talc.

16 So the utility of those, you ¹⁷ know, studies could certainly vary. There ¹⁸ could be, certainly, instances where, you 19 know, blending with talc reduces the ²⁰ likelihood of irritation or sensitization or ²¹ an allergic response, and, to the contrary, ²² there may be circumstances where blending

²³ with talc could produce a stronger irritation ²⁴ or what have you.

MS. O'DELL: Object to the form.

Page 308

Page 309

A. I have found studies that link

³ inflammation to cancer. That's an

⁴ established link. That's indisputable. The

⁵ Canadians stated as much in their assessment ⁶ on peroneal application of talc, and these

⁷ fragrance chemicals are part of that product.

8 BY MR. ZELLERS:

Q. How --

13

10 A. It's all -- it's all part of one 11 product. 12

How do you define inflammation? O.

An inflammatory response. A.

14 How do the ingredients you identify as irritants cause inflammation? MS. O'DELL: Object to the form.

A. I can't believe I'm going to 17 have to explain how an irritant causes inflammation.

20 Inflammation is the result of ²¹ any number of insults to a tissue. Cell ²² death results in inflammation just as much as ²³ a burn does. So there's all sorts of

²⁴ chemicals, including cytokines and so forth,

Page 307

¹ BY MR. ZELLERS:

Those types of studies or ³ information was not available to you.

⁴ Correct?

11

17

8

5 MS. O'DELL: Objection to form.

A. No. Some of them were. I did go look at several of them.

⁸ BY MR. ZELLERS:

And you referenced them in the 10 appendices. Is that right?

> A. Yeah.

You have not done any scientific ¹³ analyses yourself as to whether or not a skin ¹⁴ or eye irritant can cause or contribute to ¹⁵ ovarian cancer in humans. Correct? 16 MS. O'DELL: Object to the form.

A. I have not done that study.

18 BY MR. ZELLERS:

19 You also have not found any ²⁰ studies on humans that support the statement 21 that irritation can lead to inflammation and ²² can contribute to ovarian cancer with respect ²³ to the chemicals you identify as irritants. 24 Is that right?

¹ associated with inflammation. It's so well

² understood, you can draw blood and mesh

³ concentrations in plasma and get a sense of

⁴ how inflamed someone is.

⁵ BY MR. ZELLERS:

At what dose does an irritant cause inflammation?

MS. O'DELL: Object to the form.

That varies on a case-by-case Α. ¹⁰ basis.

11 BY MR. ZELLERS:

As we discussed earlier, you 13 have not done any type of dose analysis with ¹⁴ respect to the chemicals or fragrance chemicals that you have identified in the ¹⁶ baby powder or Shower to Shower. Correct?

MS. O'DELL: Object to the form.

Yeah. I was unable to do it

because J&J didn't provide the information to enable such an analysis.

21 BY MR. ZELLERS:

17

Q. In your opinion, do both acute ²³ and prolonged inflammation contribute to ²⁴ ovarian cancer?

1 A. That's my understanding, yes. 2 Q. What study or studies are you 3 relying on for that statement? 4 A. Okay. Ness and Cottreau from 5 1999 these are from Dydek's paper. I can 6 also point you to the Canadian assessment on 7 the safety of talc where they also stated 8 that chronic inflammation and oxidative 9 stress are important factors in the 10 development and behavior of cancer, including 11 ovarian cancer. 12 But it might be better to rely 13 upon some of the other experts to address 14 that. But since you asked, I can list the 15 papers that I looked at. 16 Q. Okay. I don't need you to read 17 me the papers that are referenced in 1 A. 42? 2 Q. Yes. 3 MS. O'DELL: I don't think 4 that's the right page. 5 MR. ZELLERS: We looked at 6 earlier today. It was 7 BY MR. ZELLERS: 8 Q. So on Page 42 for methyl 9 salicylate 10 A. Salicylate. 11 Q salicylate, you identify the 12 IFRA acceptable level of use in dermal 13 cosmetics, the amount. Is that right? 14 A. I have listed the use level for 15 cosmetics and the dermal systemic exponents of them 16 cosmetic products. There's two of them 17 Q. We had the discussion before.	
2 Q. What study or studies are you 3 relying on for that statement? 4 A. Okay. Ness and Cottreau from 5 1999 these are from Dydek's paper. I can 6 also point you to the Canadian assessment on 7 the safety of talc where they also stated 8 that chronic inflammation and oxidative 9 stress are important factors in the 10 development and behavior of cancer, including 11 ovarian cancer. 12 But it might be better to rely 13 upon some of the other experts to address 14 that. But since you asked, I can list the 15 papers that I looked at. 16 Q. Okay. I don't need you to read 17 me the papers that are referenced in 2 Q. Yes. 3 MS. O'DELL: I don't think 4 that's the right page. 5 MR. ZELLERS: We looked at 6 earlier today. It was 7 BY MR. ZELLERS: 8 Q. So on Page 42 for methyl 9 salicylate 10 A. Salicylate. 11 Q salicylate, you identify the 12 IFRA acceptable level of use in dermal 13 cosmetics, the amount. Is that right? 14 A. I have listed the use level for 15 cosmetics and the dermal systemic exponsion. 16 Cosmetic products. There's two of them 17 Q. We had the discussion before.	
3 relying on for that statement? 4 A. Okay. Ness and Cottreau from 5 1999 these are from Dydek's paper. I can 6 also point you to the Canadian assessment on 7 the safety of talc where they also stated 8 that chronic inflammation and oxidative 9 stress are important factors in the 10 development and behavior of cancer, including 11 ovarian cancer. 12 But it might be better to rely 13 upon some of the other experts to address 14 that. But since you asked, I can list the 15 papers that I looked at. 16 Q. Okay. I don't need you to read 17 me the papers that are referenced in 3 MS. O'DELL: I don't think 4 that's the right page. 5 MR. ZELLERS: We looked at 6 earlier today. It was 7 BY MR. ZELLERS: 8 Q. So on Page 42 for methyl 9 salicylate 10 A. Salicylate. 11 Q salicylate, you identify the 12 IFRA acceptable level of use in dermal 13 cosmetics, the amount. Is that right? 14 A. I have listed the use level for 15 cosmetics and the dermal systemic expectation 16 cosmetic products. There's two of them 17 Q. We had the discussion before.	
4 A. Okay. Ness and Cottreau from 5 1999 these are from Dydek's paper. I can 6 also point you to the Canadian assessment on 7 the safety of talc where they also stated 8 that chronic inflammation and oxidative 9 stress are important factors in the 10 development and behavior of cancer, including 11 ovarian cancer. 12 But it might be better to rely 13 upon some of the other experts to address 14 that. But since you asked, I can list the 15 papers that I looked at. 16 Q. Okay. I don't need you to read 17 me the papers that are referenced in 4 that's the right page. 5 MR. ZELLERS: We looked at 6 earlier today. It was 7 BY MR. ZELLERS: 8 Q. So on Page 42 for methyl 9 salicylate 10 A. Salicylate. 11 Q salicylate, you identify the 12 IFRA acceptable level of use in dermal 13 cosmetics, the amount. Is that right? 14 A. I have listed the use level for 15 cosmetics and the dermal systemic expectation 16 cosmetic products. There's two of them 17 Q. We had the discussion before.

would be to do that study, but, again, there are some ethics involved in that.

³ BY MR. ZELLERS:

- Q. What study are you relying on to make the statement that fragrances that are identified as eye irritants are likely to rirritate the vaginal mucosa?
- A. It's common general knowledge.
 The same thing -- I mean, the same thing -- usually those that irritate eyes also
 irritate lungs. They're both mucous
- membranes. Not always, but it's a good and safe generalization.

 Are there studies that you are
- Q. Are there studies that you are aware of with respect to the irritation of the chemicals that you identified in your report as irritants to the vaginal mucosa?
- A. I would have to check. I think, like I said, I found three out of the 175 that have been studied in the -- for safety in the vagina. So only three out of the 175 have been examined in those studies. I'd
- need to go check and find out if any of them
 were found to be vaginal irritants.

Page 315

Q. If any were vaginal irritants, that would be information in your appendices.

³ Correct?

- ⁴ A. Presuming I found that, yeah.
- ⁵ Q. As you sit here, you're not --⁶ you don't at least have a recollection of

⁷ having found that?

- 8 A. There was --
- 9 MS. O'DELL: Object to the form.
- A. Yeah, there was such little
- ¹¹ information available on vaginal
- ¹² administration of this, I don't recall that
- ¹³ any -- if any of them were vaginal irritants.
- ¹⁴ BY MR. ZELLERS:
- Q. Sensitizers. In your report,
- ¹⁶ Section 4.5, you discuss the fragrance
- ¹⁷ chemicals that are classified as sensitizers.
- 18 Is that right?
- ¹⁹ A. Section 4.5 is on sensitizers,
- ²⁰ that's right.
- Q. What does sensitization have to do with the development of ovarian cancer?
- A. If you are exposed to a
- 24 sensitizer and you're sensitive to it, it can

¹ cause inflammation and oxidative stress.

- Q. Are you aware of any studies
- ³ which have looked at the use of sensitizers
- ⁴ in the development of ovarian cancer?
 - MS. O'DELL: Object to the form.

 To the best of my knowledge,
- ⁷ there is no good animal study for ovarian
- there is no good animal study for ovariar cancer. So I kind of feel like we keep
- ⁹ getting some of the same questions to which I
- of feel like I've already answered.
 - Q. What --
- ¹² A. So --

11

14

- O. Go ahead. Finish.
 - A. So, no, I don't think there are,
- 15 because there isn't a model that's
- 6 acceptable.
- ¹⁷ Q. What does sensitization have to ¹⁸ do with the development of cancer?
- A. I just stated that sensitizers
- ²⁰ can cause inflammation and oxidative stress,
- which are associated with a greater risk of cancer.
- Q. Are you aware of any studies relating to how sensitizers are related to

Page 317

Page 316

¹ the development of cancer in humans?

MS. O'DELL: Object to the form,

asked and answered.

⁴ A. I feel like I just answered that

⁵ question, so same answer. They cause

- ⁶ oxidation -- oxidative stress and
- ⁷ inflammation.
- ⁸ BY MR. ZELLERS:
- ⁹ Q. My question, though, is: Are
- ¹⁰ you aware of any studies that demonstrate
- 11 that, sensitizers and the development of
 - ² cancer?

13

14

21

- A. I would have --
 - MS. O'DELL: Asked and answered.
- A. Yeah. I would have to provide
- ¹⁶ the same response, and I feel like I've
- answered the question, so --
- 18 BY MR. ZELLERS:
- ¹⁹ O. And I don't --
- A. In humans?
 - Q. -- mean to be disrespectful --
- A. Are you asking in humans?
 - Q. In humans, yes. In humans,
- ²⁴ you're not aware of any studies. Correct?

Page 318 Page 320 You know, again, this is an ¹ basis. Some of that information was made ² available in the underlying data that I ² ethics question. I -- I don't think the FDA ³ would let me take, for example, Peru balsam ³ looked at where they published the -- the ⁴ no-adverse-event level. ⁴ and, you know, gavage a female's ovaries. I ⁵ don't think that they would ever approve that I did find some where it varied ⁶ protocol, and I think if I did submit one to ⁶ study to study. So it -- it, again, is -- is ⁷ information that was available in some of the ⁷ them like that, I don't think any of my ⁸ reports. Some of it, the underlying data ⁸ subsequent protocols would ever be considered. wasn't present. 10 The studies that you found for MR. ZELLERS: Move to strike as O. each of the chemicals you referenced in the 11 nonresponsive. ¹² BY MR. ZELLERS: appendices. Correct? 13 Q. My question simply was: Are you A. Where I found them, yes, sir. 14 aware of any human study of sensitizers and You did not make any the development of cancer? determination that a sensitizer can cause or 16 I believe your answer is "no." contribute to ovarian cancer in humans. Is 17 17 that right? Correct? 18 A. No. You're not ethically 18 MS. O'DELL: Object to the form, allowed to do that. 19 19 asked ---20 Q. Are you aware of any studies? 20 A. The same question that I've 21 answered previously. The same answer. MS. O'DELL: He just answered 22 BY MR. ZELLERS: 23 23 MR. ZELLERS: What did he say, Q. And the answer is "no." 24 Ms. O'Dell? What was his answer? ²⁴ Correct? Page 319 Page 321 1 MS. O'DELL: His answer, "No. A. We can go back through my 2 You're not ethically allowed to do testimony. 3 that." Well, I'm talking about --Q. 4 4 There are no studies --MR. ZELLERS: All right. Is his Α. 5 answer, no, there are no such studies? Q. Go ahead. 6 MS. O'DELL: I think he said, Α. There are no studies because 7 "No," period, "You're not ethically they are unethical. allowed to do that." 8 What is the basis for your Q. 9 opinion that chemicals that cause MR. ZELLERS: Okay. If he 10 said --¹⁰ sensitization cause inflammation? 11 11 MS. O'DELL: I'm reading back MS. O'DELL: Object to the form, 12 his answer from the court reporter. asked and answered. 13 MR. ZELLERS: If he said, "No," A. It's an insult to tissue or a 14 period, then I'm okay with that. ¹⁴ cell, and inflammation is a response as part 15 MS. O'DELL: Do you need to of that, as is, in many cases, oxidative 16 clarify that, Dr. Crowley? ¹⁶ stress. 17 A. There are no studies because ¹⁷ BY MR. ZELLERS: you're not allowed to do the study. 18 Section 4.6 of your report, you 19 BY MR. ZELLERS: discuss that -- the fragrance chemicals that are classified as allergens. Is that right? Thank you. For each of these

21

A.

Yep.

²⁴ the substance. Is that right?

Allergens only produce a

²³ response in individuals who are allergic to

²² much exposure is necessary to cause

²³ sensitization?

24

²¹ chemicals, these sensitizers, do you know how

You did not make any assessment If it was referenced in the ³ as to how much exposure is necessary to cause studies you looked at, you would include it ⁴ an allergic response with these allergens. ⁴ in your appendices? ⁵ Is that right? A. I tried to, yeah. With respect to Shower to Shower MS. O'DELL: Object to the form. or baby powder, you did not make any A. Yeah. I couldn't do that assessment as to whether there was sufficient ⁸ because J&J didn't provide the information, exposure to result in a critical effect. as we've discussed. ¹⁰ Correct? ¹⁰ BY MR. ZELLERS: 11 11 Any studies that you're relying A. Yeah, I couldn't --¹² on to classify these chemicals as allergens, 12 MS. O'DELL: Object to the form. would they be referenced in your appendices? 13 A. I couldn't do that because I 14 Yes, where -- where identified. 14 didn't have the information from J&J to 15 enable to do that. yeah. 16 16 O. You are not expressing an THE REPORTER: Try and keep your ¹⁷ opinion that exposure to an allergen can 17 voice up when giving your answer, cause or contribute to ovarian cancer. 18 please. 19 ¹⁹ Correct? THE WITNESS: Sorry about that. 20 A. That's --BY MR. ZELLERS: 21 As best you can tell, MS. O'DELL: Object to the form. O. 22 Yeah, that's correct. I'm not phototoxicity is not related to ovarian cancer. Correct? expressing that opinion. 24 24 I'm sorry. Say that again. Page 323 Page 325 ¹ BY MR. ZELLERS: O. Phototoxicity is not related to Q. Section 4.7, you identify a ovarian cancer. Correct? 3 number of components that IFRA has designated To the best of my knowledge, ⁴ as having a critical effect. Is that right? ⁴ yeah. 5 A. Yes. Q. IFRA Category 5 restriction, According to Table 11, those ⁶ Section 4.8, you identify a number of 6 O. ⁷ critical effects are sensitization, dermal ⁷ components for which IFRA has established a sensitization, and phototoxicity. Correct? Category 5 restriction. Is that right? There's also one with a Α. Yes. ¹⁰ potential for nitrosamine formation. That means IFRA has capped the 11 THE REPORTER: I'm sorry. Say ¹¹ usage levels due to concerns about dermal 12 sensitization or allergic response. Is that it again. 13 THE WITNESS: Potential for 13 right? 14 14 nitrosamine formation. A. I don't know that that's the only two concerns that they cited in putting

¹⁵ BY MR. ZELLERS:

- 16 Q. For each of these chemicals, do you know how much exposure is necessary to ¹⁸ cause the given critical effect?
- 19 A. Are you asking about from baby powder or Shower to Shower, or are you asking ²¹ about pure chemical?
- 22 Q. The first question is pure ²³ chemical.
- 24 Yeah, some of that was in the
- ²⁰ I think there are a lot of factors. 21 For each of these chemicals, do ²² you know how much exposure is necessary to ²³ cause an allergic or sensitization response? 24

¹⁷ Category 5 includes not just baby powder and

¹⁸ talcs, but facial creams, facial makeup, hand

¹⁹ creams, facial masks, hair -- hair permanent.

Again, it's case by case, and

¹⁶ these Category 5 caps in place, because

¹ the underlying information is, generally ² speaking, available.

Q. You have no opinion, though,

⁴ with respect to any of these chemicals in

- ⁵ baby powder or Shower to Shower as to whether
- ⁶ or not there is a sufficient exposure to
- ⁷ cause an allergic or sensitization response.
- 8 Correct?
- 9 MS. O'DELL: Object to the form.
- 10 A. You know, if your client wants
- 11 to provide me that information, perhaps I
- could make that judgment, but I don't have
- ¹³ it.
- 14 BY MR. ZELLERS:
- 15 Q. If IFRA relied on studies in
- ¹⁶ setting these Category 5 restrictions on the chemicals you identify in your report, you
- 18 attempted to include that in your appendices?
- MS. O'DELL: Object to the form.
- 20 A. Yes, I did.
- 21 BY MR. ZELLERS:
- O. Do you know whether the studies
- 23 that IFRA looked at on setting these
- ²⁴ Category 5 restrictions were studies

- ¹ have been glued to talc particles,
- ² administered to the peritoneal area, which

Page 328

Page 329

- ³ subsequently enters the vagina, and where
- ⁴ that talc particle goes, those fragrance
- chemicals go with it. They have
- demonstrated -- many of them -- demonstrated
- ⁷ biological activity in animal and in vitro
- cell models that demonstrates toxicity and
- carcinogenicity.
- And so -- excuse me. I'm not
- ¹¹ done yet. I don't know how else to state it.
- I think they can absolutely contribute to the
- carcinogenicity of the product in total.
- BY MR. ZELLERS:
- In this section, in terms of the
- carcinogenicity, you do not know or have any
- information as to whether any of these
- ingredients in Johnson's baby powder or
- Shower to Shower exceed the IFRA
- restrictions. Correct?
- 21 MS. O'DELL: Object to the form.
- 22 Yeah, I don't know because I was
- never given the composition by Johnson &
- ²⁴ Johnson.

Page 327

- ¹ involving a pure concentration of the
- ² substance or a diluted substance?
- You know, it was both. I mean,
- ⁴ IFRA publishes a lot of these studies in
- ⁵ peer-reviewed journals, you know, as opposed
- ⁶ to CIR, which doesn't always do that. So, I
- ⁷ mean, there's some transparency there with
- ⁸ IFRA. So you can go read those in the
- ⁹ Journal of Food Science and Toxicology.
- ¹⁰ whatever it's called.

11

19

- So, yeah, all those are
- ¹² disclosed in the peer-reviewed literature. I
- ¹³ did review them where possible.
- 14 You're not expressing an opinion
- ¹⁵ as to whether or not the chemical substances
- 16 that you identify in this section of your
- 17 report, 4.8, either cause or contribute to
- ¹⁸ ovarian cancer. Correct?
 - MS. O'DELL: Object to the form.
- 20 Actually, I am. I mean, I've
- 21 stated fairly clearly, I feel, that, you
- ²² know, you've got a whole bunch of irritants,
- ²³ you've got a whole bunch of sensitizers, and
- ²⁴ you've got a whole bunch of allergens that

¹ BY MR. ZELLERS:

- Q. With respect to the chemicals
- ³ that are identified in this section of your
- ⁴ report dealing with the IFRA Category 5
- ⁵ restrictions, you have no information that
- ⁶ the amount of the chemical in baby powder or
- ⁷ Shower to Shower exceeded the IFRA
- restrictions. Correct?
 - MS. O'DELL: Object to the form.
- 10 A. Isn't that the same question you just asked?

12 BY MR. ZELLERS:

- 13 Can you answer the question?
- 14 MS. O'DELL: He previously 15 answered the question. I'll object as
- 16 asked and answered. You may repeat
- 17 your answer, Dr. Crowley. You can 18 refer back and ask the court reporter
- 19 to repeat the answer, whichever you 20
 - prefer.

- 21 A. I think that -- I believe that
- ²² I've answered this close to 15 times today,
- maybe -- maybe nearly 20.
 - I've not been provided with the

Page 330 Page 332 ¹ quantitative composition of the Johnson & ¹ FDA inactive ingredient list, it is likely to ² Johnson fragrance mix in the baby powder or ² contribute to the development of ovarian ³ Shower to Shower product. I can't make any ³ cancer. Correct? ⁴ judgments to that without that, as I think MS. O'DELL: Object to the form. ⁵ you well know. So I can't understand the ⁶ BY MR. ZELLERS: question because you've got two nots, so maybe just ask me what my opinion is. O. In this section --BY MR. ZELLERS: So I can't determine if the A. Well, you expressed your opinion Category 5 restrictions have been exceeded or not without that information. Right? ¹⁰ in your report. Is that right? 11 11 In the Category 5 restrictions, A. Yes. 12 Is it your opinion that an dose or concentration would be important to O. 13 your analysis. Is that right? 13 ingredient that's not listed on the FDA 14 MS. O'DELL: Objection to form. inactive ingredient list is likely to contribute to the development of ovarian 15 So, for example, cinnamal has a ¹⁶ Category 5 restriction of 0.05 percent. cancer? ¹⁷ Since I don't know how much is present, I 17 You asked me if it's my opinion Α. ¹⁸ can't make a judgment as to whether the that if it's absent from that IID it's likely ¹⁹ cinnamal present in baby powder exceeds to cause ovarian cancer? 20 0.05 percent or not. There's a bunch of 20 Q. Correct. 21 21 other fragrance chemicals here too that have MS. O'DELL: Object to the form. ²² these restrictions similar to Shower to ²² BY MR. ZELLERS: 23 ²³ Shower. Let's save each other some time. I That's not your opinion, is it? ²⁴ can't make that judgment because your client A. No. Page 331 Page 333 MR. ZELLERS: I have no further ¹ hasn't given me the information to be able to 1 2 ² do that. questions. Thank you. 3 ³ BY MR. ZELLERS: MR. FERGUSON: Why don't we go 4 In your report, Section 4.10, off the record for a second, please. ⁵ you discuss the FDA inactive ingredient list. 5 MS. O'DELL: Yeah. 6 ⁶ Is that right? THE VIDEOGRAPHER: Going off the 7 7 Α. Yes. record, the time is 5:04 p.m. 8 The ingredients that you list (Recess from 5:04 p.m. to Q. are only included if they are used in 9 5:18 p.m.) 10 ¹⁰ FDA-approved drug products. Is that right? THE VIDEOGRAPHER: Back on the 11 11 That's correct. A. record. The time is 5:18 p.m. Most FDA-approved drug products 12 Q. ¹³ do not use fragrances. Is that right? 13 **EXAMINATION** 14 MS. O'DELL: Object to the form. 15 You know, I don't know what BY MR. FERGUSON: ¹⁶ percentage use a fragrance. They're all 16 Dr. Crowley, my name is Ken ¹⁷ chemicals. Right? So they're inactive ¹⁷ Ferguson, and along with Mr. Donath to my ¹⁸ ingredients, supposedly, right, or inert -right, I represent Imerys. Do you understand ¹⁹ although, certainly not all of them, but many ¹⁹ that? 20 ²⁰ of them have buffers, and film formers are A. Yes. 21 Do you know who Imerys is? ²¹ often used, too. Q. 22 ²² BY MR. ZELLERS: Yes. Α. Q. You're not expressing an opinion 23 O. Tell me what your understanding

²⁴ is.

²⁴ that if an ingredient is not listed on the

¹ A. It's a company that mines talc ² and sells talc.

Q. So over the course of the day,

- ⁴ we've been discussing your opinions as
- ⁵ expressed in your testimony today and your
- ⁶ report relating to the fragrance chemicals
- ⁷ that you stated are included in Johnson's
- ⁸ baby powder and formerly Shower to Shower.
- ⁹ Correct?
- ¹⁰ A. Yes.
- Q. And would you agree your
- ¹² opinions in this case that you will express
- ¹³ in your testimony as well as your report only
- relate to fragrance chemicals?
- A. Yes, to a certain extent.
- Q. All right. Well, I better ask
- 17 about that. What do you mean by "to a
- 18 certain extent"?
- 19 A. Yeah. So some of these
- ²⁰ fragrance chemicals have been identified as
- ²¹ carcinogens, meaning if another material is
- ²² present that is carcinogenic, they promote
- ²³ its carcinogenic activity.
 - Q. Well, let me put it this way.

Page 336

- flotation process as you described it, but
 you ran out of time. Correct?
- A. That's correct.
- Q. And I think in your testimony,
- ⁵ the way you put it -- I just want to make
- ⁶ sure I understand -- you said you won't be
- ⁷ expressing an opinion on the flotation
- ⁸ process today. Is it fair there's nothing
- ⁹ about the flotation process in your report?
- Orrect?

11

- A. That's correct.
- Q. And in this case -- for purposes
- 13 of your testimony in this case, you don't
- intend to address the flotation process.
- ¹⁵ Correct?
- A. I suppose if I'm asked I'll
- ¹⁷ answer the questions based on what I did ¹⁸ review.
- Q. Well, since it's not contained
- ²⁰ in your report, I'm sure the attorneys would
- 21 not want us to ask you questions about it in
- 22 that sense, but let me -- well, let me put it
- ²³ this way.

You did not complete your work

Page 337

Page 335

- ¹ First of all, your -- the title of your
- ² report says "Rule 26 Report of Michael M.
- ³ Crowley, Ph.D. Regarding the Fragrance
- ⁴ Chemical Constituents in Johnson & Johnson
- ⁵ Talcum Powder Products." Correct?
- 6 A. Yes.
- Q. And you stand by that title for
- ⁸ your report. Correct?
 - A. Yes.

9

- MS. O'DELL: Object to the form.
- 11 A. Yeah.
- ¹² BY MR. FERGUSON:
- Q. You have no opinions that relate
- 14 to the talc as it was supplied to Johnson &
- ¹⁵ Johnson Consumer Companies. Correct?
- ¹⁶ A. That's correct.
- Q. So no opinions about the talc
- ¹⁸ before the fragrance chemicals were added.
- 19 Fair?
- A. That's correct.
- Q. Now, at one point in your
- ²² testimony earlier today, you said that you
- ²³ had -- and I'm not sure exactly how you put
- 24 it. You were intending to look at the

- ¹ that you were considering doing regarding the
- ² flotation process. Correct?
 - A. That's correct.
- ⁴ Q. Because you ran out of time.
- 5 Correct?
- A. Yes.
- ⁷ Q. And so your work with regard to
- ⁸ the flotation process as it relates to the
- ⁹ talc was not -- was not completed?
- MS. O'DELL: Object to the form,
- asked and answered.
- 12 A. Yeah, that's correct.
- ¹³ BY MR. FERGUSON:
- Q. You indicated earlier that your
- ⁵ initial contact on -- regarding this case was
- ¹⁶ from Margaret Thompson. Correct?
 - A. Yes.
 - 71. 105.
- Q. Did you know Margaret Thompson
- ¹⁹ before you were contacted about working on
- this case?

17

- A. No.
- Q. You talked about the fact that
- ²³ you had read Dr. Thomas Dydek's report.
- ²⁴ Correct?

	M1 Page b: 239	ey, Pn.	J.
	Page 338		Page 340

- ¹ biological properties. I have worked with
- ² flavors and fragrances throughout my career,
- ³ although the primary focus has been on drug
- ⁴ development. I have worked on the
- ⁵ development of foods, nutritional supplements
- ⁶ which are regulated as foods, and I've worked
- ⁷ on cosmetic products as well.
- All of those chemicals that go
- ⁹ into those types of products are in fact
- 10 chemicals. Whether you call them a flavor or
- ¹¹ a fragrance, they are chemicals.
- And in terms of -- of your
- 13 report, you reference in your report
- ¹⁴ fragrance chemicals, but by using that
- terminology, what were you really referring ¹⁶ to?
- 17 Well, Johnson & Johnson calls
- ¹⁸ them fragrance chemicals, so I utilized their
- term, but they're -- they're chemicals.
- 20 And, in fact, are some of those
- chemicals not actually, quote, fragrance
- chemicals in the technical sense?

² there are some that are clearly not

That's correct.

³ fragrances.

⁴ BY MS. O'DELL:

23

24 MR. ZELLERS: Objection; form.

⁶ to do in giving your opinions in this case?

⁸ report. You know, are the products in ⁹ compliance with established industry and

¹⁰ regulatory standards, the first question.

they contribute to the inflammatory

¹⁵ carcinogenicity of the talcum powder

¹⁴ properties, toxicity, and potential

¹¹ And the second question was what are the

¹² properties of the fragrance chemicals, and do

So the two questions in my

That's correct, they aren't --

And -- and what were you asked

¹ wasn't very hard because the government makes

Page 344

- ² those rules pretty clear, and the industry
- ³ trade groups like IFRA and CIR also, you
- 4 know, provide information to support the use
- ⁵ of those chemicals in an appropriate fashion.
- THE REPORTER: In an appropriate fashion?
 - THE WITNESS: Yes.
- BY MS. O'DELL:
- Q. Did you outline the results of
- 11 your review of the evidence in your report as
- ¹² well as the appendices that's attached to
 - your report?

14

- A. Yes.
- And you referred to data in your O.
- appendices earlier today -- actually,
- throughout your testimony. And would that
- data include the information that is located
- at the links that you provided in your
- appendices?
- 21 A. Yes.
- 22 O. So in addition to what's
- ²³ actually listed in the appendices, the data
- that is contained in the link that you

Page 343

- Page 345 ¹ included would also be material that you
- ² reviewed and considered in reaching your
- ³ opinions?
 - Α. Yes.
- Now, in reviewing the list of Q.
- chemicals or starting with that list of
- chemicals, I mean -- let me just -- let me
- back up and just strike that and start again.
- Are fragrance formulas closely
- ¹⁰ held trade secrets?

11

12

- MR. ZELLERS: Objection; form.
- A. Yes, oftentimes they are.
- 13 BY MS. O'DELL:
- 14 Q. In the case of Johnson's baby
 - powder's fragrance, as well as Shower to
- ¹⁶ Shower's fragrance, is that -- the
- information about the formula that you used
- for those fragrances something that
- necessarily would have to be provided by
- Johnson & Johnson?
- 21 It would have been useful, but A.
- 22 it wasn't.
- In the data that you were O.
- ²⁴ provided initially to undertake the work that
- ¹⁸ physical and chemical properties, reviewing ¹⁹ all of the available literature, including ²⁰ some literature that was only available via ²¹ purchase or access to proprietary databases. ²² Reviewing that, and then forming my opinion

So that included looking at the

²³ based upon that.

¹⁶ products.

This would you just describe

- ¹ Johnson's baby powder?
- Okay. So there's -- there's
- ³ four columns. The first column is a
- ⁴ description of the fragrance chemical. The
- ⁵ second column is labeled "minimum," the third
- ⁶ column is labeled "maximum," and the fourth
- ⁷ column is the CAS number that we spoke about
- ⁸ earlier today.
- O. And are there units that have
- ¹⁰ been supplied in order to understand what the
- 11 minimum and maximum amount --
- No. You don't know whether
- 13 that's parts per million, percent,
- ¹⁴ milligrams, micrograms, femtograms, or some
- ¹⁵ other unit of measure.
- 16 Would that information be
- ¹⁷ critical in order to understand the
- concentrations of the specific chemicals in
- the fragrance?
- 20 Yes, along with other pieces of
- 21 information, too. That would be one -- one
- ²² important part of doing that analysis.
- 23 Q. And is that information that
- ²⁴ could only be provided by Johnson & Johnson,
 - Page 351
- ¹ who is essentially the owner of the
- ² fragrance?
- 3 MR. ZELLERS: Form, objection.
- 4 A. I suppose so.
- (Exhibit No. 34 marked)
- BY MS. O'DELL:
- Q. I want to show you what I've
- 8 marked as Exhibit 34. This is a listing of
- chemicals very similar to Exhibit 34. And
- 10 just to make sure I didn't misstate that,
- ¹¹ this is Exhibit 35 that I handed to you. Is
- 12 that a list of chemicals --
- 13 It's Exhibit 34. A.
- 14 O. Is it?
- 15 A. The first one was 33, and this
- ¹⁶ one is 34.
- 17 All right. Thank you. Is
- Exhibit 34 a similar list of chemicals
- 19 that -- for Shower to Shower?
- 20 A. Yes.
- 21 And does it provide essentially O.
- ²² the same information?
- 23 A. Yes.
- 24 And is that information also Q.

- ¹ insufficient to understand the concentrations
- ² or other relevant facts about the chemicals?
- Α. Yes.
 - (Exhibit No. 35 marked)
- BY MS. O'DELL:
- Q. Okay. Now, I want to show you
- ⁷ one last document -- and I'm marking that as
- Exhibit 35 -- and ask you to identify that.
- Exhibit 35 is titled "Changes to
- Johnson & Johnson's Baby Powder Fragrance
- 11 Ingredients."
 - Q. Did you take into consideration
- these historical changes in the baby powder
- formulation when you reached your opinions in
- this case?

12

- 16 A. Yes. I mean, I only had -- I
 - think I had them for three days before the
- report was due, so it was kind of rushed.
- But what I saw was that from 2008 to 2014,
- ²⁰ there were only minimal changes, and even
- ²¹ with this information, it didn't look like
- ²² there was any substantial change other than
- ²³ styrene was changed styrax oil. You know,
- ²⁴ Galaxolide 50 DEP I presumed to mean that it
 - Page 353
- ¹ was the Galaxolide dissolved at a 50 percent
- ² level in diethyl phthalate, and that it was
- ³ replaced by Galaxolide 50 BB. I didn't know
- ⁴ what BB was, but I presumed it was a
- ⁵ different solvent than diethyl phthalate.
- So even with this information,
- ⁷ there was not a whole lot that I could
- ascertain from it, but it didn't change my
- opinions.
- 10 And certainly the schedule in
- producing your report was intense, but did
- you have sufficient time to do what was
- necessary to render your opinions in this 13
 - case?

23

- Yes, I did. I mean, more time
- would have been nice, but I was able to get
- the information that I needed to form my
- opinions and had more than sufficient
- information on which to base them.
- 20 I did want to make one last
- comment about Exhibit 35.
- 22 Go ahead. Q.
 - It looks likes styrene --A.
 - MR. ZELLERS: Objection.

Page 354 Pn.D.

¹ BY MS. O'DELL:

Q. If you have comments about Exhibit 35, please share them with us.

A. Yeah. It looks like styrene was
 removed from the formula twice, about a week
 apart. So it got removed on April 8th of

2014, and then it got removed again on

⁸ April 17th. So I didn't know if that meant

that the amount was just reduced or if it was
 completely replaced, and the information

11 really is insufficient to make that judgment.

Q. You were asked a number of questions today regarding dose, the amount of a particular concentration of a chemical, and the impact of a dose of that chemical in your analyses.

Is -- is information regarding dose essential for your opinions in this case?

²⁰ A. No.

21 Q. Why?

A. Well, as I said a bunch of

23 times, I was not provided the information to

²⁴ be able to ascertain a dose. Even more

Page 356
¹ chemicals. Right? So very likely there's

² additive effects.

And then I talked about the fact that the fragrance chemicals have film

⁵ formers like rosin and Chem 4 present and

⁶ that they will help adhere the fragrance

7 chemical to the talc product.

The rosin was used as a

⁹ sustained release matrix in the

10 pharmaceutical world to make extended release

11 tablets. It's also being used as a film

¹² coating to delay the release of drugs. So

13 that fragrance chemical is going to go with

¹⁴ that talc particle wherever it may land, and

15 it's also going to sustain the exposure of

the fragrance chemical that may be attached to it.

And lastly, you know, I was also asked about the routine, you know -- the

²⁰ exposure, you know, and could I determine,

²¹ you know, how much was, you know, applied.

²² Typical tox studies and safety studies are

short term. They might be multi-day,

²⁴ sometimes up to a couple of weeks or a month.

Page 355

¹ importantly, the safety studies are absent

² for vaginal administration. So it's not

³ just, you know, give a certain amount to, you

⁴ know, the skin or the vaginal area. You do

⁵ safety studies in animals for the intended

⁶ route of administration.

In addition, content uniformity
studies on the fragrance haven't been

⁹ provided. We asked for those as well. In

10 other words, if you're adding, you know,

11 0.5 -- 0.05 percent styrene to the talc and

you make 1,000 kilos of baby powder and yousample the top, middle, and bottom, left,

14 right, and middle, and you draw a sample and

15 measure the uniformity and homogeneity of the

¹⁶ baby powder or Shower to Shower, is that

 $^{17}\,$ fragrance chemical present in a uniform

18 manner in each?

Another consideration is, you know, the safety studies are usually single

²¹ ingredient safety studies. So, you know, if

²² we were to do a safety study of para-Cresol

²³ in an animal, it would be simply that. It

²⁴ wouldn't be para-Cresol and another 142 other

¹ The FDA has recently published guidances that

Page 357

² request safety studies in accord with the

³ frequency of administration -- short term,

⁴ intermediate and long term. And for chronic

administration, the expectation is thatthey'll do two years.

So there have been repeated

8 doses, repeated exposures, and thousands of

⁹ applications.

And lastly, in this matter, baby powder is directed to infants. Shower to

2 Shower is directed to infants. Shower to

two very different anatomies and physiologies

14 in terms of most babies are a little bit

⁵ smaller than adult women. So all those

considerations need to be taken into -- intoconsideration.

Lastly, you know, the question about dose is immaterial with genotoxic materials. As I said earlier, a genotoxic

21 material, there is no threshold for it. A

single molecule is sufficient to cause harm.Q. You were asked a series of

²⁴ questions about styrene, and the suggestion

¹ was made by counsel for J&J that styrene has ² not been determined to be harmful in humans.

³ Do you recall that line of questions?

- A. Yes.
- You know, has -- what's the O. current IARC classification for styrene?
- It was recently updated. I think it's now a 2A.
- Q. And what's a 2A?
- 10 IARC 2A is probably carcinogenic 11 to humans. It means limited evidence of
- carcinogenicity in humans and sufficient
- ¹³ evidence of carcinogenicity in animal studies
- ¹⁴ or inadequate evidence of carcinogenicity in
- ¹⁵ humans and sufficient evidence of
- ¹⁶ carcinogenicity in animals, and strong
- ¹⁷ evidence that the carcinogen is meted by a
- 18 mechanism that does operate in humans.
- Has the National Toxicology 19
- ²⁰ Program evaluated styrene?
- 21 Yes. A.
- O. And what was their determination
- ²³ in terms of its potential ability to cause
- ²⁴ cancer?

Page 359

- 1 MR. ZELLERS: Objection; form,
 - foundation.
- ³ BY MS. O'DELL:
- Q. I'll restate the question. What
- ⁵ was the National Toxicology's
- ⁶ determination -- Program's determination
- regarding styrene?
- I'm on Page -- Page -- are you
- talking about IARC or NTP?
- 10 Q. NTP. Sorry.
- 11 Sorry. I'm going to have to A.
- 12 pull up that.
- 13 Let me just ask you this
- 14 question and see if it -- has styrene been
- determined by NTP to reasonably -- as
- ¹⁶ reasonably anticipated to be a human
- carcinogen?
- 18 A. Yes.
- 19 MR. ZELLERS: Form, foundation,
- 20 objection.
- 21 BY MS. O'DELL:
- Q. You were asked questions, also,
- ²³ in the last segment of J&J's examination
- ²⁴ about a database that is -- the acronym for

- ¹ which is GHS. Do you recall that?
 - A. Yes.
- Is that a commercial database
- ⁴ that requires some type of payment in order

Page 360

- to be able to obtain all the information?
- I believe so. A.
- O. And that's not information that
- you had access to. Correct?
- No. I just -- I looked at that
- work that was in the public domain.
- 11 And is the information in the
- public domain that you had available to you
- 13 the MSDS sheets that were produced by the
- manufacturers of those substances?
 - A. Yes.

15

20

23

- Q. And so to the degree that J&J's
- counsel suggested that somehow you had access
- to that database, that's not correct?
 - A. That's correct.
 - And that would be something, Q.
- typically, that would be available only to
- manufacturers?
 - MR. ZELLERS: Objection; form,
- 24 foundation.

Page 361 That's correct, it would be

- ² available to those that want to pay for it.
- ³ BY MS. O'DELL:
- Q. You were asked questions
- ⁵ about -- I believe you referenced this
- ⁶ earlier in your testimony, and you used the
- ⁷ term "co-carcinogen." What's a
- co-carcinogen?
- A co-carcinogen is a chemical
- that by itself may not be carcinogenic, but
- when administered in the presence of a
- carcinogen, it increases the carcinogen's
- ¹³ activity.
- 14 O. Were you asked to do an exposure assessment for any individual plaintiffs?
- 16 A.
- 17 Q. Were you asked to do any type of
- an exposure analysis generally?
- 19 A. No.
- 20 And as I believe you've O.
- 21 testified, that wasn't necessarily --
- ²² necessary for the opinions you've rendered in 23 this case?
- 24
 - A. No.

Page 362 Page 364 1 Do your opinions in this case 1 anything further at the moment, O. 2 ² include those that you've expressed in your Dr. Crowley. 3 ³ report as well as your deposition here today? 4 A. Yes. **FURTHER EXAMINATION** 5 Do you hold those opinions to a Q. reasonable degree of scientific certainty? BY MR. ZELLERS: I believe so, yes. Q. Dr. Crowley, are you aware of A. any study that establishes styrene exposure In reaching those opinions, have 8 Q. you used the methodology that's generally as a cause or a contributing cause to ovarian accepted in your field as a chemist? cancer in humans? 11 11 Yes. MS. O'DELL: Objection; asked A. 12 12 O. And have you used the same rigor and answered. ¹³ and attention to detail in this exercise in 13 Yeah, so as we've talked about, A. your work in this case as you use in your those studies are unethical, and that's why practice in consulting and formulating drugs there aren't any. and other compounds? 16 MR. ZELLERS: I have no further 17 17 questions. I do just want to put a Yes. Α. 18 Q. You were asked questions by 18 notation on the record that at the ¹⁹ Imerys' counsel regarding the flotation 19 start of the deposition we received process and the chemicals involved in the 20 this update. It's Exhibit -- we've ²¹ flotation process. Would it be fair to say 21 marked it as Exhibit 3. I have not had 22 22 that your work is ongoing in relation to that a chance to look at it. It's possible 23 question? that I may have some questions relating 24 24 Yes. to Exhibit 3, once I do have a chance A. Page 363 Page 365 1 MR. FERGUSON: Object to form. 1 to look at it and study. I just want 2 2 to put that notation on the record. THE REPORTER: Who was the 3 objection? 3 I'm not asking for an agreement. 4 MS. O'DELL: Well, no agreement. 4 MR. FERGUSON: Sorry. 5 THE REPORTER: Thank you. 5 This is your opportunity. I think, 6 Counsel, you have time available to you 6 BY MS. O'DELL: 7 7 You were -- you cite in your if you want to take a break and look at report the CIR analyses of certain chemicals, 8 it. It's a six-page document. It's to the degree they were available. Why did very straightforward, and you're 10 you include CIR as a part of the data you welcome to ask Dr. Crowley questions, 11 11 reported? but he's -- he's here today to answer 12 12 MR. ZELLERS: Objection; form. them. 13 They're an industry trade group 13 MR. ZELLERS: It's a nine-page ¹⁴ that examines the safety of cosmetic 14 document. It's very technical in 15 ingredients, and Johnson & Johnson is a nature. I am not capable to sit here 16 on the fly and to go through and review ¹⁶ member. ¹⁷ BY MS. O'DELL: 17 and analyze this document and this 18 18 Do you -- excuse me. Sorry. material. 19 19 And they're expected to follow It may be that I have no further A. 20 questions relating to this document, CIR rules. 21 21 but the Doctor indicated that he had Do you consider the CIR O. 22 22 authoritative? completed this document on December 23 23 18th. It was not produced to the A. No. 24 24 defendants until today, right when we MS. O'DELL: I don't have

Page 366 Page 368 1 walked into the deposition. ¹ Johnson's counsel? And it's the --2 So I'm just making a note that I I don't know if I still have it. 3 do want to go look at it, and at least Hang on. reserving the opportunity to raise it 4 Q. I'll be happy to provide you my 5 with the Court if we feel we need time copy. 6 to ask questions about it. A. Okav. 7 The other thing that I will ask Would you explain what Exhibit 3 Q. 8 8 is? is that -- I'll request that you update 9 Deposition Exhibit 2, which are the A. Exhibit 3 is a comparison of the 10 invoices, with whatever invoices have chemical abstract numbers that I found based been submitted by Dr. Crowley that have 11 upon the information that was provided to me 12 at the outset of my work on this matter with not been produced here today. 13 MS. O'DELL: Let me just respond ¹³ those disclosed in the Exhibits 33 and 34 by 14 to that, because I've checked our ¹⁴ J&J. Out of 175 chemicals, I think we had 15 files. We don't have another invoice. different CAS numbers for 11, and it turns 16 out that some of the CAS numbers provided by To the degree that there's an invoice 17 J&J are effectively the same as mine, just in the future, which I'm sure there 18 will be, obviously we'll give that to multiple numbers for the same chemical. For example, the first item was 19 you, but it's not deficient as we stand 20 Boswellia carterii oil. We have two here today. Just to point that out. 21 ²¹ different CAS numbers. When I searched what 22 22 the J&J CAS number was. I found that it -- it 23 23 says that that number refers to Boswell --24 ²⁴ Boswellia carterii resin. The CAS number I Page 367 Page 369 1 ¹ found was for Boswellia carterii oil, ² according to PubChem and the FDA website. 2 **FURTHER EXAMINATION** 3 I also checked fragrance - - -⁴ companies and verified that. So in this ⁴ BY MR. FERGUSON: Q. I have what I hope is just one ⁵ case, it didn't represent any changes in my question, which is: With regard to the report. ⁷ question you just answered that Ms. O'Dell Some of the CAS numbers that ⁸ asked you regarding the flotation process and ⁸ were provided by J&J are clearly wrong. your answer that your work is ongoing, I just They're -- I think there are some errors ¹⁰ want to make clear, in your 200-page or so there. For example, for Cedrus Atlantic 11 report, there's not one word about anything cedarwood bark oil -- I'm sorry. That's not relating to the flotation process that you the one I was thinking of. 13 Well, copper chlorophyll. The 13 evaluated. Correct? 14 That's correct. ¹⁴ J&J CAS number does not correspond to copper chlorophyll under any of the search engines 15 MR. FERGUSON: That's all. 16 MS. O'DELL: I have one last 16 that I looked at. 17 17 The J&J CAS number provided for question. 18 gamma-Undecalactone does not correspond to 19 that chemical. It's peppermint oil, so I **FURTHER EXAMINATION** think that that's a typo or mistake either in 20

22

23

Q.

A.

²³ Exhibit 3, because I want to try to address

²⁴ the issue that's been raised by Johnson &

Dr. Crowley, can you turn to

21

22

BY MS. O'DELL:

the name or the CAS number.

That's what the document is.

²⁴ It's a comparison of the CAS numbers in

And so --
